Notes to Financial Statement

Kaiser Foundation Health Plan of Ohio

Notes to Financial Statements

For the Three Months Ended March 31, 2012 and the Year Ended December 31, 2011

1) Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Kaiser Foundation Health Plan of Ohio ("Health Plan") have been prepared in conformity with the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures* manual, ("NAIC SAP"), the NAIC Annual Statement Instructions, and other accounting practices as prescribed or permitted by the State of Ohio – Ohio Department of Insurance (ODI). There were no reported differences to net income, statutory surplus, or risked based capital for specific practices, prescribed or permitted by the State of Ohio, that deviate from NAIC SSAP in the reported periods.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the statutory financial statements in conformity with NAIC SAP, the NAIC Annual Statement Instructions, and other accounting practices as prescribed or permitted by the ODI requires management to make estimates and assumptions that affect the reported amounts. The fair value of investments, allowance for uncollectible premiums and healthcare receivables, Medicare revenue accruals, Medicare payables and reserves, reserves for unpaid claims and adjustment expense, pension and other retirement liabilities, premium deficiency reserves, public and professional insurance liability, real estate, property and equipment impairment and useful lives, investment impairments and other charges represent significant estimates. Actual results could differ materially from those estimates. With respect to employee benefit plans, as occurs from time to time, negotiations with labor partners may result in changes to compensation and benefits. These changes are reflected in the statutory financial statements as appropriate when agreements are finalized.

C. Accounting Policies

Cash (Overdraft) and Short Term Investments

Cash (overdraft) and short-term investments include interest-bearing deposits purchased with an original maturity of twelve months or less. Cash and investments that are restricted per contractual or regulatory requirements are classified as bonds and other invested assets and excluded from cash (overdraft) and short-term investments.

Premiums and Health Care Receivable

Premiums and health care receivables exclude nonadmitted balances. Certain receivables are not admissible in accordance with the NAIC SAP. Nonadmitted amounts include all nongovernmental premiums and health care receivables greater than 90 days past due and other amounts deemed uncollectible. In addition, when premiums and health care receivables greater than 90 days past due are more than a de minimus portion of the entire premiums and health care receivables balance, the entire premiums and health care receivables balance is nonadmitted.

Bonds and Other Invested Assets

Bonds and other invested assets include U.S. Treasury and government-sponsored agencies, loan -backed and/or structured securities, industrial and miscellaneous bonds and all other government bonds. Recognized gains and losses are recorded on the specific identification basis. Interest income is included in net investment and other income.

Bonds are reported in accordance with NAIC Annual Statement Instructions (Statement Value). Accordingly, bonds that are designated highest quality, NAIC Designation 1 and 2, are reported at amortized cost using the effective interest method, and bonds that are classified as NAIC Designation 3 or lower are reported at lower of amortized cost or fair value.

Adjustments are made prospectively and repayment assumptions are obtained from a third party vendor data source for loan-backed and/or structured securities. The amortization method used is the scientific method.

Notes to Financial Statement

Investments are regularly reviewed for impairment and a charge is recognized when the fair value is below cost basis and is judged to be other-than-temporary. Impairment is included in net realized capital gains (losses). In its review of assets for impairment that is deemed other-than-temporary, management generally follows the following guidelines:

- Substantially all investments are managed by outside investment managers who do not need KFHP's management pre-approval for sales, therefore substantially all declines in value below amortized cost are recognized as impairment that is other-than-temporary.
- For other securities, losses are recognized for known matters, such as bankruptcies, regardless of ownership period, and investments that have been continuously below book value for an extended period of time are evaluated for impairment that is other-than-temporary.

Health Plan's investment transactions are recorded on a trade-date basis.

Health Plan is required to keep investments on deposit in the State of Ohio, where it is licensed. At both March 31, 2012 and December 31, 2011, \$400 thousand in long-term U.S. Treasury notes were restricted to satisfy the state's regulatory requirements.

Real Estate, Property and Equipment

Real estate, property and equipment, which includes land, buildings and improvements, furniture, equipment and software, are stated at cost less accumulated depreciation and amortization. Interest is capitalized on facilities construction in progress and is added to the cost of the underlying asset, in accordance with Statement of Statutory Accounting Principles (SSAP) No. 44, *Capitalization of Interest Cost*. Depreciation begins when the project is substantially complete and ready for its intended use. Software is amortized on a straight-line basis over three years. Buildings and equipment are depreciated on a straight line basis over the shorter of the asset's useful life or the estimated useful lives of the various classes of assets, generally ranging from 3 to 33 years. Leasehold improvements are depreciated on a straight-line basis over the terms of the base period and additionally may include any optional periods with a likelihood to renew, generally ranging from 5 to 15 years.

