NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

- A. The accompanying financial statements of Permanent General Assurance Corporation of Ohio (PGACOH) have been prepared in accordance with the NAIC Accounting Practices and Procedures Manual except to the extent that Ohio law differs. However, as of this Statement date, there have been no requests from the State of Ohio to depart from the prescribed NAIC guidelines.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

- (1) Short-term investments are stated at cost.
- (2) Bonds are stated at amortized cost using the yield to maturity method.
- (3) Common stocks, if owned are stated at lower of cost or market with exception to the stock of the company's wholly owned subsidiary (which is valued as described in the NAIC Valuation of Securities Manual).
- (4) The Company holds no preferred stock.
- (5) The Company holds no mortgage loans.
- (6) The basis for loan backed securities is amortized cost or the lower of amortized cost or fair market value. The adjustment methodology used for each type of security is prospective for securities which an OTTI loss has been recognized and retrospective for all other securities.
- (7) The Company values The General Automobile Insurance Company (a wholly owned subsidiary) in accordance with the NAIC policies and procedures manual.
- (8) The Company has no investments in joint ventures, partnerships & limited liability company.
- (9) The Company has no investments in derivatives.
- (10) The Company does not anticipate investment income as a factor in the premium deficiency calculation.
- (11) Reserve for losses represents the estimated liability for claims reported to the Company and an amount, based on actuarially determined reserves for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company has no pharmaceutical rebate receivables.

2. Accounting Changes and Corrections of Errors:

On November 6, 2011, SSAP No. 101, Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10, was adopted by the NAIC. SSAP No. 101 contains changes to accounting for current and deferred federal and foreign income taxes, effective January 1, 2012. This guidance provides that the deferred tax asset admissibility guidance is no longer elective, and the reversal and surplus limitation parameters in the admissibility test are determined based on the risk-based capital level. It also requires gross deferred tax assets to be reduced by a statutory valuation allowance if it is more likely than not that some portion or all of the gross deferred tax assets will not be realized. Finally, the guidance set a more likely than not threshold for the recording of contingent tax liabilities. The cumulative effect of adopting this pronouncement is \$242,954.

The following summarizes the impact of the adoption (000's omitted).

G. Subprime Mortgage Related Risk Exposure

(1) Factors used to determine the investment in a specific sub-prime security include the quality of underwriter / loan servicer, types of loans (fixed, floating, hybrid ARM), loan quality (documentation, purpose, occupancy), loan origination year (vintage), loan geographic distribution, average loan to values, average FICO scores and the securities credit support level. Loan loss estimates are computed based on historical loan delinquency and foreclosure statistics and projecting future delinquencies and losses under multiple economic scenarios including various home price changes and employment estimates, as well as servicer style and the foreclosure rules for each state. Total projected losses for all mortgages in each deal are then compared to the credit support (subordination plus over collateralization) to determine the percentage of principal loss expected for each tranche. To minimize specific security risk and concentration risk to the sector, issue limitations and sector limitations as a percentage of the portfolio have been established. Not applicable since the company does not have a direct investment in sub prime mortgage loans.

25. Change in Incurred Losses and Loss Adjustment Expenses

Loss & lae reserves as of December 31, 2011 were \$30.192 million. As of December 31, 2012, \$22.583 million has been paid for incurred loss & lae expenses attributable to insured events or prior years. Reserves remaining for prior years are now \$8.344 million as a result of re-estimation of unpaid claims and lae expenses. Therefore, there has been a \$735 million unfavorable prior year development from 12/31/2011 to 12/31/2012 principally on liability lines of business.

For the 2011 accident year, liability and PIP reserves for Florida are now projected at lower levels with California liability now developing more favorably. There was unfavorable development in the 2009 and 2010 accident years from New York and Florida PIP due to severity levels coming in higher than previously projected.

The development is generally the result of an ongoing analysis of recent loss development trends and are increased or decreased as additional information becomes known regarding individual claims. The Company has no retrospectively rated policies that are subject to premium adjustments. The development is generally the result of an ongoing analysis of recent loss development trends and are increased or decreased as additional information becomes known regarding individual claims.
