NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Victoria Specialty Insurance Company (the Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Insurance Department recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Federal Income Taxes. The Company's parent, Nationwide Mutual Insurance Company (Mutual), files a consolidated federal income tax return, which includes all eligible U.S. affiliates. In this regard, the included subsidiaries pay to Mutual the amount which would have been payable on a separate return basis without regard to the alternative minimum tax. Mutual pays tax due on a consolidated basis.

The Company provides for federal income taxes based on amounts the Company believes it will ultimately owe. Inherent in the provision for federal income taxes are estimates regarding the deductibility of certain expenses and the realization of certain tax credits. In the event the ultimate deductibility of certain expenses or the realization of certain tax credits differs from estimates, the Company may be required to change the provision for federal income taxes recorded in the financial statements which could be significant. Management has used best estimates to establish reserves based on current facts and circumstances regarding tax exposure items where the ultimate deductibility is open to interpretation.

In accordance with guidance specified in the NAIC SAP, the Company utilizes the asset and liability method of accounting for taxes. Under this method, deferred tax assets, net of any non-admitted portion, and deferred tax liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The change in deferred taxes is charged directly to surplus.

Reinsurance Recoverables. In the normal course of business, the Company reinsures, or cedes, a portion of its insurance risks with other companies in order to reduce net liability on individual risks, to provide protection against the potential impact of large losses, and to obtain greater diversification of risks. The ceding of risk, however, does not discharge the Company from its primary obligation to the policyholder. Reinsurance recoverables include amounts billed to reinsurers on losses paid. Estimates of amounts expected to be recovered from reinsurers that have not yet been paid on unpaid losses are estimated in a manner consistent with the claim liability associated with the underlying policy and are recorded as reductions in total loss and loss adjustment expense (LAE) reserves. Such reinsurance recoverables and reserve reductions partially offset claim costs in the Company's statutory statements of operations and are included as an offset to losses and LAE's in the accompanying statutory statements of admitted assets, liabilities and surplus. The Company regularly evaluates and monitors the financial condition of its reinsurers under voluntary reinsurance arrangements to minimize its exposure to significant losses from reinsurer insolvencies. There are no contracts using deposit accounting as of December 31, 2011 and 2010.

Statutory accounting principles require recognition of a minimum liability for certain unsecured or overdue reinsurance recoverables (100% for unsecured unauthorized reinsurance and up to 20% recoverables from certain reinsurers more than 90 days overdue on their payments). As of December 31, 2011 and 2010, the Company had no provision related to conditional reinsurance recoverables.

In addition, the Company uses the following accounting policies:

1. Short-term investments are carried at amortized cost, which approximates fair value. Short-term investment transactions are recorded on trade date. Interest income is recognized when earned.
2. Bonds, excluding loan-backed and structured securities, are stated at amortized cost except those with a NAIC designation of "3" or below which are stated at the lower of amortized cost or fair value. Bond transactions are recorded on trade date, with the exception of private placement bonds, which are recorded on settlement date. Amortization of purchase premiums and discounts is calculated using the effective yield method. Realized gains and losses are determined on a specific identification basis. For bonds for which active market quotations are available, the Company generally uses independent pricing services to assist in determining the fair value.

Management regularly reviews its bond portfolio to evaluate the necessity of recording impairment losses for other-than-temporary declines in fair value. Many criteria may be considered in this review process including, but not limited to, the timing and amount of cash flows, the ability of the issuer to meet its obligations, financial prospects of the issuer, quality of any underlying collateral, current relevant economic conditions that may impact issuers, severity of the decline in fair value, the Company's intent to sell or the intent and ability to hold the security until its value recovers. For bonds (excluding loan-backed and structured securities) determined to be other-than-temporarily impaired, the cost basis is written down to fair value and the amount of the write-down is recorded as a realized loss.

3. Common stocks, other than investments in stocks of subsidiaries and affiliates (see Note C. 7 below), are stated at fair value. Common stock transactions are recorded on trade date. Realized gains and losses are determined on a specific identification basis. Dividends are recognized when declared. For marketable stocks for which active market quotations are available, the Company generally uses independent pricing services to assist in determining the fair value.

