NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of the Company have been prepared on the basis of accounting procedures prescribed or permitted by the Ohio Insurance Department. The state of Ohio requires insurance companies domiciled in the state of Ohio to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the Ohio Insurance Department.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium is assumed from BCS Insurance Company (BCSIC) and is established to cover the unexpired portion of premiums written. Such reserves are computed by the pro rata method. Expenses incurred in connection with acquiring new insurance business (acquisition costs) are charged to operations as incurred. Net investment income earned consists primarily of interest. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed.

In addition, the Company uses the following accounting policies:

- Short-term investments are stated at cost, which approximates market.
- Long-term bonds are generally stated at their amortized value. Non-investment grade securities with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value. If a security is deemed to be other than temporarily impaired, it is written down to its fair value through a charge to earnings.
- Common Stocks are stated at fair value.
- Preferred Stocks - Not applicable
- Mortgage Loans - Not applicable
- Prepayment assumptions for loan-backed securities are obtained from broker dealer survey values or Bloomberg System. These assumptions are consistent with current interest rates and the economic environment. The retrospective scientific method is used to value all loan backed and structured securities.
- Subsidiaries, Controlled and Affiliated Companies - Not applicable
- Joint ventures, Partnerships and Limited Liability Companies - Not applicable
- Derivatives - Not applicable
- Anticipated investment income as a factor for premium deficiency reserves - Not applicable
- Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- Capitalization Policy - Not applicable

NOTES TO FINANCIAL STATEMENTS

2. Accounting Changes and Corrections of Errors

Accounting changes adopted to conform to the provisions of NAIC SAP or other state prescribed practices are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is generally reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. Generally, the cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at the date if the new accounting principles had been applied retroactively for all prior periods.

Effective January 1, 2012, the Company adopted Statement of Statutory Accounting Principle ("SSAP") No. 101, *Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10* ("SSAP No. 101"). SSAP No. 101 changes statutory accounting for income taxes in two key areas (1) tax contingencies and (2) the admissibility of deferred tax assets.

Under SSAP No. 101, Federal and foreign income tax contingencies are now determined under a modified version of SSAP No. 5 – Revised, *Liabilities, Contingencies and Impairment of SSAP* ("SSAP No. 5R"). Under this standard, the recognition of tax loss contingencies uses a more likely than not model.

SSAP No. 101 also provides for a three-step calculation to determine the admitted portion of adjusted gross deferred tax assets. In the first part of the admissibility test, all filers will be allowed to use a reversal period that corresponds to the tax loss carryback provisions of the Internal Revenue Code. (The carry back period for the Company is two years.) In the second part of the admissibility test, the reversal period and surplus limitation parameters (one year & 10 percent or three years & 15 percent) are determined based upon risk-based capital ("RBC") levels. Companies not meeting the minimum threshold are prohibited from admitting anything in this part of the admissibility test. For purposes of determining test parameters, the Company used prior year-end calculations of RBC and current period surplus thresholds.

As a result of the Company's adoption of this guidance effective January 1, 2012, the Company was able to admit more deferred tax assets. This resulted in a \$202,639 increase to statutory surplus.

D. Loan Backed Securities

1. Anticipated prepayments for loan-backed and structured securities are used to determine the effective yield of an issue at purchase. Changes in the estimated cash flows of the issue are incorporated when determining the statement value at the end of each quarter and year-end. Prepayments for loan-backed and structured securities were obtained from the broker dealer survey or Bloomberg Systems. These assumptions are consistent with the current interest rate and economic environment. The retrospective scientific method is used to value most loan-backed and structured securities. For structured securities deemed to be high-risk, meaning the Company might not recover substantially all of its recorded investment due to unanticipated prepayment events, changes in investment yields due to changes in estimated future cash flows are accounted for on a prospective basis.

