NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Lightning Rod Mutual Insurance Company are presented on the basis of accounting principles prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the state of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the company uses the following accounting policies:

- (1) Short-term investments are stated at cost.
- (2) Bonds not backed by other loans are stated at amortized cost using the interest method; U.S. Treasury Inflation-Indexed bonds are stated at amortized cost adjusted for unrealized inflation factor gains.
- (3) Common stocks are stated at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.
- (4) Preferred stocks are stated in accordance with the guidance provided in SSAP No. 32.
- (5) The Company has no mortgage loans.
- (6) The Company has no loan-backed securities.
- (7) The Company carries investments in subsidiaries, Forward Agencies, Inc. and Western Reserve Financial Corporation, at statutory equity as reported on Schedule D; these assets are reported as nonadmitted on page 2, column 2.
- (8) The Company has minor ownership interests in partnerships. The Company carries these interests based on underlying unaudited GAAP equity of the investee.
- (9) The Company has no derivative instrument investments.
- (10) The Company does not utilize anticipated investment income in the premium deficiency calculation.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior period.

NOTES TO FINANCIAL STATEMENTS

2. Accounting Changes and Corrections of Errors

Accounting changes adopted to conform to the provisions of the NAIC Accounting Practices and Procedures Manual are reported as changes in accounting principles. The cumulative effect of the changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all periods.

The Company has not made any accounting changes or error corrections for the periods ending December 31, 2011 and 2010, respectively.

20. Fair Value Measurements
 - A. The company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by FASB ASC 820 (SFAS No. 157), Fair Value Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:
 - Level 1:
Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.
 - Level 2:
Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.
 - Level 3:
Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

Other Invested assets – The Company's investment in two subsidiaries are measured and reported at fair value as of December 31, 2011 for each respective entity totaling \$5.1 million in aggregate. D. At December 31, 2011 and 2010 the Company had admitted assets of \$15.9 million and \$14.3 million, respectively in uncollected premiums. 25. Changes in Incurred Losses and Loss Adjustment Expense

Reserves as of December 31, 2010 were \$30.0 million. As of December 31, 2011, \$14.6 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$12.8 million as a result of decreases in estimates of unpaid claims and claim adjustment expenses for commercial auto liability, auto physical damage, homeowners/farmowners, commercial multi-peril, other liability, workers compensation and special property lines of insurance. These decreases were offset, in part, by increases in private passenger auto liability lines of insurance. Therefore, there has been a \$2.6 million favorable prior-year development from December 31, 2010 to December 31, 2011. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the company does not write this type of policy.
