### 1. Summary of Significant Accounting Policies

#### A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Home Insurance Company (the "Company") were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("DOI"). The Company was redomesticated from Tennessee to Ohio in 2001.

The Ohio DOI requires insurance companies domiciled in Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP"), subject to any deviations prescribed or permitted by the Ohio DOI. No deviations from NAIC SAP were used in preparing these statutory-basis financial statements.

#### B. Use of Estimates in the Preparation of the Financial Statements

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense ("LAE") reserves.

#### C. Accounting Policies

Insurance premiums written are earned primarily on a pro-rata basis over the period of risk. Unearned premium reserves are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company's exposure to credit risk.

Acquisition costs, such as agents' commissions, premium taxes and other policy initiation costs are charged to operations as incurred.

Other income includes finance and service charges collected on premiums receivable. This revenue is offset by finance and service charges ceded under the quota-share reinsurance agreement with Progressive Casualty Insurance Company ("Casualty"), an insurance affiliate domiciled in Ohio. The ceded finance and service charges are reported as miscellaneous expense in the statements of income.

In addition, the Company uses the following accounting policies:

##### Investments

- Cash and cash equivalents include bank accounts and certificates of deposit as well as short-term investments with original maturities of three months or less that are reported at amortized cost, which approximates market value.
- Short-term investments include securities acquired within one year of maturity except for those with original maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost, which approximates market value.
- Bond valuations are based on NAIC designations and are generally reported at amortized cost using the scientific method, which closely approximates the effective interest method. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.
- Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at values published by the NAIC, which are generally based on market values. Changes in the NAIC values of these securities are reflected directly as unrealized gains or losses net of deferred income taxes in statutory surplus.
- Nonredeemable preferred stocks are reported at values published by the NAIC, which are generally based on market values. Changes in the NAIC values of these securities are reflected directly as unrealized gains or losses net of deferred income taxes in statutory surplus. Redeemable preferred stocks are reported at book value.
- The fair values reported on Schedule D are derived from NAIC market prices listed in the NAIC's *Valuations of Securities Manual*.
- The Company has no investments in mortgage loans.
- Loan-backed securities are stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed securities were obtained from available market data, broker dealer and/or internal estimates. These assumptions are consistent with current interest rate and economic trends. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the retrospective method, with adjustments taken into investment income earned during the period of adjustment with a corresponding offset to amortized cost.
- The Company owns 100% of the common stock of Specialty Risk Insurance Company ("Specialty Risk"), an insurance affiliate domiciled in Ohio. This investment is reported on the equity basis as described in the *Purposes and Procedures of the Securities Valuation Office of the NAIC Manual* (see Note 10).
- The Company has no investments in joint ventures, partnerships, or limited liability companies.
- The Company has no investments in derivatives.
- The Company enters into reverse repurchase agreements in which it receives cash as collateral for the underlying securities. The cash collateral received is invested in cash equivalents, and an offsetting liability is established. There were no open reverse repurchase agreements as of December 31, 2002. The interest expense incurred on reverse repurchase agreements is netted with the interest income earned on cash equivalents on Schedule E, Part 1.
- Realized gains and losses on sales of securities are computed based on the first-in, first-out method.

##### Loss and LAE Reserves

- Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company conducts extensive reviews each month on portions of its business to help ensure that the Company is meeting its objective of always having reserves that are adequate, with minimal variation. Results would differ if different assumptions were made (see Note 24).

### 2. Accounting Changes and Corrections of Errors

#### A. Accounting Changes Other than Codification and Correction of Errors

During the current year, the Company discovered errors relating to prior years in the compiling and reporting of the payable to parent and affiliates balance and various income and expense items. The table below provides details on the errors. To correct for these errors, an adjustment was made in the current year on page 4, line 36 and page 3, line 19.

Description	Increase (Decrease) in Surplus
Federal income tax adjustment 1997	\$ (589,055)
Federal income tax adjustment 1998	216,523

Various income and expense adjustments 2001	1,145,875
Total adjustment to surplus	<u>\$ (2,961,079)</u>

#### B. Accounting Changes as a Result of Codification

Accounting changes adopted to conform to the provisions of the NAIC SAP are reported as changes in accounting principle. The cumulative effect of a change in accounting principle is reported as an adjustment to unassigned funds (surplus) in the period of change. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if any new accounting principles had been applied retroactively for all prior periods. There were no changes due to Codification during 2002 that resulted in recording a cumulative effect of a change in accounting principle. Details of the 2001 changes are as follows:

Surplus at December 31, 2000 per Annual Statement	\$25,775,198
Codification adjustments:	
Assets:

## B. Guaranty Fund and Other Assessments

The Company is subject to state guaranty fund and other assessments by the states in which it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies. As of December 31, 2002, the Company's estimated liability for state guaranty fund and other assessments is not material.

## C. Gain Contingencies

None

## D. All Other Contingencies

The Company is named as a defendant in various lawsuits generally relating to its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves.

There is a putative class action lawsuit pending against the Company in Florida challenging the legal propriety of the Company's payment of preferred provider rates on personal injury protection ("PIP") claims. The primary issue is whether the Company violated Florida law by paying PIP medical expense claims at preferred provider rates. The Company is defending vigorously and the outcome of this case is uncertain at this time. In accordance with NAIC SAP, the Company is only permitted to establish loss reserves for lawsuits when it is probable that a loss has been incurred and the Company can reasonably estimate its potential exposure. The Company does not consider a loss from this case to be probable or estimable at this time.

Several of the Company's insurance affiliates are currently defending lawsuits involving worker classification issues. These lawsuits challenge the Company's insurance affiliates' exempt employee classification under the federal Fair Labor Standards Act and/or various state laws. In November 2002, the Company's insurance affiliates reached an agreement to settle their lawsuit relating to the classification of their California claims employees as exempt workers for purposes of state wage and hour laws for an amount not to exceed \$10 million. The Company's net exposure to this settlement will be determined by its participation in the management agreement with Casualty (see Note 10F). This class action lawsuit was based on California-specific law. The Company's insurance affiliates continue to believe that their classification of claims representatives as exempt workers is appropriate under federal law. Accordingly, the Company's insurance affiliates do not consider a loss from the remaining cases to be probable and estimable at this time.

The estimate of the PML was made exclusively by Progressive employees. The company writes and assumes homeowners in the states of Arizona, Illinois, and Maryland, and Texas, which is 75% reinsured with external reinsurers. The retained business is 90% reinsured with Progressive Casualty Insurance Company, an affiliate, implying that there is limited net exposure to the company's total surplus.
