NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Nationwide Mutual Insurance Company (Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Insurance Department recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

C. Accounting Policies

7. Investments in subsidiary and affiliated companies are stated as follows:

With the exception of Nationwide Corporation, the admitted investments in all subsidiary, controlled, and affiliated (SCA) entities are valued using an equity method approach. Under this approach, investments in insurance affiliated companies are stated at underlying statutory equity value adjusted for unamortized goodwill. Investments in non-insurance affiliated companies that have no significant ongoing operations other than to hold assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates are stated at audited GAAP equity adjusted to a statutory basis of accounting. Investments in non-insurance affiliated companies that have significant ongoing operations beyond holding assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates are stated at audited GAAP equity. Investments in subsidiaries formerly traded on a major stock exchange are stated at discounted market. Unaudited affiliated companies of the reporting entity or its affiliates are non-admitted under prescribed SAP accounting practices. Goodwill arising from the acquisition of subsidiaries or affiliated companies is amortized over a period of ten years. Unamortized goodwill at June 30, 2012 was \$1.7 billion of which \$866.0 million was nonadmitted because total unamortized goodwill exceeded 10% of adjusted policyholders' surplus as of the end of the prior quarter.

Nationwide Corporation is an unaudited, downstream, noninsurance holding company consisting of Nationwide Financial Services, Inc. (NFS), NWD Management Research Trust, Nationwide Global Holdings, and Nationwide Better Health. In accordance with the "look through" provisions of SSAP No. 97, *Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 88*, valuation of the admitted investment in Nationwide Corporation is based on the individual audited SCA entities owned by Nationwide Corporation, which is currently NFS. Additionally, all non-affiliated liabilities, commitments, contingencies, guarantees or obligations of Nationwide Corporation are reflected in its carrying value. The unaudited assets of Nationwide Corporation and the unaudited SCA entities of Nationwide Corporation, both of which are immaterial, are non-admitted.

Note 2 - Accounting Changes and Corrections of Errors

On January 1, 2012, the Company adopted a new standard, SSAP No. 101, Income Taxes, which supersedes SSAP No. 10R, Income Taxes Revised - A Temporary Replacement of SSAP No. 10. The standard applies a 'more likely than not' threshold for the recognition of federal and foreign tax loss contingencies and establishes a new framework for determining the admissibility of deferred tax assets (DTA). The difference between the recalculated amounts as of January 1, 2012, and the amount actually reported in the prior year financial statements is treated as a change in accounting principle in accordance with SSAP No. 3, Accounting Changes and Corrections of Errors. The cumulative effect of this change in accounting principle resulted in a \$23,508,926 increase in unassigned funds as of January 1, 2012.

Note 3 - Business Combinations and Goodwill

On May 1, 2012, Harleysville Mutual Insurance Company ("Harleysville") merged with and into the Company, with the Company as the surviving company. The Company acquired all of the publicly held shares of common stock of Harleysville Group Inc. ("HGI"), making HGI a wholly-owned subsidiary of the Company. The merger of Harleysville into the Company was accounted for as a statutory merger. The Company's acquisition of all the publicly held shares of common stock of HGI was accounted for as a statutory purchase. Both the statutory merger and the statutory purchase qualify as tax-free transactions.

The financial information contained in this statement includes the balances and results of operations of Harleysville for the six months ended June 30, 2012. In addition, the 2011 balances and results of operations have been restated to reflect the statutory merger. The Company did not change the 2011 admissibility of assets due to the increased surplus value of the merged entities or recompute the admissibility of deferred tax assets due to the combined results of the merged entities.

Harleysville, based in Harleysville, Pennsylvania, increases the Company's commercial lines book of business and expands the national, independent agency distribution network.

A. Statutory Purchase Method

HGI is a non-insurance holding company that directly owns six insurance subsidiaries.

The cost of the acquisition was \$836.8 million, resulting in goodwill of \$588.9 million. Goodwill is amortized over a period of ten years. The Company recognized \$9.8 million of amortization expense during the period ended June 30, 2012 related to the purchase of HGI common stock. The unamortized goodwill balance of \$579.1 million was nonadmitted at June 30, 2012.

B. Statutory Mergers

There were no shares of stock issued in the merger transaction.

Pre-merger separate company revenue, net income, and other surplus adjustments for the four months ended April 30, 2012 are (in millions):

	Revenue	Net Income	Other Surplus Adjustments
The Company	\$4,018.9	\$510.6	(\$57.5)
Harleysville	\$94.3	(\$36.5)	\$59.8

NOTES TO FINANCIAL STATEMENTS

Of the restated prior year amounts for the six months ended June 30, 2011, separate company revenue, net income, and other surplus adjustments are (in millions):

	Revenue	Net Income	Other Surplus Adjustments
The Company	\$5,944.4	(\$444.1)	\$536.3
Harleysville	\$148.8	(\$15.2)	\$3.4

No adjustments were recorded directly to surplus for any entity that previously did not prepare statutory statements.

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ (1,296,771)
2. 12 Months or Longer	\$ (110,938,273)

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$ 124,548,154
2. 12 Months or Longer	\$ 347,848,241

5. The Company reviews all loan-backed and structured securities in which the fair value of the given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, the quality of any credit guarantors, to determine the cash flows expected to be received for the security.

If the severity and duration of the security's unrealized loss indicates a risk of an other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized cost basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

Note 20 – Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its assets and liabilities reported at fair value in the quarterly statement into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The fair value hierarchy levels are as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimate about the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs.

The Company periodically reviews its fair value hierarchy classifications for financial assets and liabilities. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications into/out of the fair value hierarchy levels are reported as transfers at the beginning of the period in which the change occurs.

To determine the fair value of bonds and stocks for which market quotations are available, independent pricing services are most often utilized. For these bonds and stocks, the Company obtains the pricing services' methodologies, inputs and assumptions and classifies the investments accordingly in the fair value hierarchy.

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when quotes are not available from independent pricing services. Broker quotes are considered unobservable inputs, and these bonds are classified accordingly in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased such that generally only one quotation is available. As the brokers often do not provide the necessary transparency into their quotes and methodologies, the Company periodically performs reviews and tests to ensure that quotes are a reasonable estimate of the investments' fair value.

NOTES TO FINANCIAL STATEMENTS

For certain bonds not valued using independent services or broker quotes, a corporate pricing matrix or internally developed pricing model is most often used. The corporate pricing matrix is developed using private spreads for bonds with varying weighted average lives and credit quality ratings. The weighted average life and credit quality rating of a particular bond to be priced using the corporate pricing matrix are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate U.S. Treasury yield to create an estimated market yield for that security. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

Fair value of derivative instruments is determined using various valuation techniques relying predominately on observable market inputs. These inputs include interest rate swap curves, credit spreads, interest rates, counterparty credit risk, equity volatility and equity index levels. In cases where observable inputs are not available, the Company will utilize non-binding broker quotes to determine fair value and these instruments are classified accordingly in the fair value hierarchy.
