NOTES TO FINANCIAL STATEMENTS**1.) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES****A. Accounting Practices**

The financial statements of Transport Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Investments – Invested asset values are generally stated as follows:

Bonds, including issuer obligations, mortgage-backed securities and asset-backed securities rated 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or market. For mortgage-backed and asset-backed securities, dealer modeled prepayment assumptions are used at the date of purchase to determine effective yields; significant changes in estimated cash flows from the original purchase assumptions are accounted for on a prospective basis.

Common stocks are stated at market except investment in subsidiaries.

Investments in non-insurance subsidiaries are stated at NAIC specific values.

Short-term investments are stated at cost.

Unpaid Losses and Loss Adjustment Expense Reserves - The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses and development on reported losses based on past experience; and (d) estimates based on experience of expenses for investigating and adjusting claims. The total of these factors is reduced for portions ceded to other reinsurers. All such estimates are based on the current state of the law and coverage litigation, which could change substantially by the time claims are settled. These liabilities are subject to the impact of changes in claim amounts and frequency and other factors. In spite of the variability inherent in such estimates, management believes that the liabilities for unpaid losses and loss adjustment expenses are adequate. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the statement of income in the period in which determined.

Premium Deficiency Reserve – The Company uses anticipated investment income as a factor in premium deficiency calculations.

Premium Recognition – Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

The application of SSAP NO. 10R, Income Taxes - Revised, A Temporary Replacement of SSAP No. 10, requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance, the company considers many factors, including (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior year carry back years as well as projected taxable earnings exclusive of reversing temporary differences and carry forwards; (5) the length of time that the carry forwards can be utilized; (6) unique tax rules that would impact the utilization of the deferred tax assets; and (7) any tax planning strategies that the company would employ to avoid a tax benefit from expiring unused although realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized. The Company has not recorded a valuation allowance as of December 31, 2011