NOTES TO FINANCIAL STATEMENTS

4. Preferred stocks redeemable at par and rated investment grade are stated at amortized cost. Perpetual preferred stocks rated investment grade are stated at fair value. Non-investment grade preferred stocks are stated at the lower of amortized value or fair value. Preferred stock transactions are recorded on trade date. Realized gains and losses are determined on a specific identification basis. Interest income is recognized when earned while dividends are recognized when declared. Preferred stocks not carried at fair value, which are in an unrealized loss position, are evaluated for impairment based on the timing of any anticipated recovery in value and the length of time in a loss position. For declines in value considered to be other-than-temporary, a realized loss to fair value is recorded. For marketable preferred stocks, for which active market quotations are available, the Company generally uses independent pricing services to assist in determining the fair value.
5. Mortgage loans are carried at the unpaid principal balance adjusted for premiums, discounts and certain deferred loan origination and commitment fees, less a valuation allowance. The valuation allowance for mortgage loans reflects management's best estimate of probable credit losses. Management's periodic evaluation of the adequacy of the valuation allowance for losses is based on past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of the underlying collateral, current economic conditions, composition of the loan portfolio and other relevant factors. The Company maintains a valuation allowance for estimated credit losses on mortgage loans which is comprised of specific and non-specific reserves.

Specific reserves for impaired mortgage loans established based on a review by portfolio managers. Mortgage loans are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. When management determines that a loan is impaired, a provision for loss is established equal to either the difference between the carrying value and the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent.

The non-specific reserve is established for probable losses inherent in the mortgage loan portfolio as of the balance sheet date but not yet specifically identified. The non-specific reserve is based on past loan loss experience, inherent risks in the portfolio, current economic conditions, composition of the loan portfolio and other relevant factors.

Changes in the non-specific reserve are recorded directly in surplus, while changes in the specific reserves are recorded in realized losses.

6. Loan-backed and structured securities (collectively, loan-backed securities) are stated at amortized cost except those with an initial NAIC designation of "3" or below which are stated at the lower of amortized cost or fair value. Amortization of purchase premiums and discounts is calculated using the effective yield method. The Company periodically updates its estimates of cash flows, including new prepayment assumptions, for loan-backed securities. The retrospective adjustment method is used to value loan-backed securities where the collection of all contractual cash flows is probable. For loan-backed securities where the collection of all contractual cash flows is not probable, the Company, (a) recognizes the accretable yield over the life of the loan backed security as determined at the acquisition or transaction date, (b) continues to estimate cash flows expected to be collected at least quarterly, and (c) recognizes an other-than-temporary impairment loss if the loan-backed security is impaired (i.e., the fair value is less than the amortized cost basis) and there is a decrease in the cash flows expected to be collected. If the Company intends to sell an impaired loan-backed security or does not have the intent and ability to retain the impaired loan-backed security for a period of time sufficient to recover the amortized cost basis, an other-than-temporary impairment has occurred. In these situations, the other-than-temporary impairment loss recognized is the difference between the amortized cost basis and fair value. If the Company does not expect to recover the entire amortized cost basis when compared to the present value of cash flows expected to be collected, it cannot assert that it has the ability to recover the loan-backed security's amortized cost basis even though it has no intention to sell and has the intent and ability to retain the loan-backed security. Therefore an other-than-temporary impairment has occurred and a realized loss is recognized for the non-interest related decline, which is calculated as the difference between the loan-backed security's amortized cost basis and the present value of cash flows expected to be collected.

For situations where an other-than-temporary impairment is recognized, the previous amortized cost basis less the other-than-temporary impairment recognized as a realized loss becomes the new cost basis.

Loan-backed security transactions are recorded on the trade date. Realized gains and losses are determined on a specific identification basis. For loan-backed securities for which active market quotations are available, the Company generally uses independent pricing services to assist in determining the fair value.

7. Investments in subsidiary and affiliated companies are stated as follows:

Not applicable.
8. Investments in joint ventures and partnerships are accounted for using the equity method of accounting. Changes in carrying value as a result of the equity method are reflected as net unrealized capital gains and losses as a direct adjustment to surplus. Realized gains and losses are generally recognized through income at the time of disposal or when operating distributions are received. Management reviews the portfolio for the need to record impairments based on the expected ability to recover unrealized losses and the intent to hold the investment until recovery. The reviews include evaluating the current and expected earnings of the individual investments. Other-than-temporary impairment losses are recorded on other invested assets when indicators of impairment are present and are charged to net realized gains and losses.
9. Accounting for derivatives

Not applicable.
10. Insurance premiums are generally earned ratably over the policy term. The liability for unearned premiums represents the portion of premiums written relating to the unexpired terms of coverage. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed. Premiums in course of collection represent agent balances and uncollected premiums from policyholders for current policies in force and policy premiums assumed from others, including amounts placed with affiliates. As of December 31, 2011 and 2010, the Company had no liabilities related to premium deficiency reserves. The Company includes anticipated investment income when calculating its premium deficiency reserves, in accordance with SSAP No. 53, Property-Casualty Contracts – Premiums.

