STATEMENT AS OF SEPTEMBER 30, 2013 OF THE Lafayette Life Insurance Company

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of The Lafayette Life Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (the Department).

The Department recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company. The National Association of Insurance Commissioners’ (NAIC) *Accounting Practices and Procedures* manual, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Department has the right to permit other specific practices that deviate from prescribed practices. There are no differences between the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements. No change.

C. Accounting Policy. No change.

2. Accounting Changes and Corrections of Errors

The Company made the following accounting changes in 2012:

The Company changed the statutory reserve valuation for certain fixed rate, fixed term funding agreements from account value to CARVM. SSAP No. 51 – *Life Contracts* requires such a change in valuation basis to be recorded directly to surplus rather than as a part of the reserve change recognized in the summary of operations. The Company has recorded \$4.9 million directly as an increase to surplus as a result of the change in valuation basis through the Change in Reserve on Account of Valuation Bases on the Summary of Operations.

The Company has changed to the 2001 CSO mortality table from the 1980 CSO mortality table for determining statutory reserves for certain traditional life policies. SSAP No. 51 – *Life Contracts* requires such a change in valuation basis to be recorded directly to surplus rather than as a part of the reserve change recognized in the Summary of Operations. The Company has recorded \$3.9 million directly as an increase to surplus as a result of the change in valuation basis through the Change in Reserve on Account of Valuation Bases line on the Summary of Operations

Effective January 1, 2012, the Company adopted Statement of Statutory Accounting Principle No. 101, *Income Taxes, a Replacement of SSAP No. 10R and SSAP No. 10* (SSAP 101). SSAP 101 amends the deferred tax asset admittance test set forth in SSAP 10R, *Income Taxes – A Temporary Replacement of SSAP 10* (SSAP 10R), by limiting the admissibility thresholds based on current period risk-based capital levels and modifying disclosure requirements. In addition, SSAP 101 no longer requires admitted deferred tax assets above certain thresholds to be classified as aggregate write-ins for other than special surplus funds.

The adoption of SSAP 101 resulted in an increase to statutory surplus of \$0.8 million at January 1, 2012, which is reflected on the cumulative effect of changes in accounting principles line (line 49) on the Summary of Operations page In addition, the Company reclassified \$10.4 million on the Liabilities, Surplus and Other Funds page from aggregate write-ins for other than special surplus funds (line 34) to unassigned funds (line 35).

4. Discontinued Operations. No change.

STATEMENT AS OF SEPTEMBER 30, 2013 OF THE Lafayette Life Insurance Company

NOTES TO FINANCIAL STATEMENTS

14. Contingencies

The Company is currently being audited on behalf of multiple state treasurers and controllers concerning the identification, reporting and escheatment of unclaimed insurance policy benefits and other allegedly abandoned funds. The audits focus on identifying unreported death claims, matured annuities and retained asset accounts, and the use of the Social Security Death Master File to identify deceased insurance policy, annuity contract, and retained asset account holders. The Company has reached an agreement with numerous states regarding this audit activity that will result in outreach and payments to beneficiaries, escheatment of funds deemed abandoned under state laws, and accelerated escheatment of funds deemed abandoned pursuant to agreements with regulators. The amount of loss that the Company will ultimately recognize as a result of these audits cannot be reasonably estimated.

The West Virginia Treasurer (who has not settled with the Company) has brought suit seeking to require the Company to annually check the Social Security Death Master File for deceased insureds, and alleging that the Company’s previous failure to do so has rendered its unclaimed property reports incomplete and fraudulent. The Treasurer seeks attorney fees, interest and penalties for allegedly willful misconduct and fraudulent reporting, and other, varied relief (including identification and payment of death claims). The amount of loss, if any, that the Company may ultimately recognize as a result of this litigation cannot be reasonably estimated.

The Company is also currently the subject of multistate insurance department regulatory inquiries and examinations with a similar focus as the state treasurer and controller audits regarding processes and procedures for identifying deceased insurance policy, annuity contract, and retained asset account holders. The examination activity may result in (but is not necessarily limited to) required outreach and payments to beneficiaries, changes to procedures, and administrative contributions. The amount of loss, if any, that the Company may ultimately recognize as a result of these examinations cannot be reasonably estimated.

15. Leases. No change.

16. The Company had no financial instruments with off-balance sheet risk. No change.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities. No change.

18. Gain or Loss to the Reporting Entity from Uninsured A&H Plans and the Uninsured Portion of Partially Insured Plans. No change.

19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators. No change.

