**NOTES TO FINANCIAL STATEMENTS**

## 1. Summary of Significant Accounting Policies

## A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Casualty Insurance Company (the "Company") were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("DOI").

The Ohio DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the Ohio DOI. No deviations from NAIC statutory accounting practices ("NAIC SAP") were used in preparing these statutory-basis financial statements.

## B. Use of Estimates

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense ("LAE") reserves and the Company's adjustment to realized losses for other-than-temporary impairment ("OTTI"), (see page 12, column 2, Exhibit of Capital Gains (Losses) and Note 1C).

## C. Accounting Policies

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company's exposure to credit risk.

Acquisition costs, such as agents' commissions, premium taxes, and other policy initiation costs, are charged to operations as incurred. Advertising costs are expensed as incurred.

Other income includes finance and service charges collected on premiums receivable and finance and service charges assumed under quota-share reinsurance agreements with four of the Company's non-pooled insurance company affiliates.

Certain assets designated as "nonadmitted assets", in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 4, Assets and Nonadmitted Assets, are reported on page 13, Exhibit of Nonadmitted Assets. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, capital and surplus section.

In addition, the Company uses the following accounting policies:

## Investments

- Cash and cash equivalents include bank accounts and certificates of deposit as well as short-term investments with original maturities of three months or less that are reported at amortized cost which approximates market value.
- Short-term investments include securities acquired within one year of maturity except for those with original maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost which approximates market value.
- Investment grade bond valuations are based on NAIC designations or NAIC Acceptable Rating Organization ("ARO") designations and are reported at amortized cost using the scientific method which closely approximates the effective interest method. Non-investment grade bond valuations are also based on NAIC designations or NAIC ARO designations and are reported at the lower of amortized cost or fair market value. Loan-backed and structured securities follow the guidance prescribed by SSAP 43R, Loan-backed and Structured Securities ("SSAP 43R"), for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.
- Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market values based on active market closing quotations from a regulated exchange. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.
- Non-redeemable preferred stocks are reported at fair market values. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Investment grade redeemable preferred stocks are reported at amortized cost, while non-investment grade redeemable preferred stocks are reported at the lower of amortized cost or fair market value. The difference between the original cost and redemption value of the redeemable preferred securities is recognized using the scientific method, which closely approximates the effective interest method, over the lives of the respective issues and included in net investment gain.
- The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. In very rare cases, if none of the aforementioned primary sources are available, matrix pricing using the reporting entity's own market based assumptions may be utilized. The approved methods for computation of fair market value are prescribed in Part Five of the Securities Valuation Office *Purposes and Procedures Manual*.
- The Company has no investments in mortgage loans.
- Loan-backed and structured securities are accounted for as prescribed by SSAP 43R. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends.
- The Company owns 100% of the common stock of Progressive Specialty Insurance Company ("Specialty"), an insurance affiliate domiciled in Ohio, Progressive Gulf Insurance Company ("Gulf"), an insurance affiliate domiciled in Ohio, and PC Investment Company, a non-insurance affiliate. These investments are reported on the equity basis as described in the *Purposes and Procedures Manual of the Securities Valuation Office* of the NAIC.
- The Company has no material investments in joint ventures or limited liability companies. Investments in limited partnerships (see Note 6) are derived by using the Generally Accepted Accounting Principles equity method of accounting.
- The Company has no investments in derivatives.
- The Company may enter into repurchase agreements in which it borrows cash by providing certain underlying securities as collateral for the arrangement. The cash borrowed is invested in cash equivalents and an offsetting liability is established. The cash equivalent investment maturities and the term of the borrowing arrangement on the collateralized securities match, eliminating duration risk exposure to the Company. The Company did not participate in any repurchase agreements during 2011.