Management evaluates alternatives for delivering services that may affect the current and future utilization of existing and planned assets and could result in an adjustment to the carrying values of such land, buildings, equipment and software in the future. Management evaluates and records impairment losses, where applicable, based on expected utilization, projected cash flows and recoverable values.

Maintenance and repairs are expensed as incurred. Major improvements that increase the estimated useful life of an asset are capitalized. Upon the sale or retirement of assets, recorded cost and related accumulated depreciation are removed from the accounts, and any gain or loss on disposal is reflected in operations.

Included in property and equipment are health care delivery assets representing pharmaceutical inventory, as well as medical center furniture, fixtures and equipment used in the direct delivery of care. Pharmaceutical inventory is included in the furniture and equipment category.

Pharmaceutical inventory is not subject to depreciation. Medical center furniture, fixtures and equipment used in the direct delivery of care are depreciated over their estimated useful lives but for a period not to exceed three years.

Self-Insured Risks

Costs associated with self-insured risks, primarily for workers' compensation, are charged to operations based upon actual and estimated claims. The estimate for incurred but not reported self-insured claims is based on actuarial projections of costs using historical claims and other relevant data. Estimates are monitored and reviewed and, as settlements were made or estimates were revised, adjustments are reflected in current operations. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided. While the ultimate payments for self-insured claims are dependent on future developments, management is of the opinion that the reserve for self-insured risks is adequate. Coverage, in excess of the per occurrence self-insured retention, has been secured with affiliated and unaffiliated insurers or reinsurers for specified amounts for workers' compensation liabilities. Decisions relating to the limit and scope of the self-insured layer and the amounts of excess insurance purchased are reviewed each year,

Notes to Financial Statement

subject to management's analysis of actuarial loss projections and the price and availability of acceptable commercial insurance.

Reserves for Unpaid Claims and Claims Adjustment Expense

The cost of health care services is recognized in the period in which services are provided. Reserves for unpaid claims and claims adjustment expense consists of unpaid health care expenses, which include an estimate of the cost of services provided to Health Plan's members by third-party providers that have been incurred but not reported. The estimate for incurred but not reported claims is based on actuarial projections of costs using historical paid claims and other relevant data. Estimates are monitored and reviewed and, as settlements are made or estimates are revised, adjustments are reflected in current operations. Such estimates are subject to the impact of changes in the regulatory environment and economic conditions. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided. While the ultimate amount of paid claims is dependent on future developments, management is of the opinion that the reserves for unpaid claims and claims adjustment expense are adequate to cover such claims. Negative amounts reported for incurred related to prior years result from claims being adjudicated and paid for amounts less than originally estimated.

The Ohio Permanente Medical Group, P.C. (Medical Group) cooperates with Health Plan in conducting the Kaiser Permanente Medical Care Program. Health Plan contracts with the Medical Group to provide or arrange for hospital and medical services for members. Contract payments to the Medical Group represent a substantial portion of the expenses for medical services reported in the statutory financial statements. Included in the reserves for unpaid claims and claims adjustment expense is Health Plan's due to associated medical group. Due to associated medical group consists primarily of unpaid medical expenses owed to the Medical Group for medical services provided to members under a medical services agreement with Health Plan. Under the agreement, Health Plan reimburses the Medical Group for the cost of physician services provided by Medical Group and claims expense for referred medical services. The cost of medical services, including an estimate of claims incurred but not reported, is recognized by Health Plan in the period in which services are provided and is reflected as a component of medical and hospital expenses.

The payable to the Medical Group was \$6.6 million and \$13.2 million as of March 31, 2012 and December 31, 2011. Based upon the terms of the agreement with the Medical Group, Health Plan paid \$19.3 million and \$95.6 million to the Medical Group for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively.

Premium Deficiency Reserves

Premium deficiency reserves and the related expense are recognized when it is probable that expected future health care and maintenance costs under a group of existing contracts will exceed anticipated future premiums and reinsurance recoveries over the contract period. Expected investment income and interest expense is included in the calculation for premium deficiency reserves, as appropriate. The level at which contracts are grouped for evaluation purposes is generally by geographic region. The methods for making such estimates and for establishing the resulting reserves are reviewed and updated, and any resulting adjustments are reflected in current operations. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided.

