General Notes

1. Summary of Significant Accounting Policies-
- A. Accounting Practices
- The financial statements of American Select Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.
- The Ohio Department of Insurance recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.
- The Company has not implemented any prescribed or permitted accounting practices by the State of Ohio that differ from those found in NAIC SAP.

- B. Use of Estimates in the Preparation of the Financial Statements
- The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.
- C. Accounting Policy
- Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.
- Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable. In addition, the Company uses the following accounting policies:
- (1) Short-term investments are reported in the same manner as similar long-term investments per Statements of Statutory Accounting Principles (SSAP) No. 2.

(2) Bonds not backed by other loans are stated at amortized cost using the scientific interest method per SSAP No. 26.

(3) Common stocks are stated at market per SSAP No. 30, except for investments in stocks of uncombined subsidiaries in which the Company has an interest of 20% or more, which are carried on the equity basis per SSAP No. 97.

(4) Redeemable preferred stocks, which have underlying characteristics of debt, are stated at amortized cost. Perpetual preferred stocks are stated at cost. Preferred stocks with NAIC designations 3 - 6 are stated at the lower of cost, amortized cost, or fair value in accordance with SSAP No. 32.

(5) The Company does not hold any mortgage loans.

(6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. The retrospective adjustment method is used to value all securities. If a security has been written down due to an other-than-temporary impairment, the prospective adjustment method is used subsequent to the loss recognition in accordance with SSAP No. 43R.

(7) The Company has no subsidiaries, controlled or affiliated company investments.

(8) The Company has minor ownership interests in partnerships. These have underlying characteristics of common stock and are carried at market value per SSAP No. 30.

(9) The Company does not invest in derivative instruments.

(10) The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property-Casualty Contracts - Premiums.

(11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and, while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined. The Company has limited exposure to asbestos and environmental claims and management believes the reserve for such claims is adequate.

(12) The Company has not modified its capitalization policy from the prior period.

Weighted-average assumptions used to determine projected benefit obligations as of Dec. 31:

d. Weighted average discount rate	5.13%	4.23%	5.06%	4.14%	4.93%	3.89%
e. Rate of compensation increase*	3.00%	3.00%	NA	NA	3.00%	NA

* Rate of compensation increase assumed to be 3.0% for 2012-2015; and 3.5% for 2016+.

For measurement purposes, a 7.25% annual rate of increase in the per capita cost of covered health care benefits was assumed for 2013 (7.50% for 2012). The rate is assumed to decrease to 7.00% for 2014, then decrease gradually to 5.00% for 2022, and remain at that level thereafter.

The measurement date (annual valuation) used to determine other postretirement benefit measurements for postretirement benefit plans that make up at least the majority of plan assets and benefit obligation is December 31 (based on January 1 participant data). The fair market value of assets is measured and updated as of December 31.

(9) The amount of the accumulated benefit obligation for the defined benefit Pension Plan was \$276,072,455 for 2013 and \$295,144,322 for 2012. The amount of the accumulated benefit obligation for the Nonqualified Plan was \$57,511,771 for 2013 and \$59,077,576 for 2012.

(10) In addition to pension benefits, OFIC provides certain health care and life insurance benefits for retired employees and their eligible dependents via the Ohio Farmers Insurance Company Group Health Benefit Plan and Ohio Farmers Insurance Company Group Life Insurance Plan (Postretirement Benefit Plans). Employees who meet the requirements for retirement and other eligibility prerequisites are eligible for these benefits. OFIC's future obligation for annual medical and dental costs is generally limited to between \$1,500 and \$6,500 per covered individual based on age and years of service. New employees hired on January 1, 2002 or after are not eligible for the postretirement benefits under the OFIC Group Health Benefit Plan.

The OFIC Group Life Plan provides a flat \$15,000 postretirement life insurance benefit for all current and future retirees. The cost of postretirement benefits is accrued during the years after retirement eligibility occurs.

OFIC also sponsors a nonqualified Supplemental Executive Retirement Plan (SERP) and Supplemental Executive Retirement Compensation Plan (SERC). The SERP and SERC, which are unfunded, provide benefits to eligible senior leadership positions based on average earnings, years of service, and age at retirement.