**NOTES TO FINANCIAL STATEMENTS**

- The Company may enter into reverse repurchase commitment transactions. In these transactions, the Company loans cash to an accredited bank and receives U.S. Treasury Notes pledged as general collateral against the cash borrowed. The Company chooses to enter into these transactions as rates on general collateral are more attractive than other short-term rates available in the market. The Company's exposure to credit risk is limited, as these internally managed transactions are typically overnight arrangements. The income generated on these transactions is calculated at the then applicable general collateral rates on the value of U.S. Treasury securities received. The Company has counterparty exposure on reverse repurchase agreements in the event of a counterparty default to the extent the general collateral security's value is below the cash which was delivered to acquire the collateral. The short-term duration of the transactions (primarily overnight investing) reduces that default exposure.
- Realized gains and losses on sales of securities are computed based on the first-in, first-out method.
- The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for OTTI requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP 43R). This evaluation reflects management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

When persuasive evidence exists that causes management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

#### Real Estate, Electronic Data Processing Equipment, and Furniture and Fixtures

- Company occupied real estate is reported at book/adjusted carrying value, less any related encumbrances. The Company does not own any property held for the production of income. For property held for sale (see Schedule A, Part 1), the Company reports at the lower of book/adjusted carrying value or fair market value, less any related encumbrances. For properties intended for a unique, highly specialized purpose, such as the Company's data centers and service centers, the Company reports book/adjusted carrying value, less any related encumbrances.

The Company engages the services of independent appraisers who issue summary reports indicating the properties' fair market value. The appraisals are completed using all three traditional methods of valuation: cost approach, sales comparison approach, and income approach. For properties intended for a unique, highly specialized purpose, such as the Company's data centers and service centers, the Company uses book/adjusted carrying value to report fair market value.

All real estate except land is depreciated over its estimated useful life using the straight-line method.

- Electronic data processing equipment and furniture and fixtures are reported at depreciated cost and are depreciated over the estimated useful lives of the assets using accelerated methods for computers and the straight-line method for furniture and fixtures. The resulting net book value of furniture and fixtures is nonadmitted. Application software is capitalized and depreciated over its estimated useful life, and the resulting net book value is nonadmitted.

#### Loss and Loss Adjustment Expense Reserves

- Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company conducts extensive reviews each month on portions of its business to help ensure that the Company is meeting its objective of always having reserves that are adequate with minimal variation. Results would differ if different assumptions were made (see Notes 25 and 33).

#### Capitalization of Assets

- Prepaid assets above a \$100,000 threshold are capitalized. Under certain circumstances, the Company may decide to establish a prepaid expense for amounts less than the threshold. Prepaid assets are nonadmitted.

**NOTES TO FINANCIAL STATEMENTS****D. Loan-Backed Securities**

Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.

As of December 31, 2011, the Company did not intend to sell the loan-backed or structured debt securities on which a credit loss was recognized, and determined that it is more likely than not that the Company will not be required to sell the securities prior to the recovery (which could be maturity) of their respective cost basis.

The following table shows, as of December 31, 2011, the Company's other-than-temporary impairment for loan-backed and structured debt securities since the adoption of SSAP No. 43R.

As of December 31, 2011, the Company had \$4,781,470 of gross unrealized losses in the Company's loan-backed and structured debt securities. The Company currently does not intend to sell the loan-backed and structured debt securities and determined that it is more likely than not that the Company will not be required to sell these securities for the period of time necessary to recover their cost basis. If the Company's strategy was to change and these securities were determined to be other-than-temporarily impaired, the Company would recognize a write-down in accordance with the Company's stated policy.

The following table shows, as of December 31, 2011, the composition of fair value and gross unrealized losses on loan-backed and structured debt securities by the length of time that individual securities have been in a continuous unrealized loss position:

Fair Market Value	Unrealized Loss	Losses less than 12 Months	Losses greater than 12 months	Fair Market Value of losses less than 12 months	Fair Market Value of losses greater than 12 months

**F. Real Estate****1. Impairment Losses**

The Company recognized impairment write-downs for its investments in real estate during the statement period. The amount of impairment recognized of \$4,493,963 (see Schedule A, Part 1, Column 12) is reflected in realized capital gains (losses) in the Company's Statement of Income. The impairment losses primarily reflect the write-down to fair value of land purchased for planned claims service centers.

