### 20. FAIR VALUE MEASUREMENT

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

*Level 1* — Quoted (unadjusted) prices for identical assets in active markets.

*Level 2* — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.)
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.)
- Inputs that are derived principally from or corroborated by other observable market data

*Level 3* — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds, short-term investments, and preferred stocks (“investments”) are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (“pricing service”), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. Based on the Company’s internal price verification procedures and review of fair value methodology documentation provided by independent pricing services, the Company has not historically adjusted the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.