NOTES TO FINANCIAL STATEMENTS

11. The Company establishes losses and loss expense reserves for reported claims and claims incurred but not yet reported. Estimating the liability for losses and loss expense reserves involves significant judgment and multiple assumptions. Management considers the Company's experience with similar claims, historical trends, economic factors and judicial, legislative and regulatory changes in establishing reserves. The Company's losses and loss expense reserves are recorded net of reinsurance and amounts expected to be received from salvage (the amount recovered from property after the Company pays for a total loss) and subrogation (the right to recover payments from third parties).

Assumptions and estimates for losses and loss expense reserves are updated as new information becomes available. Due to the inherent uncertainty in estimating losses and loss expense reserves, the actual cost of settling claims may differ materially from recorded amounts. Changes in losses and loss expense reserve estimates are included in results of operations in the period the estimates are revised.

12. The Company has a written capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, vehicles, other equipment and leasehold improvements. The Company has not modified its capitalization policy from the prior period.
13. The Company does not write major medical insurance with prescription drug coverage.

Note 2 - Accounting Changes and Corrections of Errors

A. Accounting Changes

Adopted Accounting Standards

On December 31, 2011, the Company adopted revisions to SSAP No. 5, *Liabilities, Contingencies and Impairments of Assets* (SSAP No. 5R) which require insurance entities to recognize, at inception of a guarantee, a liability for the obligations it has undertaken in issuing the guarantee, even if the likelihood of having to make payments under the guarantee is remote. The revised guidance does not require liability recognition for guarantees made to or on behalf of direct or indirect wholly-owned insurance and non-insurance subsidiaries or for guarantees considered unlimited. The Company also adopted additional revisions related to disclosure requirements of SSAP No. 25, *Accounting for and Disclosures about Transactions with Affiliated and Other Related Parties* to correspond with SSAP No. 5R. The guidance is effective for all guarantees issued or outstanding as of December 31, 2011, and disclosure of all guarantees must be reported annually. Refer to Note 14 for the required disclosures and financial impact of this guidance.

On January 1, 2011, the Company adopted changes to the definition of loan-backed and structured securities within SSAP No. 43R, *Loan-backed and Structured Securities*. These changes required certain securities to be reclassified into the loan-backed and structured securities classification and resulted in an immaterial impact to the Company upon adoption. Refer to Note 5 for required disclosures and financial impact.

On December 31, 2009, the Company adopted temporary guidance in SSAP No. 10R, *Income Taxes Revised – A Temporary Replacement of SSAP No. 10*, that requires additional disclosures related to tax planning strategies and provides an election for a qualifying life insurance company to increase within its deferred tax asset admissibility calculation the reversal period from one to three years and its limitation from 10% of statutory capital and surplus to 15%. This guidance is effective for interim and annual reporting periods through December 31, 2011, and will be replaced with the adoption of SSAP No. 101, *Income Taxes*. Refer to Note 9 for the required disclosures and financial impact.

Pending Accounting Standards

On January 1, 2012, the Company adopted a new standard, SSAP No. 101, *Income Taxes*, which supersedes SSAP No. 10R, *Income Taxes Revised – A Temporary Replacement of SSAP No. 10*. The standard applies a 'more likely than not' threshold for the recognition of federal and foreign tax loss contingencies and establishes a new framework for determining the admissibility of deferred tax assets (DTA). The framework sets a three year limit on loss carryback provisions, introduces guardrails for determining the realization period and percentage of capital and surplus companies may use to determine DTA admissibility, and establishes parameters around offsetting DTAs against deferred tax liabilities (DTL) as it relates to the admissibility of a DTA. The standard also adopts new disclosure requirements related to tax planning strategies, the amounts and components used to determine admissible DTA amounts, and information about reasonably possible increases in the total liability for any federal or foreign income tax loss contingencies within twelve months of the reporting date. The Company is currently in the process of determining the impact of adoption of this standard.

