Notes to Financial Statement

1. SIGNIFICANT ACCOUNTING POLICIES

- A. American Family Insurance Company (the Company) prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the Office of the Commissioner of Insurance of the State of Ohio (OCI). Prescribed statutory accounting practices include the National Association of Insurance Commissioners' (NAIC) "Accounting Practices and Procedures Manual", version effective March 1, 2012, as well as state laws, regulations, and general administrative rules applicable to all insurance enterprises domiciled in a particular state. In addition, the OCI has a right to permit other specific practices that may deviate from prescribed practices. No permitted differences in statutory accounting practices between the OCI and the NAIC are used in the preparation of these statutory financial statements
- B. The preparation of financial statements in conformity with the Annual Statement Instructions and Accounting Practices and Procedures manual requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.
- C. Premiums, reserves and expenses are accounted for in accordance with the NAIC Accounting Practices and Procedures manual, subject to deviations prescribed or permitted by the State of Ohio as described above.

In addition, the Company uses the following accounting policies:

- (1) Investments in short-term bonds rated "1" (highest quality), or "2" (high quality) by the Securities Valuation Office ("SVO") of the NAIC are reported in the financial statements at amortized cost. Bonds rated "3" (medium quality), "4" (low quality), "5" (lower quality), or "6" (lowest quality) by the SVO are reported at the lower of amortized cost or fair value. The interest method is used to amortize any purchase premium or discount, including estimates of future prepayments obtained from independent sources. Money Market Mutual Funds are recorded at amortized cost, which approximates fair market value.
- (2) Investments in bonds rated "1" (highest quality), or "2" (high quality) by the Securities Valuation Office ("SVO") of the NAIC are reported in the financial statements at amortized cost. Bonds rated "3" (medium quality), "4" (low quality), "5" (lower quality), or "6" (lowest quality) by the SVO are reported at the lower of amortized cost or fair value. Investments in commercial mortgage backed securities (CMBS) and non-agency residential mortgage backed securities (RMBS) utilize a two step process to obtain a valuation and rating in accordance with SSAP 43R, *Loan Backed and Structured Securities*. The first step derives a rating for valuation by comparing the current amortized cost to the modeled range of values assigned to the six NAIC designations for each security. This determines whether the securities are stated at the lower of amortized cost or fair value per the above rules. The second step utilizes the same modeled range of values to derive a rating for reporting using the current carrying value as determined in the first step.

Ratings and valuations for investments in asset backed securities that are otherwise rated by an accredited ratings organization (ARO) or the SVO are calculated using a two step process. The first step derives a rating for valuation based on the ARO or SVO rating and the NAIC model valuation table. The second step utilizes the model valuation table to derive a rating for reporting using the current carrying value as determined in the first step. Securities whose initial rating is NAIC 1 or NAIC 6 in step one are not further modified by step two. The interest method is used to amortize any purchase premium or discount, including estimates of future prepayments obtained from independent sources.

- (3) The Company holds no common stocks.
- (4) The Company holds no preferred stocks.
- (5) The Company holds no mortgage loans.
- (6) The Company holds no loan-backed securities.
- (7) Investments in subsidiary, controlled and affiliated companies are stated as follows: The Company is wholly owned by AMFAM Inc., a holding company, which is wholly owned by American Family Mutual Insurance Company (AFMIC).
- (8) The Company has no investments in joint ventures, partnerships and limited liability.
- (9) The Company holds no derivatives.
- (10) The Company does anticipate investment income as a factor in premium deficiency calculations.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy during the current reporting period.
- (13) The Company does not have pharmaceutical rebate receivables.

A. Valuation, Techniques, and Inputs

1. The following summarizes the Company's financial assets measured and reported at fair value as of March 31.

	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of March 31, 2012
Short-term Investments,	\$ 479,351	\$ 0	\$ 0	\$ 479,351
Total Fair Value Financial Assets	\$ 479,351	\$ 0	\$ 0	\$ 479,351

There were no material transfers between Levels 1 and 2 as of March 31.

2. The Company held no Level 3 assets as of March 31.
3. There were no material transfers into or out of Level 3 as of March 31.
4. The Financial assets and financial liabilities recorded on the Balance Sheet at fair value are categorized based on the reliability of inputs to the valuation techniques as follows:

Level 1 Financial assets and financial liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2 Financial assets and financial liabilities whose values are based on the following:

Quoted prices for similar assets or liabilities in active markets;

Quoted prices for identical or similar assets or liabilities in non-active markets; or

Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3 Financial assets and financial liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs may reflect the Company's estimates of the assumptions that market participants would use in valuing the financial assets and financial liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. In many instances, inputs used to measure fair value fall into different levels of the fair value hierarchy. In those instances, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is categorized is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Notes to Financial Statement

The fair value guidance establishes a hierarchy for inputs used in determining fair value that maximize the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

Fair value is a market-based measure considered from the perspective of a market participant who owns an asset or owes a liability. Accordingly, when market observable data is not readily available, the Company's own assumptions are set to reflect those that market participants would be presumed to use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or from Level 2 to Level 3.

When available, the Company uses the market approach to estimate the fair value of its financial instruments, which is based on quoted prices in active markets that are readily and regularly available. Generally, these are the most liquid of the Company's holdings and valuation of these securities does not involve management judgment. Matrix pricing and other similar techniques are other examples of the market approach.

When quoted prices in active markets are not available, the Company uses the income approach, or a combination of the market and income approaches, to estimate the fair value of its financial instruments. The income approach involves using discounted cash flow and other standard valuation methodologies. The inputs in applying these market standard valuation methodologies include, but are not limited to interest rates, benchmark yields, bid/ask spreads, dealer quotes, liquidity, term to maturity, estimated future cash flows, credit risk and default projections, collateral performance, deal and tranche attributes, and general market data.

The following valuation techniques and inputs were used to estimate the fair value of each class of significant financial instruments:

Level 1 Measurements

Short-term Investments: Comprise actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.

The Company held no Level 2 or Level 3 fair value securities as of March 31, 2012.

C. Valuation, Methods, and Assumptions

5. The following summarizes the fair value of the Company's financial assets as of March 31.

	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)
Bonds	\$ 20,428,925	\$ 19,106,315	\$ 98,926	\$20,329,999	\$ 0
Short-term Investments	<u>479,351</u>	<u>479,351</u>	<u>479,351</u>	<u>0</u>	<u>0</u>
Total Financial Assets	\$ 20,908,276	\$ 19,585,666	\$ 578,277	\$20,329,999	\$ 0

6. The following valuation methods and assumptions were used to measure the fair values of each type of financial asset and financial liability:

Bonds: The fair value of Level 1 bonds, consisting of U.S. Treasury Notes, is determined using unadjusted quoted prices in an active market. Level 2 bonds are valued using leading, nationally recognized providers of market data and analytics to price the majority of fixed income securities using the market and income approaches. When available, recent trades of identical or similar assets are used to price these securities. However, because many fixed income securities do not actively trade on a daily basis, pricing models are often used to determine security prices. The pricing models discount future cash flows at estimated market interest rates. These rates are derived by calculating the appropriate spreads over comparable U.S. Treasury securities based on credit quality, industry, and structure of the asset. Observable inputs used by the models include benchmark yields, bid/ask spreads, dealer quotes, liquidity, term to maturity, credit risk and default projections, collateral performance, deal and tranche attributes, and general market data. Inputs may vary depending on type of security.

Short-term investments: Valuation methods and assumptions are discussed in Note 20.A.4.