**2. Sales of Real Estate**

At December 31, 2011, the Company has various property holdings classified as "Property Held for Sale" that are measured at the lower of their book value or fair value. The properties are presently being marketed.

Beginning January 1, 2009, TPC sponsors a defined contribution pension plan ("401(k) plan") which covers all United States employees who are 18 years or older and have been employed by TPC for at least 30 days. Under this plan, TPC will match up to a maximum of 6% of an employee's eligible compensation contributed to the plan. TPC provides various postemployment benefits to former or inactive employees who meet eligibility requirements, and to their beneficiaries and covered dependents. Postemployment benefits include salary continuation and disability-related benefits, including workers' compensation, and, if elected, continuation of health-care benefits for specified limited periods.

TPC provides postretirement health and life insurance benefits to all employees who met requirements as to age and length of service at December 31, 1988. The Company is subject to state guaranty fund and other assessments by the states in which it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2011 and 2010, the Company's estimated liability for state guaranty fund and other assessments was \$2,229,362 and \$1,874,341, respectively. **E. All Other Contingencies**

The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in various management agreements and a 100% pooling reinsurance agreement for which it is allocated litigation expenses (see Note 26).

The following is a discussion of potentially significant pending cases at December 31, 2011. Unless specifically noted, the Company does not consider a loss from these cases to be probable and is unable to estimate a range of loss, if any, at this time.

As of December 31, 2011, there was one putative class action lawsuit and one certified class action lawsuit challenging the Company's use of certain automated database vendors or software to assist in the adjustment of bodily injury claims. Plaintiffs allege that these databases or software systematically undervalue the claims.

As of December 31, 2011, there was a putative class action lawsuit challenging that the Company over-charged municipal tax to policyholders. An agreement to settle was reached in 2009 and a loss reserve was established accordingly. As of December 31, 2011, the settlement is still being administered.

As of December 31, 2011, the Company was defending two putative statewide class action lawsuits alleging that the Company improperly steers automobile repair work to certain auto body repair shops and challenging the labor rates the Company pays to auto body repair shops.

**15. Leases****A. Lessee Leasing Arrangements**

The Company is allocated a percentage of the Group's total rental expense based on the 100% pooling reinsurance agreement (see Note 26). In 2011 and 2010, the Company was allocated \$18,694,912 and \$23,015,640, respectively, of rental expense. Future minimum rental payments on leases held by the Company are as follows:

During 2011, the Company incurred \$854,631 in fees as a result of the early termination of various property leases associated with claims handling. This expense was reported on Page 4, Line 3, Loss adjustment expenses incurred, on the Company's financial statements. No liability was recorded as a result of the early terminations.

As the deferred gain is amortized, the liability is reduced. At December 31, 2011, the liability remaining is \$1,059,310.

The Company maintains an agreement with American Bankers Association Insurance Services, Inc. ("ABAIS"), a managing general agent, to provide underwriting and loss adjustment services for professional liability insurance written by the Company including Directors and Officers Liability, financial institution bonds, and certain other insurance products for the financial services industry. Direct written premiums of \$6,369,570 and \$27,218,846 produced by ABAIS in 2011 and 2010, respectively, are less than 5% of policyholders' surplus.

**20. Fair Value Measurements****A. Inputs Used for Assets and Liabilities Measured at Fair Value****1. Fair Value Measurements by Levels 1, 2 and 3**

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., active exchange-traded equity securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

The Company evaluated whether the market was distressed or inactive in determining the fair value for those securities reported and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, the Company concluded that there was sufficient activity in determining the fair value for those securities reported.

