NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Scottsdale Indemnity Company (the Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Insurance Department recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

3. Not applicable.
4. Not applicable.
5. The Company reviews all loan-backed and structured securities in which the fair value of the given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, and the quality of any credit guarantors, to determine the cash flows expected to be received for the security.

If the severity and duration of the security's unrealized loss indicates a risk of an other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized cost basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

Note 20 – Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial assets and liabilities into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes financial assets and liabilities as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, U.S. LIBOR, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimate about the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for financial assets and liabilities quarterly. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the period in which the change occurs.

To determine the fair value of bonds and stocks for which market quotations are available, independent pricing services are most often utilized. For these bonds and stocks, the Company obtains the pricing services' methodologies, inputs and assumptions and classifies the investments accordingly in the fair value hierarchy.

A corporate pricing matrix or an internally developed pricing model is used in valuing certain bonds. The corporate pricing matrix is developed using private spreads for bonds with varying weighted average lives and credit quality ratings. The weighted average life and credit quality rating of a particular bond to be priced using the corporate pricing matrix are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

NOTES TO FINANCIAL STATEMENTS

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when quotes are not available from independent pricing services, corporate pricing matrix or internal pricing models. These bonds are classified accordingly in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers as the brokers often do not provide the necessary transparency into their quotes and methodologies. Broker quotes are subject to validation of price movements that require approval from the Company's management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment's fair value.

Fair value of derivative instruments is determined using various valuation techniques relying predominately on observable market inputs. These inputs include interest rate swap curves, credit spreads, interest rates, counterparty credit risk, equity volatility and equity index levels. In cases where observable inputs are not available, the Company will utilize non-binding broker quotes to determine fair value and these instruments are classified accordingly in the fair value hierarchy.

No financial assets or liabilities were carried at fair value as of September 30, 2013.

The following table summarizes aggregate carrying value and fair value, by level, for all financial assets and liabilities, excluding assets and liabilities reported at fair value, as of September 30, 2013:

Asterisk	Explanation
1	For the purposes of this schedule, Nationwide presumed control of these entities because they are owned by at least 10% and are not wholly-owned by a Nationwide entity.
2	Other ownership indicates a non-ownership circumstance by a Nationwide entity.