(11) Due to the caps in OFIC's postretirement health care plan, assumed health care cost trend rates have a limited effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates, including the effects of Medicare Part D subsidies, would have the following effects:

	1 Percentage Point Increase	1 Percentage Point Decrease
a. Effect on total of service cost and interest cost components	\$ (28,001)	\$ 25,496
b. Effect on postretirement benefit obligation	\$ (418,772)	\$ 383,840

(12) The following estimated future payments, which reflect expected future service, as appropriate, are expected to be paid in the years indicated:

Year(s)	Pension	Postretirement	Nonqualified	Total
a. 2014	\$ 12,555,719	\$ 2,367,916	\$ 4,291,199	\$ 19,214,834
b. 2015	13,210,879	2,250,194	4,255,097	19,716,170
c. 2016	13,911,699	2,203,493	4,212,792	20,327,984
d. 2017	14,667,964	2,167,244	4,163,887	20,999,095
e. 2018	15,471,066	2,164,427	4,121,468	21,756,961
f. 2019 through 2023	\$ 90,786,211	\$ 10,383,620	\$ 19,982,567	\$ 121,152,398

(13) OFIC may not have any regulatory pension plan contribution requirements for 2014; however, OFIC currently intends to make a voluntary contribution of approximately \$11.4 million to the defined benefit pension plan with reference to OFIC's contribution funding guidelines.

OFIC's contribution funding guidelines were developed during 2006 and address the contribution and funding limitations as adjusted by the Pension Protection Act Of 2006. The guidelines provide that OFIC will generally contribute an amount equal to the value of benefits earned each year regardless of whether or not a minimum contribution is required with an option to not fund in years where a minimum contribution is not projected during the subsequent five (5) years. Minimum required contributions will always be funded. Contributions are at the final discretion of the Ohio Farmers Insurance Company Board of Directors.

Additionally, OFIC's postretirement health care plan is contributory, with participants' contributions adjusted annually; the life insurance plan is non-contributory.

(14) Securities, Insurance Contracts, and other Employer Transactions - Not applicable.

(15) Prior service cost is amortized on a straight-line basis over participants' average future service, not on a weighted-average basis.

(16) Substantive commitment used as basis for accounting for the benefit obligation - Not applicable.

(17) Cost of providing special or contractual termination benefits recognized during the period - Not applicable.

(18) Explanation of significant change in the benefit obligation or plan assets not otherwise apparent - Not applicable.

(19) The amount and timing of plan assets expected to be returned in the next twelve months: None

(21) On January 1 , 2013, OFIC adopted SSAP No. 92, Accounting for Postretirement Benefits Other Than Pensions - A Replacement of SSAP No. 14 and SSAP No. 102, Accounting for Pensions - A Replacement of SSAP No. 89. The standards require insurers to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability and include non-vested employees in determining the plan obligations. In addition, a sponsor’s fiscal year end will be used as the measurement date for estimating the fair value of postretirement benefit assets and liabilities. The guidance contains a transition provision that gives insurers the option to recognize the initial impact to surplus over a period not to exceed 10 years. OFIC elected the transition option and estimated a surplus decrease of \$36.9 million, net of tax, and initially estimated it to be recognized over the next 5 years. This election was made at the date of transition and the following transition liability was reflected as a reduction in surplus during the 1st, 2nd and 3rd quarters of 2013:

Minimum Transition Liability - greater of:	Pension	Postretirement	Nonqualified	Total
-10% of calculated surplus impact	\$ 7,736,794	\$ 1,214,524	\$ 5,907,758

During the 4th quarter of 2013, the outside plan actuaries determined that it would be probable that the postretirement benefit plans would have favorable actuarial gains at 12/31/2013. In accordance with SSAP No. 92 and 102, at 12/31/2013 management revised its estimate of the recognition of the transition liability. Based on the actuarial information, OFIC estimates that the unrecorded transition liability at 12/31/2013 will be fully recognized in 2014. Below is a recap of the 2013 activity:

	Pension	Postretirement	Nonqualified	Total
Transition liability at 1/1/2013	\$ 128,481,443	\$ 17,775,697	\$ 15,038,563	\$ 161,295,703

B. Plan asset information:

The defined benefit pension plan asset allocation as of the measurement date, December 31, and the target allocation, and the target asset allocations, presented as a percentage of total plan assets were as follows:

