Kaiser Foundation Health Plan of Ohio
Notes to Financial Statements
For the Three Months Ended March 31, 2013 and the Year Ended December 31, 2012

1) Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Kaiser Foundation Health Plan of Ohio (“Health Plan”) have been prepared in conformity with the National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures* manual, (“NAIC SAP”), the NAIC Annual Statement Instructions, and other accounting practices as prescribed or permitted by the State of Ohio – Ohio Department of Insurance (ODI). There were no reported differences to net income, statutory surplus, or risk based capital for specific practices, prescribed or permitted by the State of Ohio, that deviate from NAIC SSAP in the reported periods.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the statutory financial statements in conformity with NAIC SAP, the NAIC Annual Statement Instructions, and other accounting practices as prescribed or permitted by the ODI requires management to make estimates and assumptions that affect the reported amounts. Allowance for uncollectable premiums and health care receivables; estimated fair value of investments; Medicare revenue accruals; Medicare payables and reserves; reserves for unpaid claims and claims adjustment expense; pension and other retirement liabilities; premium deficiency reserves; self-insured workers' compensation and other legal liabilities; real estate, property, and equipment impairment and useful lives; and investment impairments represent significant estimates. Actual results could differ materially from those estimates. With respect to employee benefit plans, as occurs from time to time, negotiations with labor partners may result in changes to compensation and benefits. These changes are reflected in the statutory financial statements as appropriate when agreements are finalized.

C. Accounting Policies

Cash and Short Term Investments

Cash and short-term investments – net include interest-bearing deposits purchased with an original or remaining maturity of twelve months or less. Cash and investments that are restricted per contractual or regulatory requirements are classified as bonds and other invested assets and excluded from cash and short-term investments.

Premiums and Health Care Receivables

Premiums and health care receivables exclude nonadmitted balances. Certain receivables are not admissible in accordance with the NAIC SAP. Nonadmitted amounts include all nongovernmental premiums and health care receivable greater than 90 days past due. In addition, when premiums and health care receivables greater than 90 days past due are more than a de minimus portion of the entire premiums and health care receivable balance, the entire premiums and health care receivable balance is nonadmitted.

Bonds and Other Invested Assets

Bonds and other invested assets include money market funds, U.S. Treasury and government-sponsored agencies, loan-backed and or structured securities, industrial and miscellaneous bonds and all other government bonds. Recognized gains and losses are recorded on the specific identification basis. Interest income is included in net investment and other income.

Bonds are reported in accordance with NAIC Annual Statement Instructions (Statement Value). Accordingly, bonds that are designated highest quality, NAIC Designation 1 and 2, are reported at amortized cost using the effective interest method, and bonds that are classified as NAIC Designation 3 or lower are reported at lower of amortized cost or fair value.

Adjustments are made prospectively and repayment assumptions are obtained from a third party vendor data source for loan-backed and/or structured securities. The amortization method used is the scientific method.

Investments are regularly reviewed for impairment and a charge is recognized when the fair value is below cost basis and is judged to be other-than-temporary. Impairment is included in recognized losses. In its review of assets for impairment that is deemed other-than-temporary, management generally follows the following guidelines:

- Substantially all investments are managed by outside investment managers who do not need KFHP's management pre-approval for sales, therefore substantially all declines in value below amortized cost are recognized as impairments that are other-than-temporary.
- For other securities, losses are recognized for known matters, such as bankruptcies, regardless of ownership period, and investments that have been continuously below book value for an extended period of time are evaluated for impairment that is other-than-temporary.

Health Plan's investment transactions are recorded on a trade-date basis.

Health Plan is required to keep investments on deposit in the State of Ohio, where it is licensed. At both March 31, 2013 and December 31, 2012, \$400 thousand in long-term U.S. Treasury notes were restricted to satisfy the state's regulatory requirements.

Real Estate, Property and Equipment

Real estate, property and equipment, which include land, buildings and improvements, furniture, equipment and software are stated at cost less accumulated depreciation and amortization. Interest is capitalized on facilities construction in progress and is added to the cost of the underlying asset, in accordance with Statement of Statutory Accounting Principles (SSAP) No. 44, *Capitalization of Interest*. Depreciation begins when the project is substantially complete and ready for its intended use. Software is amortized on a straight-line basis over three years. Buildings and equipment are depreciated on a straight line basis over the shorter of the asset's useful life or the estimated useful lives of the various classes of assets, generally ranging from 3 to 33 years. Leasehold improvements are depreciated on a straight-line basis over the lesser of the useful life or the terms of the base period, generally 5 years.

Management evaluates alternatives for delivering services that may affect the current and future utilization of existing and planned assets and could result in an adjustment to the carrying values of such land, buildings, equipment and software in the future. Management evaluates and records impairment losses, where applicable, based on expected utilization, projected cash flows and recoverable values.

