Loan loss estimates are computed based on historical loan delinquency and foreclosure statistics and projecting future delinquencies and losses under multiple economic scenarios including various home price changes and employment estimates, as well as servicer style and the foreclosure rules for each state. Total projected losses for all mortgages in each deal are then compared to the credit support (subordination plus over collateralization) to determine the percentage of principal loss expected for each tranche. 25. Change in Incurred Losses and Loss Adjustment Expenses

Loss & lae reserves as of December 31, 2012 were \$30,978,000. As of June 30, 2013, \$16,783,000 has been paid for incurred loss & lae expenses attributable to insured events or prior years. Reserves remaining for prior years are now \$15,598,000 as a result of re-estimation of unpaid claims and lae expenses. Therefore, there has been a \$1,403,000 unfavorable prior year development from 12/31/2012 to 06/30/2013 principally on liability lines of business.

We saw development of year-end 2012 reserves of \$1,403,000. Over half of this is from the 2012 accident year, about 15% from the 2011 accident year, and the balance from prior years. The variance is a result of an earlier recognition of Bodily Injury Liability exposures due to a reworking of the claims handling process. BI exposures are being set up earlier than in past accident periods, and manual reserve adjustments are also up, as the investigation of potential liability is being more closely evaluated and at an earlier point in time than prior. This process affected both newly reported claims, and many open exposures. Georgia, New York and Texas combined for more than half of the adverse development due to claim frequency and severity coming in higher than projected at year-end 2012.

The development is generally the result of an ongoing analysis of recent loss development trends and are increased or decreased as additional information becomes known regarding individual claims. The Company has no retrospectively rated policies that are subject to premium adjustments.
