NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. The accompanying financial statements of The American Insurance Company ("the Company") have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners ("NAIC") and the State of Ohio.

Note 2 - Accounting Changes and Corrections of Errors

In March 2012, the NAIC issued SSAP No. 92 – Accounting for Postretirement Benefits Other Than Pensions (SSAP No. 92) and SSAP No. 102 – Accounting for Pensions (SSAP No.102). The primary change introduced by these SSAPs is to recognize a liability for the unfunded amount of an employer's obligation for defined benefit plans. SSAP No. 92 requires that an employer that sponsors a defined benefit postretirement plan other than a pension shall recognize in its statement of financial position the funded status of the plan or plans. The status of each plan shall be measured as the difference between the fair value of the plan assets and the accumulated postretirement benefit obligation. SSAP No.102 requires for a defined benefit pension plan that if the projected benefit obligation exceeds the fair value of the plan assets, the employer shall recognize in its statement of financial position a liability that equals the unfunded projected benefit obligation. If the fair value of plan assets exceeds the projected benefit obligation, the employer shall recognize an asset that equals the overfunded projected benefit obligation. This asset would be nonadmitted. The Company adopted these SSAPs as of January 1, 2013. There was no impact on net income, surplus, total assets, or total liabilities as a result of adoption.

In March 2012, the NAIC issued SSAP No. 103 – Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (SSAP No. 103). SSAP No. 103 focuses on the issues of accounting for transfers and servicing of financial assets and extinguishments of liabilities. SSAP No. 103 clarifies that a transferor must determine whether it has surrendered control over transferred financial assets. That determination must consider the transferor's continuing involvements in the transferred financial asset, including all arrangements or agreements made contemporaneously with, or in contemplation of, the transfer, even if they were not entered into at the time of the transfer. SSAP No. 103 defines the term "*participating interest*" to establish specific conditions for reporting a transfer of a portion of a financial asset as a sale. If the transfer does not meet those conditions, a transferor should account for the transfer as a sale only if it transfers an entire financial asset or a group of entire financial assets and surrenders control over the entire transferred asset(s). If the transfer of a participating interest does not meet the conditions of a sale, it should be treated as a secured borrowing with a pledge of collateral. The transferor would continue to report the transferred financial asset in its statement of financial position with no change in the basis of accounting. The Company adopted SSAP No. 103 as of January 1, 2013 prospectively. There was no impact on net income, surplus, total assets, or total liabilities as a result of adoption.

In August 2012, the NAIC issued SSAP No. 104 – Share Based Payments (SSAP No. 104). This SSAP replaces SSAP No. 13 Stock Options and Stock Purchase Plan. SSAP No. 104 provides recognition guidance for share-based payment arrangements with employees. Under such arrangements, a reporting entity is to recognize in the financial statements the employee services received in exchange for the equity instruments issued or liabilities incurred and the related cost to the entity as those services are consumed. This SSAP establishes fair value as the measurement objective in accounting for share-based payment arrangements and requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees except for equity instruments held by employee stock ownership plans. The fair value of liabilities incurred in share-based payment transactions with employees shall be remeasured at the end of each reporting period through settlement. Changes in the fair value of a liability incurred under a share-based payment arrangement that occur during the requisite service period shall be recognized as compensation cost over that period. The accounting for an award of share-based payment shall reflect the substantive terms of the award and any related arrangement. The Company adopted SSAP No. 104 as of January 1, 2013 prospectively. There was no impact on net income, surplus, total assets, or total liabilities as a result of adoption.

Note 5 - Investments

D. Loan-backed securities-

1. Prepayment assumptions for loan-backed securities were obtained from the Bloomberg system.

2. During the period, the Company has not recognized any loan-backed securities as other-than-temporarily impaired based on the Company's intent to sell the security or inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis of the security.

3. The Company does not hold any loan-backed securities with a recognized other-than-temporary impairment based on the present value of cash flows expected to be collected being less than the amortized cost basis of the security.

4. Aggregate amount of fair values of loan-backed securities and aggregate amount of unrealized losses for impaired securities for which an other-than temporary impairment has not been recognized in earnings, segregated by those in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 months or longer:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months

\$19,016

2. 12 Months or Longer

\$-

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months

\$4,218,884

2. 12 Months or Longer

\$-

5. The Company has a quantitative and qualitative process for identifying loan backed securities that are in an unrealized loss position and evaluating whether impairments are other than temporary. This begins with evaluating the amount and extent of time that a security is in an unrealized loss position to identify securities where all contractual cash flows may not be collected. From this point, the Company will further analyze certain securities considering information such as ratings and the underlying collateral (e.g., delinquency rates, collateral coverage, loan characteristics). The Company also performs cash flow analysis which can result in certain securities in an unrealized loss position not being impaired because the Company believes future cash flows can still support the current carrying values.

Note 20 - Fair Value

- A. Inputs used for Assets and Liabilities Reported at Fair Value
 - 1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3 as of September 30, 2013

The Company reviews its fair value hierarchy classifications quarterly. This review could reveal that previously observable inputs for specific assets or liabilities are no longer available or reliable. For example, if the market for a Level 1 asset becomes inactive, the Company may need to adopt a valuation technique that relies on unobservable components causing the asset to be transferred to Level 2 or Level 3. Alternatively, if the market for a Level 3 asset or liability becomes active, the Company will report a transfer out of Level 3. Transfers in or out of Level 3 are reported as of the beginning of the period in which the change occurs. During 2013, there were no transfers of assets or liabilities from one level of the fair value hierarchy to another.

NOTES TO FINANCIAL STATEMENTS

The Company does not carry any assets or liabilities that are measured and reported at fair value as of September 30, 2013.

2. Roll forward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the level 3 category of the fair value hierarchy.

3. Policy on Transfers Into and Out of Level 3

See discussion above for a description of the company’s policy for determining when transfers between levels are recognized.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company has analyzed the valuation techniques and related inputs, evaluated its assets and liabilities reported at fair value, and determined a fair value hierarchy level based upon trading activity and the observability of market inputs consistent with SSAP 100, Fair Value Measurement. Based on the results of this evaluation and investment class analysis, each valuation was classified into Level 1, 2, or 3. An asset’s or a liability’s classification is based on the lowest level input that is significant to its measurement.

Bonds included in the level 2 categorization above include NAIC 3 through 6 rated bonds valued at the lower of cost or NAIC fair value. The fair values of these bonds are based on SVO prices, then quoted market prices in active markets when available. Based on the market data, the securities are categorized into asset class, and based on the asset class of the security, appropriate pricing applications, models, and related methodology and standard inputs are utilized to determine what a buyer in the market place would pay for the security in a current sale. When quoted prices are not readily available or in an inactive market, standard inputs used in the valuation models, listed in approximate order of priority, include, but are not limited to, benchmark yields, reported trades, municipal securities rulemaking board (MSRB) reported trades, nationally recognized municipal securities information repository (NRMSIR) material event notices, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. In certain cases, including private placement securities as well as certain difficult-to-price securities, internal pricing models may be used that are based on market proxies.

5. Derivative Fair Values

The entity does not hold any derivative assets or liabilities measured at fair value.

B. Other Fair Value Disclosures: Not applicable.