	2013	2012	Target Allocation
a. Debt Securities	37.0%	37.0%	35.0% - 45.0%
b. Equity Securities	62.0%	62.0%	55.0% - 65.0%
c. Real Estate	0.0%	0.0%	0.0%
d. Other	1.0%	1.0%	0.0%
e. Total	100.0%	100.0%	

OFIC’s policy of investment is based on a standard plan and formula. The investment plan and formula states that all assets of the pension trust except dividends and interest received from portfolio securities will be a part of the investment fund (formula). This income will be used to pay benefits, but may be allocated to the investment fund after an amount approximately equal to three months’ benefits have accumulated. The investment fund will normally consist of debt instruments, including those of governments, government agencies and publicly owned corporations and properly diversified number of common and/or preferred stocks of publicly owned corporations. The investment fund will be divided between these two normal portions. The debt instruments comprise the Bond Fund and shall be considered normal when it is 40% of the investment fund and is generally maintained in a range of 35.0% to 45.0% of the fund. The equities comprise the Stock Fund and shall be considered normal when it is 60% of the investment fund and is generally maintained in a range of 55.0% to 65.0% of the fund. The measurement date for these funds is December 31, annually.

The investments fund portfolio will have the following overall characteristics:

- (1) Complies with provisions of the Ohio Farmers Pension Trust Investment Plan and Formula
- (2) Above average financial quality
- (3) Broadly diversified
- (4) Liquidity requirements minimal
- (5) Fully invested (minimal cash reserves)
- (6) Growing investment income
- (7) Long term time horizon

Additionally the following constraints are placed on individual investments within the portfolio. In the case of equity investments, no equity shall be held unless:

- (1) Dividends are paid (except in the case of mutual funds), and
- (2) Foreign common stock may not exceed 15% of the common stock portfolio.

ANNUAL STATEMENT FOR THE YEAR 2013 OF THE American Select Insurance Company

NOTES TO FINANCIAL STATEMENTS

In the case of debt instruments , no debt shall be held unless:

- (1) Straight bonds will have a duration range of 7-10 years and be of BBB-/AAA quality ,
- (2) Foreign bonds may not exceed 15% of the bond fund , and
- (3) Convertible bonds may not exceed 20% of the bond fund and be of BBB- or higher quality , unless company is held in other portfolios .

The funds shall be managed by five trustees , elected by the Board of Directors , utilizing investment advice provided under an agreement with OFIC . The trustees annually review the investment plan and formula .

- (3) OFIC determines the fair value of its defined benefit pension plan and postretirement plan assets with a three-level hierarchy for fair value measurements that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs) and the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs) . The hierarchy level assigned to each security is based on management's assessment of the transparency and reliability of the inputs used in the valuation of such instruments at the measurement date .

OFIC's policy for determining when a transfer between levels is required is based upon change in the inputs used to determine fair value measurement . If an input changes , OFIC evaluates the new input (s) and makes the determination whether or not a transfer between levels is appropriate . If an asset or liability is transferred between levels, it is OFIC's policy to record the transfer as of the beginning of the reporting period in which the transfer occurs .

In 2013 , a CPCD with a fair value of \$909,000 was transferred from Level 3 of the fair value hierarchy to Level 2 and in 2012 , a CPCD with a fair value of \$909,000 was transferred from Level 2 of the fair value hierarchy to Level 3 . The transfers were related to the change in availability of readily observable market data from OFIC's independent vendor . There were no other transfers into or out of Level 1 , 2 or 3 during 2013 or 2012 .

- D. The long-term rates of return were determined using a combination of actual results and published market data . The rates are within the high and low ends of an expected return range . The low end of the range was calculated by multiplying the percentage of portfolio composition of each asset category by published historical return data for the category . The high end of the range was calculated by combining the published market data with actual historical returns for the pension plan weighting the percentages , 80% published and 20% historical .

The investment approach for Postretirement Benefit Plans follows the same conservative investment strategies as for the Pension Plan . In light of the shorter duration , however , more emphasis is placed on investments that provide a stable return to fund more current needs .

- E. Defined Contribution Plan

The Company's employees are covered by a qualified defined contribution pension plan (under IRC Section 401 (k)) sponsored by OFIC . The plan began operation on January 1 , 2000 , in accordance with "Safe Harbor" Treasury regulations .

