25. Change in Incurred Losses and Loss Adjustment Expenses

The Company writes only one line of business, “Other” (excess share insurance) and sets loss reserves on a prudent basis for potential claims events. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company's independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range. Further, since the Company has no specific loss events identified, for which a loss reserve would normally be established, all of the Company's loss reserves are unallocated IBNR loss reserves. As a result, for purposes of Schedule P, in any given year the cumulative loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other excess insurance companies with infrequent claims events. Since claims events are rare (infrequent but potentially severe), the typical year shows favorable development. A summary of the favorable loss development for the Company's single line of business (“Other”) follows (dollars in thousands):

30. Premium Deficiency Reserves

The Company provides deposit insurance to participating credit unions for up to \$250,000 in excess of the insurance limit imposed by the credit union's primary insurer. Credit unions insured under the Company's excess insurance contract are required to maintain a premium deposit with the Company equal to 1% of the aggregate limits of liability. The premium deposits are recorded as a liability by the Company and are non-interest bearing. The investment earnings therefrom in addition to a monthly risk-based premium charge are used to fund the Company's deposit insurance program. The premium deposits are at-risk to the insured credit unions and ultimately can act as a reserve that is available to pay claims if needed. The aggregate of premium deposits that are available to pay claims are \$28,750,000 at September 30, 2012. Therefore the Company has determined there is not a need for a premium deficiency reserve and none has been recorded at September 30, 2012. This evaluation was completed on October 26, 2012. The Company considers investment income when evaluating the need for premium deficiency reserves.
