NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of General Star National Insurance Company (the "Company") have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners' ("NAIC") Annual Statement Instructions and Accounting Practices and Procedures Manual, version effective as of March 2012, except as otherwise prescribed or permitted by the laws of the State of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

No significant change.

C. Accounting Policy

No significant change.

Note 2 - Accounting Changes and Corrections of Errors

Effective January 1, 2012, the Corporation adopted the principles of *SSAP No. 101 Income Taxes, A Replacement of SSAP No. 10 and SSAP No. 10R ("SSAP 101")*. In applying the principles of SSAP 101 and in accordance with paragraph 5 of *SSAP No. 3 Accounting Changes and Corrections of Errors*, the cumulative effect of the pronouncement would have resulted in an increase to the Corporation's surplus at the beginning of the year, due to a decrease in non-admitted net deferred tax assets, of \$408,122 if the new accounting principle had been applied retroactively.

Note 3 - Business Combinations and Goodwill

No significant change.

Note 4 - Discontinued Operations

No significant change.

Note 5 - Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

None

B. Debt Restructuring

Not applicable.

C. Reverse Mortgages

None

D. Loan Backed Securities

(2) Prepayment assumptions for mortgage-backed securities, collateralized mortgage obligations and other structured securities were generated using a purchase prepayment model. The prepayment model uses a number of factors to estimate prepayment activity, including the time of year (seasonality), current levels or interest rates (refinancing incentive), economic activity (including housing turnover) and term and age of the underlying collateral.

(4) The Company has no loan backed securities with a recognized other-than-temporary impairment.

(5) None

(6) The Company had no loan backed securities with an impairment for which other-than-temporary impairment had not been recognized

(7) A review of investments is performed as of each financial statement date with respect to investments of an issuer where the market value is below the cost. If, in management's judgment, the decline in value is other-than-temporary, the cost of the investment is written down to fair value with a corresponding charge to earnings. Factors considered in determining whether impairment exists include the financial condition, business prospects and creditworthiness of the issuer; the length of time that the asset value had been less than cost; and the Company's ability and intent to hold such investments until the fair value recovers. If a decline in value is solely attributable to changes in market interest rates, rather than fundamental credit problems with the issuer, impairment is deemed other-than-temporary when the Company had the intent to sell an investment, at the reporting date, before recovery of cost of the investment.

Note 20 - Fair Value

A. Fair Value Measurements at Reporting Date

Included in the Company's investment portfolio are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain bonds with ratings below investment grade, which are carried at the lower of cost or market.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The fair value of a liability is the amount at which that liability could be incurred or settled in a current transaction between willing parties, that is, other than in a forced or liquidation sale.

Fair values are based either on values published by the NAIC's Security Valuation Office (SVO) or from an independent pricing service vendor. When market prices are not available a price may be obtained from a broker or fair value may be estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant when valuing increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, Fair Value Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1—Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2—Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3—Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

(1) Fair value measurements at March 31, 2012:

(3) Pricing sources are reviewed quarterly for determining transfers within the fair value hierarchy.

(4) Level 2 and 3 Valuation techniques and input used

Securities disclosed at fair value are determined based on NAIC valuation rules and typically consist of common and preferred equities, however, other securities may periodically be carried at fair value based on certain factors such as the NAIC’s lower of cost or market rules. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. When published prices from the SVO are not available, reliance is predominately on independent pricing service vendors that have been evaluated and approved by our pricing policy committee. Generally,pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a detailing the inputs, models and processes used in the vendor’s monitored periodically to ensure they are consistent with pricing policy procedures. Market Information obtained from brokers with respect to security valuations is also considered in the price hierarchy.

Note 25 - Change in Incurred Losses and Loss Adjustment Expenses

Reserves as of December 31, 2011 were \$74.9 million. For the year-to-date period ending March 31, 2012, \$2.8 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$68.1 million as a result of re-estimation of unpaid claims and claim adjustment expenses, principally in Other Liability lines of insurance. Therefore, there has been \$4.0 million year-to-date favorable development. The favorable development is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims.