Contributions of three percent (3%) of each employee's eligible compensation are made during the year . The Company's non-elective contribution for the plan was \$214,726 and \$194,583 for 2013 and 2012 , respectively .

At December 31 , 2013 , the total fair market value of the defined contribution plan assets was \$205,675,481 , including unrealized gains and losses and participant loans .

The Medicare Prescription Drug , Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003 . The Act includes the following two new features to Medicare Part D that could affect the measurement of the accumulated postretirement benefit obligation (APBO) and net periodic postretirement cost for the Plan:

- a. A federal subsidy (based on 28% of an individual beneficiary's annual prescription drug costs between \$250 and \$5,000) to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D; and
- b. The opportunity for a retiree to obtain a prescription drug benefit under Medicare .

- (3) Gross benefits payments and the amount of the subsidy for the period:

20. Fair Value Measurements-

A. For assets that are measured and reported at fair value in the statement of financial position after initial recognition, the valuation techniques and the inputs used to develop those measurements are as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The Company has no liabilities that are measured at fair value in the statement of financial position.

- (2) At December 31, 2013, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 3.
- (3) The Company's policy for determining when transfers between levels is required is based upon change in the inputs used to determine fair value measurement. If an input changes, the Company evaluates the new input (s) and makes the determination whether or not a transfer between levels is appropriate. If an asset or liability is transferred between levels, it is the Company's policy to record the transfer as of the beginning of the quarter in which the transfer occurs. The Company held no assets or liabilities categorized as Level 1, 2 or 3 during the reporting period that were transferred into or out of the level categorization held at January 1, 2013.
- (4) As of December 31, 2013, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 2 or Level 3. Historically, fair values in the Level 2 category are provided by independent pricing services. Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that amounts provided represent current fair values. Estimated fair values of investments categorized as Level 3 generally include inputs for which no readily observable inputs are available and require management judgment.
- (5) As of December 31, 2013, the Company had no holdings classified as either a derivative asset or liability.
- B. Combining Fair Value Information- Not required
- C. The method (s) and significant assumptions used to estimate the fair value of financial instruments are as follows:
Investment Securities - Fair values for bonds are based on the values prescribed by an independent pricing service or from brokers. For bonds that are not actively traded, estimated fair values are based on values of bonds of comparable yield and credit quality. The fair values for common stocks are based on quoted market prices, where available, which are provided to the Company by an independent pricing service.
Short-term investments, Uncollected premiums and agents' balances in the course of collection, and Deferred premiums, agents' balances and installments booked but deferred and not yet due - The carrying amounts reported as admitted assets or liabilities for these financial instruments approximate their fair values due to the short-term nature of these financial instruments.
Other Invested Assets - The estimated fair value of publicly traded limited partnerships is based on the values prescribed by an independent pricing service.

(1) The subprime lending sector is the sector of the mortgage lending industry that lends to borrowers who do not qualify for prime market interest rates because of poor or insufficient credit history. The term also applies to paper taken on property that cannot be sold on the primary market, including loans on certain types of investment properties and certain types of self-employed individuals.						
For purposes of this disclosure, subprime exposure is defined as the potential for financial loss through direct investment, or underwriting risk associated with the risk from the subprime lending sector. This includes any direct risk through investments in debt securities, asset backed or structured securities, hedge funds, subsidiaries and affiliates, and insurance product issuance. The Company views the following features as common characteristics of subprime mortgage loans:						
<ul style="list-style-type: none">• An interest rate above prime to borrowers who do not qualify for prime rate• Borrowers with low credit ratings (FICO scores)• Interest-only or negative amortizing loans• Unconventionally high initial loan-to-value ratios• Low initial payments based on a fixed introductory rate that expires after a short initial period, then adjusts to a variable rate plus a margin for the remaining term of the loan• Borrowers with less than conventional documentation of their home and/or assets• Very high or no limits on how much the payment amount or the interest rate may increase at reset periods, potentially causing a substantial increase in the monthly payment amount• Include substantial prepayment penalties						
The Company's strategy to manage or mitigate subprime exposure is to avoid making direct investments in, or insuring any of the sources of risk identified above.

The favorable development is principally from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: commercial multiple peril, other liability - occurrence, and workers compensation. This change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies as the Company does not write this type of policy.