Maintenance and repairs are expensed as incurred. Major improvements that increase the estimated useful life of an asset are capitalized. Upon the sale or retirement of assets, recorded cost and related accumulated depreciation are removed from the accounts, and any gain or loss on disposal is reflected in operations.

Included in property and equipment are health care delivery assets representing pharmaceutical inventory, as well as medical center furniture, fixtures and equipment used in the direct delivery of care. Pharmaceutical inventory is included in the furniture and equipment category.

Pharmaceutical inventory is not subject to depreciation. Medical center furniture, fixtures and equipment used in the direct delivery of care are depreciated over their estimated useful lives but for a period not to exceed three years.

Insured and Self Insured Risks

Health Plan purchases insurance including professional and general liabilities coverage. Certain insurance is purchased from affiliated organizations, as discussed in the *Information Concerning Parent, Subsidiaries and Affiliates* note. Health Plan self insures other risks, including workers' compensation and other legal liabilities. Costs associated with self-insured risks are charged to operations based upon actual and estimated claims. The estimate for incurred but not reported self-insured claims is based on actuarial projections of costs using historical claims and other relevant data. Estimates are monitored and reviewed and, as settlements are made or estimates are revised, adjustments are reflected in current operations. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided. While the ultimate payments for self-insured claims are dependent on future developments, management is of the opinion that the reserve for self-insured risks is adequate. Insurance coverage, in excess of the per occurrence self-insured retention, has been secured with affiliated and unaffiliated insurers or reinsurers for specified amounts for workers' compensation liabilities. Decisions relating to the limit and scope of the self-insured layer and the amounts of excess insurance purchased are reviewed each year, subject to management's analysis of actuarial loss projections and the price and availability of acceptable commercial insurance.

Reserves for Claims Unpaid and Unpaid Claims Adjustment Expenses

The cost of health care services is recognized in the period in which services are provided. Reserves for unpaid claims and claims adjustment expense consists of unpaid health care expenses, which include an estimate of the cost of services provided to Health Plan's members by third-party providers that have been incurred but not reported. The estimate for incurred but not reported claims is based on actuarial projections of costs using historical paid claims and other relevant data. Estimates are monitored and reviewed and, as settlements are made or estimates are revised, adjustments are reflected in current operations. Such estimates are subject to the impact of changes in the regulatory environment and economic conditions. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided. While the ultimate amount of paid claims is dependent on future developments, management is of the opinion that the reserves for unpaid claims and claims adjustment expense are adequate to cover such claims. Negative amounts reported for incurred related to prior years result from claims being adjudicated and paid for amounts less than originally estimated.

The Ohio Permanente Medical Group, P.C. (the Medical Group) cooperates with Health Plan in conducting the Kaiser Permanente Medical Care Program. Health Plan contracts with the Medical Group to provide or arrange for hospital and medical services for members. Contract payments to the Medical Group represent a substantial portion of the expenses for medical services reported in the statutory financial statements. Included in the reserves for unpaid claims and claims adjustment expense is Health Plan's due to associated medical group. Due to associated medical group consists primarily of unpaid medical expenses owed to the Medical Group for medical services provided to members under a medical services agreement with Health Plan. Under the agreement, Health Plan reimburses the Medical Group for the cost of physician services provided by Medical Group and claims expense for

referred medical services. The cost of medical services, including an estimate of claims incurred but not reported, is recognized by Health Plan in the period in which services are provided and is reflected as a component of medical and hospital expenses.

The payable to the Medical Group was \$10.2 million and \$8.5 million as of March 31, 2013 and December 31, 2012, respectively. Based upon the terms of the agreement with the Medical Group, Health Plan paid \$20.9 million and \$84.5 million to the Medical Group for the three months ended March 31, 2013 and the year ended December 31, 2012, respectively.

Premium Deficiency Reserve

Premium deficiency reserve and related expense are recognized when it is probable that expected future health care and maintenance costs under a group of existing contracts will exceed anticipated future premiums and reinsurance recoveries over the contract period. Expected investment income and interest expense are included in the calculation of premium deficiency reserves, as appropriate. The level at which contracts are grouped for evaluation purposes is generally by geographic region. The methods for making such estimates and for establishing the resulting reserves are reviewed and updated, and any resulting adjustments are reflected in current operations. Given the inherent variability of such estimates, the actual liability could differ significantly from the calculated amount.

Receivables and Payables for Securities

Receivables and payables for securities represent current amounts for unsettled securities purchases or sales.

Donations and Grants Made or Received

Donations and grants made are recognized at fair value in the period in which a commitment is made, provided the payment of the donation or grant is probable and the amount is determinable. Donations or grants received are recognized at fair value in the period the donation or grant was committed unconditionally by the grantor or in the period the donation or grant requirements are met, if later.

