If the value of any investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination for each security, the following is considered:

- The length of time and the extent to which the fair value has been below cost;
- The financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations or earnings potential;
- Management's intent and ability to hold the security long enough for it to recover its value;

Management concluded that the remaining investments held with unrealized losses were not other-than-temporarily impaired on the basis that the Company had the ability and intent to hold the investments for a period of time sufficient for a forecasted market price recovery up to or beyond the cost of the investment. Also, in management's opinion, evidence indicating the cost of the investment was recoverable within a reasonable period of time outweighed evidence to the

25. Change in Incurred Losses and Loss Adjustment Expenses

Loss reserves as of December 31, 2011 were \$51.5 million. As March 31, 2012, \$9.2 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$31.1 million as a result of re-estimation of unpaid claims and claim adjustment expenses principally on homeowners, farmowners, and personal auto liability lines of insurance. Therefore, there has been a \$11.3 million favorable prior-year development from December 31, 2011 to March 31, 2012. The decrease is primarily the result of ongoing analysis of recent loss development trends. Original estimates are adjusted as additional information becomes known regarding individual claims. The Company does not have any retrospectively rated policies which would be included in the favorable development.