- (3) The Company’s policy is to recognize transfers in and transfers out of levels at the beginning of the reporting period.
- (4) The derivatives in Level 3 consist of options on the S&P 500 Index and are valued using a valuation model and inputs from outside sources. The models include the Black-Scholes-Merton model for point to point options, spreads and average (SPAV) algorithm model for monthly average options and a Monte Carlo model monthly cap (cliquet) options. The SPAV model is provided by Financial Engineering Associates of Berkley, California.

The assumptions used are derived from outside sources. Bloomberg Investment Services supplies the S&P Index level, the dividend yield and the London Interbank Offering (interest) Rates (LIBOR). Investment banks supply estimates of the implied volatility surface. Other than interpolation of the interest rates and implied volatility rates all inputs are provided by the outside sources.

Investments in Level 2 include NAIC rated 6 industrial & miscellaneous bonds. These securities are currently rated below investment grade. The Company determined fair value as of the balance sheet date through the use of third-party pricing services utilizing market observable inputs.

The fair value of common stock has been determined utilizing publicly quoted prices from third-party pricing services.

The following table provides a summary of the significant unobservable inputs used in the fair value measurements developed by the Company or reasonably available to the Company of Level 3 assets and liabilities at September 30, 2013:

| Security Type | Fair Value | Valuation Technique | Unobservable Output | Range |
|------------------------|-----------------|--|----------------------------|---------------|
| Derivative Assets | \$ 56,920,743 | Black-Scholes-Merton Model Spreads and Average Algorithm Model Monte Carlo Model | S&P 500 Implied Volatility | 12.9% - 32.0% |
| Derivative Liabilities | \$ (41,961,773) | Black-Scholes-Merton Model Spreads and Average Algorithm Model | S&P 500 Implied Volatility | 12.9% - 33.0% |

In isolation, significant increases (decreases) in the S&P 500 implied volatility would typically result in a significantly higher (lower) fair value measurement for Level 3 derivative assets and Level 3 derivative liabilities.

- C. The carrying amounts and fair values of the Company’s significant financial instruments were as follows:

The following discussion describes the valuation methodologies utilized by the Company for assets and liabilities measured or disclosed at fair value. Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including discount rates, estimates of timing, amount of expected future cash flows and the credit standing of the issuer. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. For Level 3 investments, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. As described below, certain fair values are determined through the use of third-party pricing services. Management does not adjust prices received from third-parties; however, we do analyze the third party pricing services’ valuation methodologies and related inputs and perform additional evaluation to determine the appropriate level within the fair value hierarchy. Care should be exercised in deriving conclusions about the Company’s business, its value or financial position based on the fair value information of financial instruments presented below.

Debt Securities and Surplus Notes

The fair values of actively traded debt securities, asset/mortgage-backed securities, and surplus notes have been determined through the use of third-party pricing services utilizing market observable inputs. Less liquid private placement securities and auction rate securities trading in less liquid or illiquid markets with limited or no pricing information are valued using either broker quotes or by discounting the expected cash flows using current market-consistent rates applicable to the yield, credit quality and maturity of each security.

Equity Securities

The fair values of actively traded equity securities have been determined utilizing publicly quoted prices obtained from third-party pricing services. The fair values of certain equity securities for which no publicly quoted prices are available have been determined through the use of third-party pricing services utilizing market observable inputs. Actively traded mutual funds are valued using the net asset values of the funds.

Mortgage Loans

The fair values for mortgage loans, consisting principally of commercial real estate loans, are estimated using discounted cash flow analyses, using interest rates currently being offered for similar loans collateralized by properties with similar investment risk. The fair values for mortgage loans in default are established at the lower of the fair value of the underlying collateral less costs to sell or the carrying amount of the loan.

Cash, Cash Equivalents and Short-Term Investments

The fair values of cash, cash equivalents and short-term investments are based on quoted market prices.

Securities Lending Reinvested Collateral Assets

The fair value of securities lending reinvested collateral assets are from third-party sources utilizing publicly quoted prices.

Derivative Instruments

The fair values of free-standing derivative instruments, primarily call options, are determined using valuation models incorporating significant unobservable inputs, including projected discounted cash flows, applicable swap curves and implied volatilities.

Life and Annuity Reserves for Investment-type Contracts and Deposit Fund Liabilities

The fair value of liabilities for investment-type contracts is based on the present value of estimated liability cash flows. Present values reflect the Company’s margin for uncertainty of the timing of liability cash flows. Key assumptions to the cash flow model include the timing of policyholder withdrawals and the level of interest credited to contract balances.

Fair values for insurance reserves are not required to be disclosed. However, the estimated fair values of all insurance reserves and investment

contracts are taken into consideration in the Company’s overall management of interest rate risk.

Securities Lending Liability

The liability represents the Company’s obligation to return collateral related to securities lending transactions. The liability is short-term in nature and therefore, the fair value of the obligation approximates the carrying amount.