OTTI recognized 4th Quarter			
j. Intent to Sell	\$ -	\$ -	\$ -
k. Inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis	\$ -	\$ -	\$ -
l. Total 4th Quarter	\$ -	\$ -	\$ -
m. Annual Aggregate Total		\$ -	

3. The following table summarizes other-than-temporary impairments for loan-backed securities held at the end of the quarter based on the fact that the present value of projected cash flows expected to be collected was less than the amortized cost of the securities:

(1)	(2)	(3)	(4)	(5)	(6)	(7)
CUSIP	Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized Other-Than- Temporary Impairment	Amortized Cost After Other-Than- Temporary Impairment	Fair Value at time of OTTI	Date of Financial Statement Where Reported
Total			\$ -			

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$ -
	2. 12 Months or Longer	\$ -
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$ -
	2. 12 Months or Longer	\$ -

5. The Company reviews all loan-backed and structured securities in which the fair value of the given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, the quality of any credit guarantors, to determine the cash flows expected to be received for the security.

NOTES TO FINANCIAL STATEMENTS

If the severity and duration of the security's unrealized loss indicates a risk of an other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized cost basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

E. Repurchase Agreements and Securities Lending Transactions

1. For repurchase agreements, Company policy requires a minimum of 102% of the fair value of securities purchased under repurchase agreements to be maintained as collateral. Cash collateral received is invested in short-term investments and the offsetting collateral liability is included in aggregate write-ins for liabilities. There were no open repurchase agreements as of year-end. The Company does not participate in securities lending.
2. No assets were pledged as collateral as of year-end.
3. The Company has not accepted collateral as of year-end.

3. The Company did not have any protective tax deposits under Section 6603 of the Internal Revenue Code.

Note 10 - Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

A. Nature of Relationships

The Company is a wholly owned subsidiary of Victoria Fire & Casualty Company, which is in turn owned by THI Holdings (Delaware), Inc. (THI). THI is owned by Mutual, which, as a mutual entity, is not directly or indirectly owned or controlled by any other company, corporation, and group of companies, partnership or individual. Mutual is operated by and solely in the interests of its policyholders.

Bonds and stocks, if any, owned, acquired or disposed of in any year by the Company in any subsidiary or affiliate are set forth in Schedule D of either this statement or those of prior years. Intercompany relationships and specific holdings are detailed in the Nationwide Corporate Organizational Chart, which appears as Schedule Y of this statement.

NOTES TO FINANCIAL STATEMENTS

The Company is a party to various reinsurance agreements including a pooling agreement with several affiliated companies. See Note 26.

The Company and various affiliates have entered into agreements with Nationwide Cash Management Company (NCMC) a subsidiary of the Company, under which NCMC acts as a common agent in handling the purchases and sales of short-term securities for the respective accounts of the participants. Amounts on deposit with NCMC were \$4.6 million and \$2.9 million as of December 31, 2011 and 2010, respectively, and are included in short-term investments on the accompanying statutory statements of admitted assets, liabilities, capital and surplus.

B. Detail of Transactions Greater than ½ % of Admitted Assets

Not applicable.

C. Change in Terms of Intercompany Arrangements

Effective January 1, 2011, Mutual changed the pooling arrangements under which several affiliated companies cede all their direct and assumed business to the pool. See Note 26.

D. Amounts Due to or from Related Parties

Affiliate receivables and payables are the result of cost sharing and intercompany service agreements between the Company and its parent and affiliates in which settlement has not yet occurred. Affiliate receivables are presented gross of affiliate payables when the Company has the right to offset. The Company reported \$993.7 thousand due to parent and \$198.8 thousand due from parent at December 31, 2011 and 2010, respectively. The Company reported gross amounts of \$1.4 million and \$366.3 thousand due from parent and affiliates and \$3.7 million and \$1.2 million due to parent and affiliates at December 31, 2011 and 2010, respectively. These arrangements are subject to written agreements which require that intercompany balances be settled within 30 days.

E. Guarantees or Undertakings for Related Parties

The Company has no guarantees or contingent commitments to affiliates other than indicated in Note 14 A.

