NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. The accompanying financial statements of National Interstate Insurance Company (Company) have been prepared on the basis of accounting practices prescribed or permitted by the State of Ohio Department of Insurance. The Ohio Department of Insurance requires insurance companies domiciled in the state of Ohio to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting *Practices and Procedures Manual* subject to any deviations prescribed or permitted by the Ohio Department of Insurance. There are no deviations prescribed or permitted by the Ohio Department of Insurance utilized in the Company's financial statements.

Note 2 - Accounting Changes and Corrections of Errors

Effective January 1, 2012, the Company adopted Statement of Statutory Accounting Principles No. 101, Income Taxes, a replacement of SSAP No. 10R and SSAP No. 10 (SSAP 101). SSAP 101 amends the deferred tax asset admittance test set forth in SSAP 10R, by limiting the admissibility thresholds based on current period risk-based capital levels and modifying the disclosure requirements. The adoption of SSAP 101 did not have an impact on the Company's financial statements.

Note 5 - Investments

D. Loan-Backed Securities

1. The Company uses dealer-modeled prepayment assumptions for mortgage-backed and asset-backed securities at the date of purchase to determine effective yields; significant changes in estimated cash flows from the original purchase assumptions are accounted for on a prospective basis.
2. The Company does not have any loan-backed securities with an other-than-temporary impairment for which it has the intent to sell or the inability or lack of intent to retain the investment in the security.
3. The Company does not have any loan-backed securities with an other-than-temporary ("OTTI") impairment recognized in 2012.
4. The following table shows all loan-backed securities with an unrealized loss:

Less than 12 months		12 months or more	
Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
\$ 31,057,032	\$ (310,815)	\$ 7,724,869	\$ (1,916,813)

5. Based on cash flow projections received from external sources (which reflect loan to collateral values, subordination, vintage and geographic concentration), implied cash flows inherent in security ratings and analysis of historical payment data, management believes that the Company will recover its cost basis in all securities with unrealized losses at March 31, 2012. The Company has the intent to hold such securities until they recover in value or mature.

Note 20 - Fair Value

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Level 1, 2 and 3

Under fair value accounting, the Company must determine the appropriate level in the fair value hierarchy for each fair value measurement. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Fair values for our investment portfolio are reviewed by company personnel using data from nationally recognized pricing services as well as non-binding broker quotes.

NOTES TO FINANCIAL STATEMENTS

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices (unadjusted) in active markets for identical securities that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

Level 3 inputs are unobservable inputs for the asset or liability.

The following table provides information as of March 31, 2012 about the Company's investments measured at fair value.

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. The Company’s policy is to recognize transfers in and transfers out as of the end of the reporting period.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and values obtained from brokers and independent financial institutions are reviewed by company personnel who are familiar with the securities being priced and the markets in which they trade to ensure that the fair value determination is representative of an exit price, as defined by accounting standards.

Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and includes preferred stock, certain publicly traded unaffiliated common stocks, corporate obligations, and mortgage backed securities that are not actively traded. Level 3 consists of financial instruments that are not traded in an active market, whose fair value is estimated by management based on inputs from independent financial institutions, which include non-binding broker quotes, for which the Company believes reflects fair value, but are unable to verify inputs to the valuation methodology. The Company obtained one quote or price per instrument from our brokers and pricing services and did not adjust any quotes or prices that were obtained. Management reviews these broker quotes using information such as the market prices of similar investments. The Company primarily uses the market approach valuation technique for all investments.

Reserves as of December 31, 2011 were \$332,191,416. As of March 31, 2012, \$32,977,753 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$300,186,558 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$972,895 unfavorable prior year development since December 31, 2011 to March 31, 2012. The unfavorable development in 2012 resulted from the combination of settling cases and adjusting current estimates of open cases and incurred but not reported losses (IBNR) for amounts more than the case and IBNR estimates carried at the end of the prior year. Management of the Company evaluates case and IBNR estimates based on data from a variety of sources including the Company's historical experience, knowledge of various factors, and industry data extrapolated from other insurers writing similar lines of business.
