## STATEMENT AS OF SEPTEMBER 30, 2012 OF THE WAYNE MUTUAL INSURANCE COMPANY

## NOTES TO FINANCIAL STATEMENTS

Note 1 -Summary of Accounting Policies

## A. Accounting Practices

The Statement was prepared with accounting practices & prescribed or permitted by the Ohio Department of Insurance. The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' NAIC Accounting Practices and Procedures manual, version effective January 1, 2001, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

## B. Use of Estimates

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

## C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance. Expenses incurred in connection with acquiring new insurance business, including such acquisition cost as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at amortized value using the interest method. Non-investment grade short-term investments are stated at the lower of amortized value or fair value.
2. Investment grade bonds not backed by other loans are stated at amortized value using the interest method. Non-investment grade bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value.
3. Common stocks, other than investments in stocks of subsidiaries and affiliates, are stated at fair value.

Note 20 Fair Value Measurements

## A. Inputs Used for Assets and Liabilities Measured at Fair Value

## 1. Fair Value Measurements by Level 1, 2, and 3

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

**Level 1- Quoted Prices in Active Markets for Identical Assets and Liabilities:** This category is for items measured at fair value on a recurring basis, including exchange-traded preferred and common stocks. It also includes derivative liabilities for written call options on common stock which are also exchanged traded. The estimated fair value of the equity securities and derivatives within this category are based on quoted prices in active markets and are thus classified as Level 1.

**Level 2- Significant Other Observable Inputs:** This category is for items measured at fair value on a recurring basis and includes bonds, preferred stocks, and common stocks which are not exchange-traded. The estimated fair values of some of these items were determined by independent pricing services using observable inputs. Others were based on quotes from markets which were not considered actively traded.

**Level 3 – Significant Unobservable Inputs:** The Company has no assets or liabilities measured at fair value in this category.

The following table provides information as of September 30, 2012 about the Company's financial assets measured at fair value on a recurring basis:

	Quoted prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level II)	Significant Unobservable Inputs (Level III)	Total at September 30, 2012
Bonds	\$	\$	\$	\$
Common stocks	7,163,118	100,073		7,263,191
Preferred stocks	104,278			104,278
<b>Total</b>	<b>\$ 7,267,396</b>	<b>\$ 100,073</b>	<b>\$ _____</b>	<b>\$ 7,367,469</b>

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3 as stated in paragraph 3 below.

## 2. Rollforward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the Level 3 category.

## 3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

## 4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

Common stock carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations because quoted market prices for identical instruments trading in an inactive market were utilized. When an equity instrument is illiquid due to limited trading activity, the use of quoted markets for identical instruments was determined by the Company to be the most reliable method to determine fair value.

H. Subprime Mortgage Related Risk Exposure

The Company invests in several asset classes that could potentially be adversely affected by subprime mortgage exposure. These investments include bond and equity investments in financial institutions. The company believes that its greatest exposure is to unrealized losses from declines in asset values versus realized losses resulting from defaults or foreclosures. All bonds held that were issued by financial institutions participating in subprime lending activities are investment grade quality. Default risk on these bonds appears minimal at this time. The impact on these investments should the subprime credit crisis worsen cannot be assessed at this time. Asset values for unaffiliated equity securities issued by financial institutions have declined substantially over the last six months. These reduced asset values have been reflected in the financial statement. Conservative lending and investment practices limit the company's exposure to such losses.

Note 22 - Events Subsequent
