14. Contingencies

E. All Other Contingencies

The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in the 100% pooling reinsurance agreement for which it is allocated litigation expenses.

The following is a discussion of potentially significant pending cases at March 31, 2012. Unless specifically noted, the Company does not consider a loss from these cases to be probable and is unable to estimate a range of loss, if any, at this time.

As of March 31, 2012, there was a certified class action lawsuit pending against the Company alleging that the Company failed to offer certain enhanced personal injury protection benefits. An agreement to settle was reached in 2009 and a loss reserve was established accordingly. As of March 31, 2012, the settlement is still being administered.

As of March 31, 2012, there was a putative class action lawsuit alleging that the Company charged insureds for illusory underinsured and uninsured motorist coverage on multiple vehicle policies.

	No significant change
20.	Fair Value Measurements
A.	Inputs Used for Assets and Liabilities Measured at Fair Value
1.	Fair Value Measurements by Levels 1, 2 and 3
	The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows: Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., active exchange-traded equity securities). Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means. Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument. The Company evaluated whether the market was distressed or inactive in determining the fair value for those securities reported and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, the Company concluded that there was sufficient activity in determining the fair value for those securities reported. As of March 31, 2012, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

24.	Retrospectively Rated Contracts and Contracts Subject to Redetermination
	Not applicable
25.	Changes in Incurred Losses and Loss Adjustment Expenses
	Incurred losses and LAE attributable to insured events of prior accident years increased by \$366,000 in 2012, which is approximately 1.1% of the total prior year net unpaid losses and LAE of \$34,576,431. The increase is primarily due to an increase in originally anticipated severity of 1.2% and .2% for accident years 2011 and 2010, respectively, for private passenger auto liability incurred but not reported reserves. This increase was partially offset by a decrease in originally anticipated severity of .3% for accident year 2011 for auto physical damage.
