20. Fair Value Measurements-
- A. For assets that are measured and reported at fair value in the statement of financial position after initial recognition , the valuation techniques and the inputs used to develop those measurements are as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets , quoted prices from those willing to trade in markets that are not active , or other inputs that are observable or can be corroborated by market data for the term of the instrument . Such inputs include market interest rates and volatilities , spreads and yield curves .

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement . Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date .

The Company has no liabilities that are measured at fair value in the statement of financial position .

- (2) At June 30, 2013, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 3.
- (3) The Company's policy for determining when transfers between levels is required is based upon change in the inputs used to determine fair value measurement . If an input changes , the Company evaluates the new input (s) and makes the determination whether or not a transfer between levels is appropriate . If an asset or liability is transferred between levels , it is the Company's policy to record the transfer as of the beginning of the quarter in which the transfer occurs . The Company held no assets or liabilities categorized as Level 1 , 2 or 3 during the reporting period that were transferred into or out of the level categorization held at January 1 , 2013.
- (4) As of June 30, 2013, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 2 or Level 3 . Historically , fair values in the Level 2 category are provided by independent pricing services . Where independent pricing services provide fair values , the Company has obtained an understanding of the methods , models and inputs used in pricing , and has controls in place to validate that amounts provided represent current fair values . Estimated fair values of investments categorized as Level 3 generally include inputs for which no readily observable inputs are available and require management judgment .
- (5) As of June 30, 2013, the Company had no holdings classified as either a derivative asset or liability .

- B. Combining Fair Value Information- Not required
- C. The method (s) and significant assumptions used to estimate the fair value of financial instruments are as follows:

*Investment Securities* -Fair values for bonds , are based on the values prescribed by an independent pricing service or from brokers . For bonds that are not actively traded , estimated fair values are based on values of bonds of comparable yield and credit quality . The fair values for common stocks are based on quoted market prices , where available , which are provided to the Company by an independent pricing service .

*Short-term investments , Receivables for securities , Uncollected premiums and agents' balances in the course of collection , Deferred premiums , agents' balances and installments booked but deferred and not yet due , and Payable for securities* - The carrying amounts reported as admitted assets or liabilities for these financial instruments approximate their fair values due to the short-term nature of these financial instruments .

*Other Invested Assets* - The estimated fair value of publicly traded limited partnerships is based on the values prescribed by an independent pricing service .