F. Management, Service Contracts, Cost Sharing Arrangements

The Company shares its home office, other facilities, equipment, and common management and administrative services with its subsidiaries and affiliates. Pursuant to a cost sharing agreement between the companies, the amounts associated with these services are subject to allocation based on standard allocation techniques and procedures acceptable under general cost accounting techniques and procedures in conformity with the NAIC's statutory accounting practices and procedures. Measures used to determine the allocation among companies includes individual employee estimates of time spent, special cost studies, the number of full-time employees, and other methods agreed to by the participating companies. The Company does not believe amounts recognized under the intercompany agreement are materially different than what would have been recognized had the Company operated on a stand-alone basis.

Note 20 – Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

NOTES TO FINANCIAL STATEMENTS

The Company categorizes its assets and liabilities measured and reported at fair value in the quarterly statement into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The fair value hierarchy levels are as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimate about the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs.

The Company periodically reviews its fair value hierarchy classifications for financial assets and liabilities. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications into/out of the fair value hierarchy levels are reported as transfers at the beginning of the period in which the change occurs.

For bonds and marketable stocks for which market quotations are available, the Company generally uses independent pricing services to assist in determining the fair value measurement.

The Company's investments in corporate debt securities, mortgage-backed securities and other asset-backed securities are valued with the assistance of independent pricing services and non-binding broker quotes. The Company's policy is to give priority to pricing obtained from our primary independent pricing service. In the event that pricing information is not available from an independent pricing service, non-binding broker quotes are used to assist in the valuation of the investments. In many cases, only one broker quote is available. The Company's policy is generally not to adjust the values obtained from brokers.

Broker quotes are considered unobservable inputs as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased such that generally only one quotation is available. As the brokers often do not provide the necessary transparency into their quotes and methodologies, the Company periodically performs reviews and tests to ensure that quotes are a reasonable estimate of the investments fair value.

For investments valued with the assistance of independent pricing services, the Company obtains the pricing services' methodologies, inputs and assumptions and classifies these investments accordingly in the fair value hierarchy. The Company periodically reviews and tests the pricing and related methodologies obtained from these independent pricing services against secondary sources to ensure that management can validate the investment's fair value and related fair value hierarchy categorization. If large variances are observed between the price obtained from the independent pricing services and secondary sources, the Company analyzes the causes driving the variance.

For certain bonds not priced by independent services (e.g., private placement securities without quoted market prices) a corporate pricing matrix or internally developed pricing model is most often used. The corporate pricing matrix is developed using private spreads for corporate securities with varying weighted average lives and credit quality ratings. The weighted average life and credit quality rating of a bond to be priced using the corporate pricing matrix are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate U.S. Treasury yield to create an estimated market yield for that security. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

No assets or liabilities were carried at fair value as of December 31, 2011.

- F. State Transferable and Non-Transferable Tax Credits
Not applicable.
- G. Subprime Mortgage Related Risk Exposure

In general, recent market activity has negatively impacted the valuation of securities containing sub-prime collateral, which are classifications of investments in which the Company invests. The Company evaluates many characteristics when classifying collateral as sub-prime, including the credit quality of the borrower as defined by Fair Isaac Credit Organization (FICO) scores, as well as other factors, such as loan-to-value ratios and type of real estate.

As of December 31, 2011, all of the Company's exposure to investments containing sub-prime collateral is isolated to the mortgage-backed and asset-backed securities. When making investments in mortgage-backed or asset-backed securities, the Company evaluates the quality of the underlying collateral, the structure of the transaction (which dictates how losses in the underlying collateral will be distributed) and prepayment risks.

As of December 31, 2011, the Company has no exposure to investments containing sub-prime collateral in any asset categorization.