The valuations classified as either Level 1 or Level 2 in the table below are priced exclusively by external sources, including: pricing vendors, dealers/market makers, and exchange-quoted prices. The Company did not have any transfers between Level 1 and Level 2.

Fair Value Measurements at December 31, 2011:

Asset Description	Level 1	Level 2	Level 3	Total
Bonds – Industrial & Miscellaneous	\$ --	\$ 4,775,474	\$ --	\$ 4,775,474
Common Stock – Industrial & Miscellaneous	595,116,186	--	10,198,750	605,314,936
<b>Total</b>	<b>\$ 595,116,186</b>	<b>\$ 4,775,474</b>	<b>\$ 10,198,750</b>	<b>\$ 610,090,410</b>

**NOTES TO FINANCIAL STATEMENTS**

## 2. Rollforward of Level 3 Items

Asset Description	Balance at Jan. 1, 2011	Transfers into level 3	Transfers out of level 3	Total Realized Gains (Losses) included in Net Income	Total Unrealized Gains (Losses) included in Surplus	Purchases, Issuances, Sales and Settlements	Balance at Dec. 31, 2011
Common Stock – Industrial & Miscellaneous	\$ 10,198,750	\$ --	\$ --	\$ --	\$ --	\$ --	\$ 10,198,750

With limited exceptions, the Company's Level 3 securities are also priced externally; however, due to several factors (e.g., nature of the securities, level of activity, lack of similar securities trading to obtain observable market level inputs), these valuations are more subjective in nature. Certain private equity investments and fixed-income investments included in the Level 3 category are valued using external pricing supplemented by internal review and analysis.

As of December 31, 2011, the Company owned one privately held equity investment in The Plymouth Rock Company. The Company has valued its shares at the most recent open market trade price. Although an independent valuation is received each year at a significant premium to our current fair value, the Company considers this conservative fair value to be more representative, taking into account illiquidity and other factors.

## 3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

As of December 31, 2011, the Company had on deposit \$42,538,530 (fair market value) of U.S. Treasury Notes in the trust account and \$6,670,962 in a money market fund to cover any market price fluctuations on the Treasury Notes, which combined, were adequate to meet the minimum trust balance requirement of \$48,722,200.

3. The Company did not recognize any impairment write-downs for its state tax credits during the statement period.

**G. Sub-Prime Mortgage Related Risk Exposure****1. Exposure to Sub-Prime Mortgage Related Risk**

The following sub-prime disclosure and the review and procedures described within are completed at a consolidated level for all the Progressive companies. To the extent the Company had any direct sub-prime exposure, those securities would be listed in Note 21.G.3.

Management's review of the investment portfolio for securities with direct sub-prime exposure, such as Alt-A residential mortgage loan-backed bonds and home equity loan-backed bonds is performed in conjunction with the OTTI analysis and procedures (see Note 1C). Additionally, securities that were determined to have an indirect sub-prime exposure were also reviewed as part of the OTTI process.

The Company's management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the sub-prime mortgage loan disruption, as well as broader credit and financial market events.

For the Company's investment in Specialty, Gulf, and PC Investment Company (see Note 1C), management's review uncovered no issues related to their exposure to sub-prime risk or that required recognition of losses that would have a significant effect on the financial strength and surplus of the Company.

## 25. Changes in Incurred Losses and Loss Adjustment Expenses

Incurred losses and LAE attributable to insured events of prior years decreased by \$28,715,000 in 2011, which is 1.7% of the total prior year net unpaid losses and LAE of \$1,666,662,000. The net decrease is the result of favorable loss and defense and cost containment ("DCC") reserve development of \$28,575,000 and adjusting and other expense reserves of \$140,000. The majority of the favorable development is primarily attributable to accident years 2010 and 2008 and prior for private passenger auto liability and commercial auto liability business. Originally anticipated severity for accident year 2010 decreased by 0.1% and 0.5% for private passenger auto liability and auto physical damage, respectively.

