NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

- A. The accompanying financial statements of Fireman's Fund Insurance Company of Ohio ("the Company") have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners ("NAIC") and the State of Ohio.

Reconciliation of policyholders' surplus and net income between the amounts reported in the accompanying financial statements is as follows:

	Mar. 31, 2012	Dec. 31, 2011
Effect of permitted practice on statutory surplus		
Statutory surplus per statutory financial statements	\$ 38,298,682	\$ 37,737,281
Discounted losses under FFIC structured settlement program	-	(393,927)
Statutory surplus excluding permitted practices	\$ 38,298,682	\$ 37,343,354
Effect of permitted practice on net income		
Net income per statutory financial statements	\$ 906,519	\$ 1,313,688
Discounted losses under FFIC structured settlement program	-	26,269
Net income excluding permitted practices	\$ 906,519	\$ 1,339,957

Note 2 - Accounting Changes and Corrections of Errors

In August 2011, the NAIC issued SSAP No.101 – Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10 (SSAP No. 101). SSAP 101 provides two significant changes.

First, tax loss contingencies will continue to be estimated based on guidance in SSAP No. 5 – Liabilities Contingencies and Impairments of assets. However, a more-likely-than-not (a likelihood of more than 50%) criterion is used for federal and foreign tax loss contingencies. Formerly, a probable criterion was used. If the estimated tax loss contingency is greater than 50% of the tax benefit originally recognized, the tax loss contingency shall be equal to 100% of the tax benefit recognized. Second. Adjusted gross deferred tax assets (DTAs) will be admitted based on the sum of a three component calculation. Component One: This component consists of taxes paid in prior years and tax loss contingencies that can be recovered through loss carrybacks not to exceed three years. Component Two: After the application of Component One, an entity must apply certain admissibility limits. An entity should admit the amount of adjusted gross DTAs expected to be realized within the applicable period, limited by the applicable percentage of adjusted statutory capital and surplus. Component Three: This component consists of the amount of gross DTAs to be admitted to the extent that they are offset by deferred tax liabilities of the same tax character. The Company adopted SSAP No. 101 as of January 1, 2012.

Adoption resulted in the increase of admitted DTAs by \$113,098. Total assets and surplus were increased by this same amount.

Note 3 - Business Combinations and Goodwill

No significant change.

Note 4 - Discontinued Operations

No significant change.

Note 5 - Investments

- D. Loan-backed securities-
- Prepayment assumptions for loan-backed securities were obtained from the Bloomberg system.
 - During the period, the Company has not recognized any loan-backed securities as other-than-temporarily impaired based on the Company's intent to sell the security or inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis of the security.
 - The Company does not hold any loan-backed securities with a recognized other-than-temporary impairment based on the present value of cash flows expected to be collected being less than the amortized cost basis of the security.
 - The Company does not have any loan-backed securities in an unrealized loss position for which an other-than-temporary impairment has not been recognized in earnings.
 - The Company has a quantitative and qualitative process for identifying loan backed securities that are in an unrealized loss position and evaluating whether impairments are other than temporary. This begins with evaluating the amount and extent of time that a security is in an unrealized loss position to identify securities where all contractual cash flows may not be collected. From this point, the Company will further analyze certain securities considering information such as ratings and the underlying collateral (e.g., delinquency rates, collateral coverage, loan characteristics). The Company also performs cash flow analysis which can result in certain securities in an unrealized loss position not being impaired because the Company believes all contractual cash flows will be collected.

Note 20 - Fair Value

A. Inputs Used for Assets and Liabilities Reported at Fair Value

1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3 as of March 31, 2012:

The Company reviews its fair value hierarchy classifications quarterly. This review could reveal that previously observable inputs for specific assets or liabilities are no longer available or reliable. For example, if the market for a Level 1 asset becomes inactive, the Company may need to adopt a valuation technique that relies on unobservable components causing the asset to be transferred to Level 2 or Level 3. Alternatively, if the market for a Level 3 asset or liability becomes active, the Company will report a transfer out of Level 3. Transfers in or out of Level 3 are reported as of the beginning of the period in which the change occurs. During the first quarter of 2012, there have not been any transfers of assets or liabilities from one level of the fair value hierarchy to another.

The Company does not carry any assets or liabilities that are measured and reported at fair value as of March 31, 2012.

2. Rollforward of Level 3 Items
The Company has no assets or liabilities measured at fair value in the level 3 category of the fair value hierarchy.
3. Policy on Transfers Into and Out of Level 3
See discussion above for a description of the company's policy for determining when transfers between levels are recognized.

NOTES TO FINANCIAL STATEMENTS

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values
The Company has analyzed the valuation techniques and related inputs, evaluated its assets and liabilities reported at fair value, and determined a fair value hierarchy level based upon trading activity and the observability of market inputs consistent with SSAP 100, Fair Value Measurement. Based on the results of this evaluation and investment class analysis, each valuation was classified into Level 1, 2, or 3. An asset's or a liability's classification is based on the lowest level input that is significant to its measurement.

Bonds included in the level 2 categorization above include NAIC 3 through 6 rated bonds valued at the lower of cost or NAIC fair value. The fair values of these bonds are based on SVO prices, and then quoted market prices in active markets when available. Based on the market data, the securities are categorized into asset class, and based on the asset class of the security, appropriate pricing applications, models, and related methodology and standard inputs are utilized to determine what a buyer in the market place would pay for the security in a current sale. When quoted prices are not readily available or in an inactive market, standard inputs used in the valuation models, listed in approximate order of priority, include, but are not limited to, benchmark yields, reported trades, municipal securities rulemaking board (MSRB) reported trades, nationally recognized municipal securities information repository (NRMSIR) material event notices, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. In certain cases, including private placement securities as well as certain difficult-to-price securities, internal pricing models may be used that are based on market proxies.

5. Derivative Fair Values
The entity does not hold any derivative assets or liabilities measured at fair value.

B. Other Fair Value Disclosures
