NOTES TO FINANCIAL STATEMENTS

For purposes of the quarterly interim financial information, it is presented that the users of the interim financial information have read or have access to the Annual Statement as of December 31, 2011. This presentation addresses only significant events occurring since the last Annual Statement.

1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of Community Insurance Company (the “Company”) have been prepared in conformity with the National Association of Insurance Commissioners’ (“NAIC”) *Annual Statement Instructions* and in accordance with accounting practices prescribed by NAIC *Accounting Practices and Procedures Manual* (“NAIC SAP”), subject to any deviations prescribed or permitted by the Ohio Insurance Department (the “Department”).

For the three months ended March 31, 2012 and the year ended December 31, 2011, there were no differences between the Company’s statutory basis capital and surplus or net income under NAIC SAP and practices prescribed or permitted by the Department.

B. – C.

No significant change.

2. Accounting Changes and Corrections of Errors

The NAIC adopted SSAP No. 101, *Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10*, in the fourth quarter of 2011 with an effective date of January 1, 2012. The revised standard contains changes to accounting for current and deferred federal and foreign income taxes. One of the changes impacting the Company is that the increased reversal period assumptions and surplus limitations are no longer elective. If the Company qualifies for the increased benefits due to sufficient risk-based capital levels then they are mandatory. The Company had not previously elected the increased benefits available under SSAP No. 10R and does qualify for the increased benefits. The most significant impact for the Company is the use of increased reversal period assumptions. The cumulative impact on surplus of the adoption of this pronouncement is \$24,043,607. The impact is reported in the 2012 statements as an increase to surplus on page 5, line 43.

There were no corrections of errors during the quarter ending March 31, 2012.

20. Fair Value Measurements

A.-B.

1. Fair value measurement at reporting date:

	(\$ in thousands)			
	Level I	Level II	Level III	Total
Bonds				
Industrial and miscellaneous	\$ -	\$ 55,574	\$ -	\$ 55,574
Total bonds	-	55,574	-	55,574
Common stock				
Industrial and miscellaneous	240,396	-	6,379	246,775
Total common stock	240,396	-	6,379	246,775
Total assets at fair value	\$ 240,396	\$ 55,574	\$ 6,379	\$ 302,349

2. Assets measured at fair value using significant unobservable inputs (Level III):

	(\$ in thousands)							
	Balance at 1/1/2012	Transfers in Level III	Transfers out Level III	Securities no longer carried at FV (a)	Total gains (losses) included in Net Inc	Total gains (losses) included in Surplus	Purchases, issuances, sales and settlements	Balance at 3/31/2012
Bonds								
Industrial and miscellaneous	\$ 758	\$ -	\$ -	\$ (758)	\$ -	\$ -	\$ -	\$ -
Common stock								
Industrial and miscellaneous	6,379							6,379
Total	\$ 7,137	\$ -	\$ -	\$ (758)	\$ -	\$ -	\$ -	\$ 6,379

These transfers into Level III represent non-investment grade bonds that were not previously reported at fair value. The fair value of these securities is now below the amortized cost and thus they are now carried at fair value. The Company's policy is to recognize transfers between Levels, if any, as of the beginning of the reporting period.

3. Fair values of fixed maturity securities are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level I or Level II inputs, for the determination of fair value to facilitate fair value measurements and disclosures. United States government securities represent Level I securities, while Level II securities primarily include corporate securities, securities from states, municipalities and political subdivisions and residential mortgage-backed securities. For securities not actively traded, the third party pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

Fair values of equity securities are generally designated as Level I and are based on quoted market prices. For certain equity securities, quoted market prices for the identical security are not always available and the fair value is estimated by reference to similar securities for which quoted prices are available. These securities are designated Level II.

There have been no significant changes in the valuation techniques during the current period.
