Reserves remaining for prior years are now \$659.6 million. Therefore, there has been a \$18.4 million favorable prior-year development from December 31, 2010 to March 31, 2011. The favorable development is principally from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: commercial multiple peril, homeowners/farmowners and private passenger auto. This change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the Company does not write this type of policy.
