- 2. There are no assets measured at fair value using significant unobservable inputs (Level III).
- 3. Fair values of fixed maturity securities are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level I or Level II inputs, for the determination of fair value to facilitate fair value measurements and disclosures. United States Government securities represent Level I securities, while Level II securities primarily include corporate securities, securities from states, municipalities and political subdivisions and residential mortgage-backed securities. For securities not actively traded, the third party pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are

NOTES TO FINANCIAL STATEMENTS

often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

Fair values of equity securities are generally designated as Level I and are based on quoted market prices. For certain equity securities, quoted market prices for the identical security are not always available and the fair value is estimated by reference to similar securities for which quoted prices are available. These securities are designated Level II.

There have been no significant changes in the valuation techniques during the current period.

21. Other Items

No significant change.

22. Events Subsequent

There were no events occurring subsequent to March 31, 2011 requiring disclosure. Subsequent events have been considered through May 12, 2011, for the statutory statement issued on May 12, 2011.

23. Reinsurance

No significant change.

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

No significant change.

25. Change in Incurred Claims and Claim Adjustment Expenses

The estimated cost of claims and claims adjustment expenses attributable to insured events of prior years decreased by \$32,605,991 during 2011. This is approximately 9.3% of unpaid claims and claim adjustment expenses of \$351,697,301 as of December 31, 2010. The redundancy reflects the decreases in estimated claims and claims adjustment expenses as a result of claims payment during the year, and as additional information is received regarding claims incurred prior to 2011. Recent claim development trends are also taken into account in evaluating the overall adequacy of unpaid claims and claims adjustment expenses. Included in this decrease, the company experienced \$6,989 of favorable prior year claim development on retrospectively rated policies. However, since the business to which it relates is subject to premium adjustments, there was no significant impact on surplus.
