NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

The National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Ohio.

Note 20 – Fair Value Measurements

- a. The Company’s financial assets measured at fair value include bonds valued at the lower of cost or fair value when reported at fair value at the balance sheet date. As of September 30, 2013 and December 31, 2012, the Company had no bonds carried at fair value in the financial statements.

Financial instruments (bonds) that are subject to fair value disclosure requirements are carried in the financial statements at amortized cost. The fair values used for financial instruments are estimates, which in many cases may differ significantly from the amounts, which could be realized upon immediate liquidation.

The Company’s financial assets have been classified based upon a hierarchy defined by SAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset’s or a liability’s classification is based on the lowest level input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument’s fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The Company estimates fair values of bonds using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available and other market information that a market participant may use to estimate fair value. The internal pricing methods are performed by the Company’s investment professionals, and generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little to no market activity for the same or similar instruments, the fair value is estimated using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgment that becomes significant with increasingly complex instruments or pricing models.
