The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in a 100% pooling reinsurance agreement for which it is allocated litigation expenses.

The following is a discussion of a potentially significant pending case at June 30, 2012. The Company does not consider a loss from this case to be probable and is unable to estimate a range of loss, if any, at this time.

As of June 30, 2012, there was a putative class action lawsuit alleging the Company improperly applies a preferred provider discount to medical payment claims.

## 20. Fair Value Measurements

## A. Inputs Used for Assets and Liabilities Measured at Fair Value

## 1. Fair Value Measurements by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., active exchange-traded equity securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

The Company evaluated whether the market was distressed or inactive in determining the fair value for those securities reported and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, the Company concluded that there was sufficient activity in determining the fair value for those securities reported.

**NOTES TO FINANCIAL STATEMENTS**

The decrease is primarily due to a decrease in originally anticipated severity of 1.6% for accident year 2011 auto physical damage case reserves.