- b. 12 Months or Longer \$2,708,353

NOTES TO FINANCIAL STATEMENTS

5. The Company periodically reviews its fixed maturity securities on a case-by-case basis to determine if any decline in fair value below amortized cost is other-than-temporary. Factors considered when determining whether a decline is other-than-temporary include the length of time a security has been in an unrealized loss position, reasons for the decline in value, expectations for the amount and timing of a recovery in fair value, and the Company's intent to sell and whether the Company is more likely than not will be required to sell the security. When the Company intends to sell an impaired security or more likely than not will be required to sell an impaired security before recovery of its amortized cost basis, an other than temporary impairment is recognized in earnings. If the Company does not expect to recover the entire amortized cost basis of an impaired debt security, even if it does not intend to sell the security and it is not more likely than not that it will not be required to sell the security before recovery of its amortized cost basis, the entity must consider, based upon an estimate of the present value of cash flows expected to be collected on the debt security as compared to its amortized cost basis, whether a credit loss exists. The portion of the total other than temporary impairment related to a credit loss is recognized in the statement of income. For structured securities the difference between amortized cost and net present value of future cash flows is considered to be a credit loss. For all other securities, the difference between fair market value and amortized cost is considered to be a credit loss. If it is determined that a decline in fair value of an investment is temporary, an other-than-temporary impairment loss is not recorded.

Generally, securities with fair values that are less than 80% of cost and other securities the Company determines are underperforming or potential problem securities are subject to regular review. To facilitate the review, securities with significant declines in value, or where objective criteria evidencing credit deterioration have been met, are included on a watch list. Among the criteria for securities to be included on a watch list are: credit deterioration which has led to a significant decline in value of the security; a significant covenant related to the security has been breached; and an issuer has filed or indicated a possibility of filing for bankruptcy, has missed or announced it intends to miss a scheduled interest or principal payment, or has experienced a specific material adverse change that may impair its creditworthiness.

When performing these reviews, the Company considers the relevant facts and circumstances relating to each investment and exercises considerable judgment in determining whether a security is other-than-temporarily impaired. Assessment factors include judgments about an obligor's current and projected financial position, an issuer's current and projected ability to service and repay its debt obligations, the existence of, and realizable value of, any collateral backing the obligations, the macro-economic and the micro-economic outlooks for specific industries and issuers. Assessing the duration of asset-backed securities can also involve assumptions regarding underlying collateral such as prepayment rates, default and recovery rates, and third-party servicing capabilities.

Among the factors considered is whether the decline in fair value results from a change in the quality of the security itself, or from a downward movement in the market as a whole, the likelihood of recovering the carrying value based on the current and short-term prospects of the issuer, and the Company's ability and intent to hold the security until such a recovery may occur. Unrealized losses that are considered to be primarily the result of market conditions, such as increasing interest rates, unusual market volatility, or industry-related events, and where the Company also believes there exists a reasonable expectation for recovery and, furthermore, has the intent and ability to hold the investment until maturity or the market recovery, are usually determined to be temporary. To the extent factors contributing to recognize other-than-temporary impairment losses affected other investments, such investments were reviewed for other-than-temporary impairment and losses were recorded when appropriate.

In addition to the review procedures described above, investment in structured securities where market prices are depressed are subject to a review of their future estimated cash flows, including expected and stress case scenarios, to identify potential shortfalls in contractual payments. Even in the case of severely depressed market values on structured securities, the Company places significant importance on the results of its cash flow testing and its ability and intent to hold these securities until their fair values recover when reaching other-than-temporary impairment conclusions. If there has been an adverse change in estimated cash flows which results in negative yield, an other-than-temporary impairment is recognized in the consolidated statements of income.

There are inherent uncertainties in assessing the fair values assigned to the Company's investments and in determining whether a decline in fair value is other-than-temporary. The Company's review of fair value involves several criteria including economic conditions, credit loss experience, other issuer-specific developments and future cash flows. These assessments are based on the best available information at the time. Factors such as market liquidity, the widening of bid/ask spreads and a change in the cash flow assumptions can contribute to future price volatility. If actual experience differs negatively from the assumptions and other consideration, realized losses may be recognized in the consolidated statements of income in future periods.

The Company currently does not have the intent to sell securities with unrealized losses not considered other-than-temporary until they mature or recover in value. However, if the specific facts and circumstances surrounding a security or the outlook for its industry sector change, the Company may sell the security and realize a loss.

20. Fair Value Measurements

A. Input used for assets measured and reported at Fair Value.

1. Items measured and reported at Fair Value by levels 1, 2, and 3

Certain financial instruments are periodically measured at fair value on a nonrecurring basis, such as when impaired, or for certain bonds when carried at the lower of cost or fair value.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties that is other than in a forced or liquidation sale. The fair value of a liability is the amount at which that liability could be incurred or settled in a current transaction between willing parties.

