## NOTES TO FINANCIAL STATEMENTS

### 1. Summary of Accounting Policies

#### Basis of Accounting

The financial statements are prepared using accounting principles prescribed or permitted by the Insurance Department of the State of Ohio. Under this method, the Fund does not record prepaid expenses or recognize income on unbilled exit assessments. Accounts receivable that are uncollected after 90 days are reported as "nonadmitted" assets. Bonds are recorded at amortized cost.

#### Cash and Cash Equivalents

The Company considers cash and short term investments purchased with a maturity of three months or less to be cash equivalents. Such short-term investments are stated at fair value (level 1). These accounts may exceed federally insured amounts at times.

#### Investment Valuations and Income Recognition

As of December 31, 2013, the Fund's investments, held by Huntington Bank and managed by Bahl & Gaynor Investment Counsel, are not covered by federal insurance.

Statutory accounting guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy are as follows:

Level 1- Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

The Fund's investment in short-term investments reported as cash equivalents, common stock and preferred stock are stated at fair value as determined by quoted market prices on the last business day of the year (Level 1).

The Fund's investment in bonds is stated at amortized cost and amortized on the constant yield method over the expected life of the bond. For the purposes of assessing impairment and making disclosures, the fair value of investments in bonds is determined by quoted market prices on the last business day of the year (Level 1).

Purchases and sales of investments are recorded on a trade-date basis. Interest income recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Investment income receivable which is deemed uncollectible is charged off against investment income during the period in which the determination is made. Investment income receivable that is more than 90 days past due is treated as a non-admitted asset. The Fund deems all investment income receivable, none of which was more than 90 days past due, as fully collectible at December 31, 2013 and 2012.

#### Premiums Due and Unpaid

Premium due and unpaid represent amounts due to the Fund. Accounts receivable that are uncollected after 90 days are to be reported as "non-admitted" assets. Changes to "non-admitted assets" are shown on the Statements of Changes in Surplus.

#### Unearned Premiums

Unearned premiums represent contributions received by the Fund for future periods of service. These contributions are recognized as premiums earned in the period earned.

#### Estimates

The preparation of financial statements in conformity with the accounting principles prescribed or permitted by the Insurance Department of the State of Ohio requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

#### Concentrations of Credit Risk

Concentrations of credit risk arise due to the Fund operating solely in the printing industry in the Greater Cincinnati area. Consequently, these operations and the associated credit risk may be affected, either positively or negatively, by changes in economic conditions in this geographical area.

#### Estimated Liability for Claims Incurred But Not Reported

Fund obligations for health claims incurred but not reported, by active participants are estimated at present

Postretirement Benefits		
The amount reported as the postretirement benefit obligation represents the actuarial present value of those estimated future benefits that are attributed by the terms of the plan to employees for service rendered to the date of the financial statements, reduced by the actuarial present value of contributions expected to be received in the future from retirees. Postretirement benefits include future benefits expected to be paid to or for (1) currently retired or terminated employees and their beneficiaries and dependents and (2) active employees and their beneficiaries and dependents after retirement from service with participating employers. The postretirement benefit obligation represents the amount that is to be funded by contributions from the retirees. Prior to an active employee's full eligibility date, the postretirement benefit obligation is the portion of the expected postretirement benefit obligation that is attributed to that employee's service in the printing industry rendered to the valuation date.		
The actuarial present value of the expected postretirement benefit obligation was determined by an actuary and is the amount that results from applying actuarial assumptions to historical claims-cost data to estimate future annual incurred claims costs per participant and to adjust such estimates for the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as those for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

**Benefit Obligations**

The projected increase in covered health benefits at December 31, 2012 was 7% for 2013, 6% for 2014-2020 and graduated down to 4% thereafter. The projected increase in covered health care benefits at December 31, 2011 was 8% for 2011 graduated to 4% for 2016 and thereafter. The weighted-average health care cost-trend rate assumption has a significant effect on the amounts reported in the accompanying financial statements. If the assumed rates increased by one percentage point in each year it would increase the obligation as of December 31, 2012 by \$7,461,831.