Revenue Recognition

Net premium revenue includes premiums from employer groups, individuals and Medicare. Revenue is recognized over the period in which the members are entitled to health care services.

The majority of Health Plan's Medicare revenues are paid based on cost, with interim payments using pre-established rates, and the final settlement is made after the end of the year. Estimates of final settlements of the cost report are recorded by Health Plan. At March 31, 2013 and December 31, 2012, in connection with Health Plan's Medicare cost contract, Health Plan recorded allowances and reserves for adjustments of recorded revenues in the amount of \$27.5 and \$25.9 million, respectively. For the three months ended March 31, 2013 and the year ended December 31, 2012, Medicare revenues increased by approximately \$1.2 million and \$9.3 million, respectively, due to prior year retrospective adjustments in excess of amounts previously estimated.

In addition, Medicare benefits include a voluntary prescription drug benefit (Part D). Revenues for Part D include capitated payments made from Medicare adjusted for health risk factor scores. Revenues also include amounts to reflect a portion of the health care costs for low-income Medicare beneficiaries and a risk-sharing arrangement to limit the exposure to unexpected expenses. Related accruals are recognized monthly based on cumulative

experience and membership data. Part D revenue is finalized after all data is submitted to Medicare, and the final settlement is made after the end of the fiscal year.

Medicare Cost revenue and Medicare Part D revenue are subject to governmental audits and potential payment adjustments. The Centers for Medicare & Medicaid Services (CMS) performs coding audits to validate the supporting documentation maintained by Health Plan and its care providers.

Estimates of retrospective adjustments resulting from coding audits, cost reports and other contractual adjustments are recorded in the time period in which members are entitled to health care services. Actual retroactive adjustments may differ from initial estimates.

Premiums collected in advance are deferred and recorded as premiums received in advance. Revenue is adjusted to reflect estimates of collectability, including retroactive membership adjustment trends and economic conditions. Revenue and related receivables are exclusive of charity care. A portion of revenues derived under contracts with the United States Office of Personnel Management is subject to audit and potential retrospective adjustments.

Pension and Other Postretirement Benefits

Health Plan participates in defined benefit pension and postretirement plans that are administered by KFHP. Effective January 1, 2013, the plans are accounted for within the framework of SSAP No. 102 *Accounting for Pensions* and SSAP No. 92 *Accounting for Postretirement Benefits Other Than Pensions*, respectively, as described in Note 2, *Accounting Changes and Correction of Errors*. The plans are actuarially evaluated and involve various assumptions. Critical assumptions include the discount rate and the expected rate of return on plan assets (for pension) and the rate of increase for health care costs (for postretirement benefit plans other than pension), which are important elements of expense and/or liability measurement. Other assumptions involve demographic factors such as retirement age, mortality, turnover and the rate of compensation increases. KFHP evaluates assumptions annually or when significant plan adjustments occur and modifies them as appropriate. Pension and postretirement costs are allocated over the service period of the employees in the plan.

KFHP uses a discount rate to determine the present value of the future benefit obligations. The discount rate is established based on rates available for high-quality fixed-income debt at the measurement date whose maturity dates match the expected cash flows of the retirement plans.

Differences between actual and expected plan experience and changes in actuarial assumptions, in excess of a 10% corridor around the larger of plan assets or plan liabilities, are recognized into benefits expense over the expected average future service of active participants. Prior service costs and credits arise from plan amendments and are amortized into postretirement benefits expense over the expected average future service to full eligibility of active participants.

The defined benefit pension plan (Plan) administered by KFHP constitutes a single plan in which multiple employers who are related parties participate. The Employee Retirement Income Security Act provides for joint and several liability for all employers in the Health Plan's tax controlled group. The pension liability for Health Plan represents the estimated amount of liability for current and former employees of Health Plan only. Management believes it is remote that Health Plan would be required to pay benefits attributable to current or former employees of other controlled group members.

The other post-retirement benefits (primarily healthcare) are generally offered through a multiple-employer welfare plan (Health and Welfare Plan). Under the terms of the Health and Welfare Plan, each participating employer is legally liable for the benefits for their own employees and retirees, and the Employee Retirement Income Security Act does not specify joint and several liability for all employers participating in a multiple-employer welfare plan. Management believes it is remote that Health Plan would be required to pay benefits attributable to current or former employees of any other employers participating in the Health and Welfare Plan.

Guarantee Funds and Assessments

Health Plan participates in the State of Ohio Health Reinsurance Program Open Enrollment Pool. This pool is designed to provide reinsurance for small group plans. There was no liability at March 31, 2013 and December 31, 2012.

