Note 20 - Fair Value

- A. Fair value measurements for fixed income and equity securities are based on values either published by the NAIC's Security Valuation Office (SVO) or from an independent pricing service vendor. Under certain circumstances, if neither an SVO price nor vendor price is available, a price may be obtained from a broker. Short term securities and cash equivalents are valued at amortized cost.
- When published prices from the SVO are not available, the Company's investment manager relies predominantly on independent pricing service vendors that have been evaluated and approved by the investment manager's internal pricing policy committee. Generally, pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation.

NOTES TO FINANCIAL STATEMENTS

For statutory accounting, certain investments are carried at fair value, while others may periodically be carried at fair value based on certain factors such as the NAIC’s lower of cost or market rule or an impairment. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor’s evaluation process is used to determine the appropriate fair value hierarchy. Documentation from each pricing vendor is reviewed and monitored periodically to ensure they are consistent with the investment manager’s pricing policy procedures. Market information obtained from brokers with respect to security valuations is also considered in the pricing hierarchy.

The Company attempts to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value: (1) Level 1: quoted price (unadjusted) in active markets for identical assets, (2) Level 2: inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the instrument, and (3) Level 3: inputs to the valuation methodology are unobservable for the asset or liability.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

To measure fair value, the Company obtains quoted market prices for its investment securities. If a quoted market price is not available, the Company uses prices of similar securities. Values for U.S. Treasury and publicly traded equity securities are generally based on Level 1 inputs which use the market approach valuation technique. The values for all other bonds (including state and municipal securities and obligations of U.S. government corporations and agencies) generally incorporate significant Level 2 inputs using the market approach and income approach valuation techniques. There have been no changes in the Company’s use of valuation techniques during 2013. There were no transfers between Level 1 and Level 2 or between Level 2 and Level 3 during 2013.

- (1) The Company values its investments in bonds at amortized cost and values its investments in insurance subsidiaries using the statutory equity method in accordance with SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities, A Replacement of SSAP No. 88*.
- (2) The Company has no assets or liabilities measured at fair value in the Level 3 category.
- (3) The Company has a policy to recognize transfers between levels at the beginning of the reporting period.
- (4) See A. above
- (5) The Company does not own derivative assets or liabilities.