NOTES TO FINANCIAL STATEMENTS

Note 22 - Events Subsequent

30.2 Preferred stocks			
30.3 Totals	558,719	585,448	26,729

- 30.4 Describe the sources or methods utilized in determining the fair values:
For fixed maturity and marketable equity securities for which market quotations generally are available, Nationwide generally uses independent pricing services to assist in determining the fair value measurement. For certain fixed maturity securities not priced by independent services (generally private placement securities without quoted market prices), an internally developed pricing model or "corporate pricing matrix" is most often used. The corporate pricing matrix is developed by obtaining private spreads versus the U.S. Treasury yield for corporate securities with varying weighted average lives and bond ratings. The weighted average life and bond rating of a particular fixed maturity security to be priced using the corporate matrix are important inputs into the model and are used to determine a corresponding spread that is added to the U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular fixed maturity security. Nationwide also utilized broker quotes to assist in pricing securities or to validate modeled prices.
- 31.1 Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D? Yes [X] No []
- 31.2 If the answer to 31.1 is yes, does the reporting entity have a copy of the broker's or custodian's pricing policy (hard copy or electronic copy) for all brokers or custodians used as a pricing source? Yes [] No [X]
- 31.3 If the answer to 31.2 is no, describe the reporting entity's process for determining a reliable pricing source for purposes of disclosure of fair value for Schedule D:
Nationwide relies on broker valuations only when an approved third party vendor evaluation is not available. Any exceptions are approved by Risk Management and the Middle Office and reviewed by the Investments Pricing Committee. The brokers used to value securities are deemed to be main market makers for each individual security and therefore have in depth knowledge of the particular issue.
- 32.1 Have all the filing requirements of the Purposes and Procedures Manual of the NAIC Securities Valuation Office been followed? Yes [X] No []
- 32.2 If no, list exceptions:

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
The Company's net exposure, if any, ultimately is 100% ceded to the Nationwide Mutual Insurance Company Pool under a quota share reinsurance agreement. No retained exposure.

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
The Company's net exposure, if any, ultimately is 100% ceded to the Nationwide Mutual Insurance Company Pool under a quota share reinsurance agreement. The Company's property exposures are aggregated with the other Nationwide companies and modeled using Applied Insurance Research (AIR) CLASIC/2.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The Company's net property-catastrophe exposures, if any, are mitigated through managed coastal growth, purchase of excess of loss reinsurance, policy provisions such as higher deductibles, and enforcement of underwriting guidelines related to building construction, etc.

6.4

Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?

Yes [X] No []

6.5

If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to uninsured catastrophic loss.
.....

7.1

Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss ratio cap, an aggregate limit or any similar provisions)?.....

Yes [] No [X]

7.2

If yes, indicate the number of reinsurance contracts containing such provisions:

7.3

If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)?.....

Yes [] No []

8.1

Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured?

Yes [] No [X]

8.2

If yes, give full information
.....

9.1

Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:
(a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;
(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;
(c) Aggregate stop loss reinsurance coverage;
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity.

Yes [] No [X]

9.2

Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:
(a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or
(b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract.

Yes [] No [X]

9.3

If yes to 9.1 or 9.2, please provide the following information in the Reinsurance Summary Supplemental Filing for General Interrogatory 9:
(a) The aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income;
(b) A summary of the reinsurance contract terms and indicate whether it applies to the contracts meeting the criteria in 9.1 or 9.2; and
(c) A brief discussion of management's principle objectives in entering into the reinsurance contract including the economic purpose to be achieved.

9.4

Except for transactions meeting the requirements of paragraph 32 of SSAP No. 62R, Property and Casualty Reinsurance, has the reporting entity ceded any risk under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either:
(a) Accounted for that contract as reinsurance (either prospective or retroactive) under statutory accounting principles ("SAP") and as a deposit under generally accepted accounting principles ("GAAP"); or
(b) Accounted for that contract as reinsurance under GAAP and as a deposit under SAP?

Yes [] No [X]

9.5

If yes to 9.4, explain in the Reinsurance Summary Supplemental Filing for General Interrogatory 9 (Section D) why the contract(s) is treated differently for GAAP and SAP.

9.6

The reporting entity is exempt from the Reinsurance Attestation Supplement under one or more of the following criteria:
(a) The entity does not utilize reinsurance; or,
(b) The entity only engages in a 100% quota share contract with an affiliate and the affiliated or lead company has filed an attestation supplement; or
(c) The entity has no external cessions and only participates in an intercompany pool and the affiliated or lead company has filed an attestation supplement.

Yes [] No [X]
Yes [] No [X]
Yes [] No [X]

10.

If the reporting entity has assumed risks from another entity, there should be charged on account of such reinsurances a reserve equal to that which the original entity would have been required to charge had it retained the risks. Has this been done?

Yes [] No [] N/A [X]

Explanation of basis of allocation of premiums by states, etc.
Premiums are allocated to those states where the insured risks are located: principle garage for automobile, physical address for homeowners, commercial multiple peril and other liability and main place of work for workers' compensation. Allocation of premiums for individual and group health insurance is based on the situs of the contract.
(a) Insert the number of L responses except for Canada and Other Alien.