Health Plan is annually required to support the operations of the ODI through an administrative expenses assessment. There was no liability at March 31, 2013 and December 31, 2012.

2) Accounting Changes and Corrections of Errors

New Accounting Pronouncements

In March 2012, the NAIC adopted SSAP No. 92 *Accounting for Postretirement Benefits Other Than Pensions* and SSAP No. 102 *Accounting for Pensions*. These new statutory reporting standards are effective January 1, 2013. Companies may choose to recognize the effect of this guidance as of January 1, 2013 or adopt a phase in period of up to 10 years. Health Plan has elected a 10 year phase in period. Management has evaluated the effect of this guidance on Health Plan's financial statements for 2013. Effective January 1, 2013, Health Plan recorded additional liability for statutory reporting for retirement benefits of \$4.0 million. Had Health Plan chosen to adopt immediate recognition of the impact, an additional liability of \$76.7 million would have been required for statutory reporting as of January 1, 2013. Retirement benefits expense for statutory reporting now includes accruals for both vested and unvested plan participants. Statutory accounting principles in effect prior to these new standards did not require expense accruals for unvested plan participants. For additional information, see Note 12, *Retirement Plans, Deferred Compensation, Post-employment Benefits and Compensated Absences, and Post-retirement Benefit Plans*.

A - L

Health Plan is a subsidiary of Kaiser Foundation Health Plan, Inc. (KFHP). KFHP is affiliated with Kaiser Foundation Hospitals (Hospitals) because their governing boards and management are substantially the same. Health Plan contracts with Kaiser Foundation Hospitals to provide or arrange hospital services to members. Based upon the terms of the Hospital Service Agreement, Health Plan was charged \$16.6 million and \$52.3 million by Hospitals for the three months ended March 31, 2013 and the year ended December 31, 2012, respectively.

Costs of services provided by KFHP and Hospitals to Health Plan were based on the actual cost incurred to provide those services. Services provided include, but are not limited to the following: information technology, treasury, general management, administrative support, and transaction processing. In addition to the services noted above, effective January 2013, many of Health Plan's accounts payable and accounting transactions are processed by KFHP under the terms of the amended Administrative Services Agreement. Charges for services provided by KFHP and Hospitals were approximately \$13.3 million and \$57.6 million for the three months ended March 31, 2013 and the year ended December 31, 2012, respectively. 12) Retirement Plans, Deferred Compensation, Post-employment Benefits and Compensated Absences, and Post-retirement Benefit Plans

a. Defined Benefit Plan- Pension

Health Plan participates with affiliated organizations in a defined benefit pension plan covering substantially all its employees. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

The pension plan is administered by KFHP. Plan assets for Health Plan are not segregated and, accordingly, are not disclosed below. However, KFHP separately accounts for Health Plan liability and expense, and KFHP allocates pension expense and related prepaid or accrued benefit costs to Health Plan based on participant demographics and plan provisions.

Beginning January 1, 2013, Hospitals waived, on a prospective basis, certain amounts of interest on the Notes issued as of December 19, 2012, and any notes issued after December 19, 2012, to the extent interest due per the terms of the Notes exceeds the cost of debt to hospitals, which is determined on a monthly basis. The waiver extends for four consecutive rolling quarters, subject to termination and reversion by Hospitals. Hospitals will provide notice 30 days prior to the start of any quarter, informing Health Plan of the termination of the waiver and that the interest rate will

20) Fair Value Measurements

A - B Health Plan has no assets or liabilities that are measured and reported at fair value in the statement of financial position after initial recognition.

C Health Plan utilizes a three-level valuation hierarchy for fair value measurements. An instrument's categorization within the hierarchy is based upon the lowest level of input that is significant to the fair value measurement. For instruments classified in Level 1 of the hierarchy, valuation inputs are quoted prices for identical instruments in active markets at the measurement date. For instruments classified in Level 2 of the hierarchy, valuation inputs are directly observable but do not qualify as Level 1 inputs. Examples of Level 2 inputs include: quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in inactive markets; other observable inputs such as interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates; and market-correlated inputs that are derived principally from or corroborated by observable market data. For instruments classified in Level 3 of the hierarchy, valuation inputs are unobservable inputs for the instrument. Level 3 inputs incorporate assumptions about the factors that market participants would use in pricing the instrument.

Investments are reported at lower of amortized cost or fair value, with impairment recorded if amortized cost is greater than fair value. The fair values of investments are based on quoted market prices, if available, or estimated using quoted market prices for similar investments. If listed prices or quotes are not available, fair value is based upon other observable inputs or models that primarily use market-based or independently sourced market parameters as inputs. In addition to market information, models also incorporate transaction details such as maturity. Fair value adjustments, including credit, liquidity and other factors, are included, as appropriate, to arrive at a fair value measurement.