## 26. Intercompany Pooling Arrangements

The Company participates in a pooling reinsurance agreement with the property-casualty affiliates listed below (the "Agency Pool") under which 100% of the underwriting business of each member company, net of external reinsurance, is ceded to the Company, the Agency Pool manager and an Agency Pool participant. The combined premiums, losses, and expenses are then retroceded to each Agency Pool member based on pre-determined pooling percentages.

Progressive Hawaii Insurance Corp. ("Hawaii"), an insurance affiliate domiciled in Ohio and National Continental Insurance Company ("National Continental"), an insurance affiliate domiciled in New York, terminated their future participation in the Agency Pool effective November 5, 2005 and January 1, 1996, respectively. Hawaii and National Continental have zero percent retrocession participation in the Agency Pool for all policies written prior to the dates listed above.

**NOTES TO FINANCIAL STATEMENTS**

The pooling percentages for each Agency Pool participant as of December 31, 2011 and 2010 were as follows:

	NAIC Code	2011 Pool %	2010 Pool %

The Company does not participate in any intercompany sharing of the provision for reinsurance and the write-off of uncollectible reinsurance.

At December 31, 2011, amounts recoverable from and payable to the Company and all affiliates participating in the Agency Pool are as follows:

## 33. Asbestos and Environmental Reserves

Because the Company is primarily an insurer of motor vehicles, it has limited exposure for asbestos and environmental claims. In accordance with disclosure requirements, the amounts reported for direct, assumed, and net below reflect the Company's pooled share (see Note 26) of the Agency Pool's exposure to asbestos and environmental claims. The Agency Pool's exposure arises from the Company's participation in various reinsurance pools from 1968 to 1975, which underwrote general liability insurance, the Company's aggregate stop loss reinsurance agreement with Max for various reinsurance pools from 1965 to 1975, and Progressive American Insurance Company's, an insurance affiliate domiciled in Ohio and Agency Pool member, exposure from a limited number of general liability policies issued from 1972 to 1975.

The Company records case and DCC reserves based on financial information received from the various external reinsurance pool managers. IBNR reserves are established based on previous experience.

WORKERS' COMPENSATION RISKS WERE COVERED UNDER TREATY REINSURANCE CONTRACTS.

6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:  
THE COMPANY'S PROBABLE MAXIMUM LOSS (PML) IS ESTIMATED BY ANALYZING HISTORICAL MAJOR OCCURRENCES AND ESTIMATING FREQUENCY OF LOSS AND SEVERITY BASED ON THE POTENTIAL FORCE OF AN OCCURRENCE AND THE TOTAL NUMBER OF AUTOS AND BOATS EXPOSED. THE ESTIMATE OF THE PML WAS COMPLETED BY PROGRESSIVE EMPLOYEES. THE COMPANY'S NET COMPREHENSIVE EXPOSURE IN THE CATASTROPHE PRONE STATES OF FLORIDA, LOUISIANA, TEXAS, MISSISSIPPI, ALABAMA AND CALIFORNIA IS LIMITED SINCE THE COMPANY IS A MEMBER OF A 100% POOLING REINSURANCE ARRANGEMENT WITH 11 OF ITS PROPERTY AND CASUALTY AFFILIATES.

6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?  
THE PRIMARY PROPERTY COVERAGE SOLD BY THE COMPANY IS COMPREHENSIVE FOR AUTOMOBILE AND INLAND MARINE FOR BOATS. SINCE THE COMPANY'S ESTIMATED PML IS APPROXIMATELY 7% OF THE SURPLUS, THE COMPANY CARRIES NO EXTERNAL CATASTROPHE REINSURANCE TO COVER ITS LIMITED CATASTROPHE EXPOSURE. THE COMPANY PARTICIPATES IN A POOLING ARRANGEMENT WHICH SPREADS THE UNDERWRITING RISK INCLUDING THE CATASTROPHE EXPOSURE AMONG ALL PARTIES TO THE POOLING AGREEMENT.