NOTES TO FINANCIAL STATEMENTS

Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporation of current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models, and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment, which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology model or input used.

The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1 – Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 – Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads, and yield curves.

Level 3 – Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

Assets Measured at Fair Value

Certain financial assets are measured at fair value, such as certain bonds valued at the lower of cost or fair value, or investments that are impaired during the reporting period and recorded at fair value on the balance sheet at December 31. The following table summarizes assets measured at fair value:

3. Policy on Transfers into and out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

4. Inputs and techniques used for level 2 and level 3 Fair Values

Bonds carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted markets prices for similar instruments in an active market were utilized. This was accomplished by the use of matrix pricing. Matrix pricing takes quoted prices of bonds with similar features and applies analytic methods to determine the fair value of bonds held. Features that are inputs into the analysis include duration, credit quality, tax status and call and sinking fund features.

Common stocks categorized as Level 3 had key unobservable inputs. Also, the investment is less liquid, and there is limited trading activity. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

C. Other Disclosures

In 2012 PLIC and BCSIC, the direct insurer, implemented a continuity credit program for the professional liability policyholders. The continuity credit program is a mechanism to reward the policyholders for their continued participation in the program. BCSIC issued a rider to the 2012 professional liability policies, which granted a continuity credit of 40% of 2012 premium on primary coverage and 20% of 2012 premium on excess coverage. The amount of the continuity credit that could be paid to the policyholder in 2012 is equal to 25% of the continuity credit balance. The remaining amount is carried forward into future years, and is forfeited if the policyholder decides not to renew. Pursuant to a reinsurance treaty between PLIC and BCSIC, PLIC is reinsuring BCSIC for the continuity credit. The total continuity credit as of December 31, 2012 is \$3,774,669, and is reflected in aggregate write-ins for miscellaneous income on page 4 of this Statement. Per the reinsurance treaty, PLIC reimburses BCSIC only when BCSIC actually pays the continuity credit to the policyholder. As of December 31, 2012, PLIC has reimbursed BCSIC \$920,546, leaving a continuity credit liability of \$2,854,123, which is reflected in aggregate write-ins for liabilities on page 3 of this Statement.

GENERAL INTERROGATORIES
PART 2 - PROPERTY & CASUALTY INTERROGATORIES

- 6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss:
 No workers' compensation contracts were written.....
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:
 N/A.....
- 6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?.....
 N/A.....
- 6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?..... Yes [] No [X]
- 6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to unreinsured catastrophic loss
 The Company assumes premium from an affiliate that carries reinsurance up to \$40 million with multiple reinstatements.....
- 7.1 Has the reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss cap, an aggregate limit or any similar provisions)?..... Yes [] No [X]
- 7.2 If yes, indicate the number of reinsurance contracts containing such provisions..... 0
- 7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)?..... Yes [] No []
- 8.1 Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured?..... Yes [] No [X]
- 8.2 If yes, give full information
- 9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:
 (a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;
 (b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;
 (c) Aggregate stop loss reinsurance coverage;
 (d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;
 (e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
 (f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity..... Yes [] No [X]
- 9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:
 (a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or
 (b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract..... Yes [] No [X]
- 9.3 If yes to 9.1 or 9.2, please provide the following information in the Reinsurance Summary Supplemental Filing for General Interrogatory 9:
 (a) The aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income;
 (b) A summary of the reinsurance contract terms and indicate whether it applies to the contracts meeting the criteria in 9.1 or 9.2; and
 (c) A brief discussion of management's principle objectives in entering into the reinsurance contract including the economic purpose to be achieved.
- 9.4 Except for transactions meeting the requirements of paragraph 31 of SSAP No. 62R, Property and Casualty Reinsurance, has the reporting entity ceded any risk under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either:
 (a) Accounted for that contract as reinsurance (either prospective or retroactive) under statutory accounting principles ("SAP") and as a deposit under generally accepted accounting principles ("GAAP"); or
 (b) Accounted for that contract as reinsurance under GAAP and as a deposit under SAP?..... Yes [] No [X]
- 9.5 If yes to 9.4, explain in the Reinsurance Summary Supplemental Filing for General Interrogatory 9 (Section D) why the contract(s) is treated differently for GAAP and SAP.