Receivables and Payables for Securities

Receivables and payables for securities represent current amounts for unsettled securities purchases or sales.

Donations and Grants Made or Received

Donations and grants made are recognized at fair value in the period in which a commitment is made, provided the payment of the donation or grant is probable and the amount is determinable. Donations or grants received, including research grants, are recognized at fair value in the period the donation or grant was committed unconditionally by the grantor or in the period the donation or grant requirements are met, if later.

Revenue Recognition

Net premium revenue includes premiums from employer groups, individuals and Medicare. Revenue is recognized over the period in which the members are entitled to health care services.

Notes to Financial Statement

The majority of Health Plan's Medicare revenues are paid based on cost, with interim payments using pre-established rates, and the final settlement is made after the end of the fiscal year. Estimates of final settlements of the cost report are recorded by Health Plan. In connection with Health Plan's Medicare cost contract, Health Plan recorded allowances and reserves for adjustments of recorded revenues in the amount of \$29.8 million and \$28.5 million at March 31, 2012 and December 31, 2011, respectively. For the three months ended March 31, 2012 and the year ended December 31, 2011, Medicare revenues increased approximately \$595 thousand and decreased approximately \$11.8 million, respectively, due to prior year retroactive adjustments different than amounts previously estimated.

In addition, Medicare benefits include a voluntary prescription drug benefit (Part D). Revenues for Part D include capitated payments made from Medicare adjusted for health risk factor scores. Revenues also include amounts to reflect a portion of the health care costs for low-income Medicare beneficiaries and a risk-sharing arrangement to limit the exposure to unexpected expenses. Related accruals are recognized monthly based on cumulative experience and membership data. Part D revenue is finalized after all data is submitted to Medicare, and the final settlement is made after the end of the fiscal year.

Medicare Cost revenue and Medicare Part D revenue are subject to governmental audits and potential payment adjustments. The Centers for Medicare & Medicaid Services (CMS) performs coding audits to validate the supporting documentation maintained by Health Plan and its care providers.

Estimates of retrospective adjustments resulting from coding audits, cost reports and other contractual adjustments are recorded in the time period in which members are entitled to health care services. Actual retroactive adjustments may differ from initial estimates.

Premiums collected in advance are deferred and recorded as premiums received in advance. Revenue is adjusted to reflect estimates of collectability, including retroactive membership adjustment trends and economic conditions. Revenue and related receivables are exclusive of charity care. A portion of revenues derived under contracts with the United States Office of Personnel Management is subject to audit and potential retrospective adjustments.

Pension and Other Postretirement Benefits

Health Plan participates in defined benefit pension and postretirement plans that are administered by KFHP. The plans are accounted for within the framework of SSAP No. 89, *Accounting for Pensions, A Replacement of SSAP No. 8*, and SSAP No. 14, *Postretirement Benefits Other Than Pensions*, respectively. The plans are actuarially evaluated and involve various assumptions. Critical assumptions include the discount rate and the expected rate of return on plan assets (for pension), which are important elements of expense and/or liability measurement. Other assumptions involve demographic factors such as retirement age, mortality, turnover and the rate of compensation increases. KFHP evaluates assumptions annually and modifies them as appropriate. Pension and postretirement costs are allocated over the service period of the employees in the plan.

KFHP uses a discount rate to determine the present value of the future benefit obligations. The discount rate is established based on rates available for high-quality fixed-income debt at the measurement date whose maturity dates match the expected cash flows of the retirement plans.

To determine the expected long-term rate of return on pension plan assets, KFHP considers the current and expected asset allocation, as well as historical and expected returns for each plan asset class. Any difference between actual and expected plan experience, in excess of a 10% corridor around the larger of assets or liabilities, is recognized in the net periodic pension calculation over the expected average future service of the current employees, which is approximately 13 years.

Cost Allocations

For reporting lines of business activity, expenses are allocated based on utilization and experience.

10) Information Concerning Parent, Subsidiaries and Affiliates

Health Plan is a subsidiary of Kaiser Foundation Health Plan, Inc. (KFHP). KFHP is affiliated with Kaiser Foundation Hospitals (Hospitals) because their governing boards and management are substantially the same. Health Plan contracts with Kaiser Foundation Hospitals to provide or arrange hospital services to members. Based upon the terms of the Hospital Service Agreement, Health Plan was charged \$13.1 million and \$59.3 million by Hospitals for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively.

