1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**A. Accounting Practices**

The financial statements of Great American Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Company has no prescribed or permitted practices that would result in differences between NAIC Statutory Accounting Principles (SAP) and the state of Ohio basis, as shown below:

	State of Domicile	2013	2012
Net income state basis	Ohio	\$ 273,730,253	\$ 141,061,234
Effect of state prescribed practices	Ohio	-	-
Effect of state permitted practices	Ohio	-	-
Net income, NAIC SAP		<u>\$ 273,730,253</u>	<u>\$ 141,061,234</u>
Statutory surplus state basis	Ohio	\$ 1,403,302,522	\$ 1,469,644,876
Effect of state prescribed practices	Ohio	-	-
Effect of state permitted practices	Ohio	-	-
Statutory surplus, NAIC SAP		<u>\$ 1,403,302,522</u>	<u>\$ 1,469,644,876</u>

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Investments – Invested asset values are generally stated as follows:

Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. For residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and loan-backed and structured securities (LBASS), the NAIC has retained third-party investment management firms to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based not only on the probability of loss, but also the severity of loss. Those RMBS, CMBS and LBASS securities that are not modeled but receive a current year Acceptable Rating Organizations (ARO) rating are subject to the Modified FE process which determines the appropriate NAIC designations and Book Adjusted Carrying Values.

Redeemable preferred stocks rated RP1 and RP2 are stated at amortized cost; perpetual preferred stocks rated P1 and P2 are stated at fair value; all others are stated at the lower of cost, amortized cost, or fair value.

Common stocks are stated at fair value except investment in subsidiaries. Investments in insurance subsidiaries are stated at the statutory equity in net assets plus any applicable remaining goodwill. Goodwill is amortized on a straight-line basis over ten years. Investments in non-insurance subsidiaries are stated at NAIC specified values.

Mortgage loans on real estate are stated at the aggregate unpaid balance, net of unamortized discount.

Real estate or property acquired in satisfaction of debt are stated at the lower of depreciated cost or fair value.

Short-term investments are stated at cost.

Other invested assets are stated at the lower of cost or fair value, except investments in limited partnerships and limited liability companies. Investments in limited partnerships and limited liability companies are stated at the underlying audited GAAP equity.

Derivatives – Investment in foreign currency forward contracts are used to hedge foreign currency exchange risk associated with foreign denominated investments and are carried at fair value. Investment in commodity future contracts are used to hedge the commodity price risk associated with certain multi-peril crop insurance products and are carried at fair value. (See Note 8)

Reverse Repurchase Agreements – The Company enters into daily reverse repurchase agreement transactions whereby the Company loans cash to an accredited bank on an overnight basis and receives US Government backed securities pledged as general collateral against the cash borrowed. The loaned funds are repaid on the next business day. The Company's exposure to credit risk is limited, as these transactions are typically overnight arrangements. The Company has counterparty exposure on reverse repurchase agreements in the event of a counterparty default to the extent the general collateral security's value is below the cash which was delivered to acquire the collateral. The short-term duration of the transactions (primarily overnight investing) reduces the default exposure. (See Schedule E – Part 2)

Unpaid Losses and Loss Adjustment Expenses – The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses (including possible development on known claims) based on past experience; (d) estimates based on experience of expenses for investigating and adjusting claims; and (e) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental, and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency and other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the Statement of Income in the period in which determined. Despite the variability inherent in such estimates, management believes the liabilities for unpaid losses and loss adjustment expenses are adequate.

Retroactive Reinsurance – Amounts reported as retroactive reinsurance ceded are included in the Aggregate Write-in for Liabilities as a negative liability and such amounts are not included in Schedule P. Gains from retroactive reinsurance are reported as a segregated surplus account included in Aggregate Write-ins for Special Surplus and are not reported as earned surplus until the Company has recovered amounts in excess of the consideration paid.

Premium Deficiency Reserve – The Company does not use anticipated investment income as a factor in premium deficiency calculations.

Premium Recognition – Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Generally, for direct business, such reserves are computed by pro rata methods. For certain collateral protection products, earned premium and unearned premium reserves are computed consistent with the proportion of the total exposure provided throughout the term of the contract. For assumed business, unearned premium reserves are based on reports received from ceding companies for reinsurance.

Underwriting Expense Recognition – Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Non-Admitted Assets – Certain assets designated as “non-admitted”, in accordance with Statement of Statutory Accounting Principles (SSAP) No. 4 Assets and Non-Admitted Assets, are excluded from the statutory balance sheet and such amounts are charged directly to unassigned funds.

In 2013, the Company entered into foreign currency forward contracts to hedge the foreign currency exchange risk associated with a foreign denominated investment in an affiliated bond. These foreign currency forward contracts do not qualify for hedge accounting. The fair value of open foreign currency forward contracts is reported as either a derivative asset or a derivative liability as appropriate for each contract. Any change in fair value of these open contracts is reported in change in net unrealized capital gains/losses until settled. Any realized capital gains/losses at settlement are reported in net realized capital gains/losses.

In 2013, the Company also entered into commodity futures contracts to hedge the commodity price risk associated with the price component of certain multi-peril crop insurance products. These futures contracts require the company to place funds in a margin account as collateral. The balance of this margin account at 12/31/2013 was \$148,475. In addition, participating employees are permitted to make 401(k) Contributions to the Plan. Matching Contributions may be made by the Company based on the amount of 401(k) Contributions made by the participating employees. 20. FAIR VALUE MEASUREMENTS

- A. Inputs Used for Assets and Liabilities Measured at Fair Value

- 1. The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments include corporate and municipal fixed maturity securities and MBS priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, American Money Management Corporation ("AMMC") (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

The Company has categorized its assets and liabilities measured at fair value into the three-level fair value hierarchy as reflected in the following table.

For claims arising on direct written business, case reserves are established by claim using estimated settlement values and the relative merits of each case. For claims arising from reinsurance assumed, reserves are booked as reported by the ceding company. IBNR reserves are established to supplement case reserves and to establish allocated loss adjustment expense reserves.