Costs of services provided by KFHP and Hospitals to Health Plan were based on the actual cost incurred to provide those services. Services provided include, but are not limited to the following: information technology, treasury, general management, administrative support, and transaction processing. Charges for costs of services provided by KFHP and Hospitals were approximately \$14.9 million and \$59.1 million for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively. Health Plan received no investment income from Hospitals for the three months ended March 31, 2012 and \$60 thousand for the year ended December 31, 2011. In addition, Health Plan was charged interest expense of \$30 thousand and \$115 thousand by KFHP and Hospitals with respect to amounts paid by KFHP and Hospitals on behalf of Health Plan for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively.

Additionally, Health Plan purchased professional liability and other insurance from affiliated organizations primarily Lokahi Assurance, Ltd. (Lokahi). Health Plan's premium expense under these arrangements for the three months ended March 31, 2012 and the year ended December 31, 2011 was \$1.3 million and \$3.3 million, respectively.

Health Plan contracts with Kaiser Permanente Insurance Company, a subsidiary of KFHP, to provide administrative services including, but not limited to, product development, rating and underwriting, marketing and sales, advertising, claims adjudication, member services, utilization management, and premium billing and collection. Pursuant to this contract, Health Plan received revenues of \$184 thousand and \$931 thousand for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively. In addition, Health Plan and KPIC cooperate in the delivery of services under Point of Service products. Under this arrangement, premiums from customers are allocated between Health Plan and KPIC based on prospective estimates of utilization. Pursuant to this arrangement, Health Plan received \$5.1 million and \$30.8 million in premium revenue from KPIC for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively.

Health Plan has also entered into reciprocal business relationships with KFHP whereby Health Plan and KFHP and its subsidiaries provided medical services to visiting members. Net revenue recorded for services provided by Health Plan for the three months ended March 31, 2012 and the year ended December 31, 2011 was \$231 thousand and \$986 thousand, respectively. Net expense for services provided to Health Plan members in the three months ended March 31, 2012 and the year ended December 31, 2011 was \$289 thousand and \$1.1 million, respectively.

Health Plan has a guaranty agreement with the parent, KFHP and affiliates, in which the parent and Hospitals, without exception, guarantees all obligations of Health Plan, including a guarantee to provide health care services to Health Plan's subscribers, enrollees and dependents in the event that Health Plan is discontinued prior to the expiration of Health Plan's contracts. In addition, Hospitals has loaned certain subordinated debt to Health Plan as described in the footnote *Minimum Capital and Surplus*.

Due from Hospitals generally represents amounts held and invested by affiliated organizations for the benefit of Health Plan in accordance with an agreement to manage excess funds. Due to Hospitals generally represents funds transferred by Hospitals to Health Plan to satisfy Health Plan's operational requirements. Due to Hospitals included a liability for payment of Hospitals' reserves for unpaid claims of \$8.3 million and \$10.4 million as of March 31, 2012 and December 31, 2011, respectively. Hospitals' claims expense was included in Health Plan's total expenses, primarily hospital and medical expenses.

No significant changes from the 2011 annual statement.

20) Fair Value Measurements

Health Plan utilizes a three-level valuation hierarchy for fair value measurements. An instrument's categorization within the hierarchy is based upon the lowest level of input that is significant to the fair value measurement. For instruments classified in Level 1 of the hierarchy, valuation inputs are quoted prices for identical instruments in active markets at the measurement date. For instruments classified in Level 2 of the hierarchy, valuation inputs are directly observable but do not qualify as Level 1 inputs. Examples of Level 2 inputs include: quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in inactive markets; other observable inputs such as interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates; and market-correlated inputs that are derived principally from or corroborated by observable market data. For instruments classified in Level 3 of the hierarchy, valuation inputs are unobservable inputs for the instrument. Level 3 inputs incorporate assumptions about the factors that market participants would use in pricing the instrument.

Investments are reported at lower of amortized cost or fair value, with impairment recorded if amortized cost is greater than fair value. If amortized cost is greater than fair value, amortized cost is written down to fair value. Valuation is primarily determined by external pricing agencies over which management exercises oversight to ensure materially accurate valuations. The fair values of investments are based on quoted market prices, if available, or estimated using quoted market prices for similar investments. If listed prices or quotes are not available, fair value is based upon other observable inputs or models that primarily use market-based or independently sourced market parameters as inputs. In addition to market information, models also incorporate transaction details such as maturity. Fair value adjustments, including credit, liquidity and other factors, are included, as appropriate, to arrive at a fair value measurement.
