NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. The accompanying financial statements of Fireman's Fund Insurance Company of Ohio ("the Company") have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners ("NAIC") and the State of Ohio.

A reconciliation of the Company's net income and policyholders' surplus between the NAIC's *Accounting Practices and Procedures Manual* ("NAIC SAP") and the amounts reported in the accompanying financial statements is as follows:

(7) State Permitted Practices that increase/(decrease) NAIC SAP:		-	-
(8) NAIC SAP (5-6-7=8)	OH	\$ 48,005,148	\$ 47,118,731

B. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The most significant estimates inherent in these financial statements are loss and loss adjustment expense reserves.

C. Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short-term investments are stated at amortized cost.
- Bonds, except for those rated at below investment grade, are stated at amortized cost. Bonds rated at below investment grade are carried at the lower of amortized cost or market value. Amortization of bond premium or discount is calculated using the modified scientific method, which calculates the yield in the same manner as in the scientific method, and there is no effect from accrued interest on coupon dates.
- The Company does not carry any common stocks.
- The Company does not carry any preferred stocks.
- The Company does not carry any mortgage loans on real estate.
- Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value if they are considered to be below investment grade. The retrospective adjustment method is used to value all loan-backed securities.
- As of December 31, 2013, the Company does not own, directly or indirectly, any insurance company subsidiaries.
- The Company has no ownership interests in joint ventures, partnerships and limited liability companies.
- The Company accounts for derivatives in accordance with SSAP No. 86, Accounting for Derivative Instruments and Hedging, Income Generation, and Replication (Synthetic Asset) Transactions.
- The Company includes anticipated investment income as a factor in the premium deficiency calculation.
- Company actuaries use a number of generally accepted actuarial techniques and give consideration to the potential biases of each. For most lines of business, reserves are based on historical development of paid losses and case reserves, reasonably adjusted to current conditions. For the longer-tailed liability lines (not including asbestos/environmental), additional actuarial methods (e.g., Bornhuetter-Ferguson, Berquist-Sherman) may also be used. Frequency and severity trends are considered as well in making final selections.

For asbestos and environmental claims, the Company establishes full case reserves for all reported claims. Reserves for Incurred But Not Reported ("IBNR") losses include a provision for development of reserves on reported losses. The Company's IBNR reserves are established after examining a variety of techniques including ground-up exposure based modeling and average cost models.

- The Company has not modified its capitalization policy from the prior period.
- Pharmaceutical rebate receivables: Not applicable.

2. Accounting Changes and Corrections of Errors

- In March 2012, the NAIC issued SSAP No. 92 – Accounting for Postretirement Benefits Other Than Pensions ("SSAP No. 92") and SSAP No. 102 – Accounting for Pensions ("SSAP No.102"). The primary change introduced by these SSAPs is to recognize a liability for the unfunded amount of an employer's obligation for defined benefit plans. SSAP No. 92 requires that an employer that sponsors a defined benefit postretirement plan other than a pension shall recognize in its statement of financial position the funded status of the plan or plans. The status of each plan shall be measured as the difference between the fair value of the plan assets and the accumulated postretirement benefit obligation. SSAP No.102 requires for a defined benefit pension plan that if the projected benefit obligation exceeds the fair value of the plan assets, the employer shall recognize in its statement of financial position a liability that equals the unfunded projected benefit obligation. If the fair value of plan assets exceeds the projected benefit obligation, the employer shall recognize an asset that equals the overfunded projected benefit obligation. This asset would be nonadmitted. The Company adopted these SSAPs as of January 1, 2013 prospectively. There was no impact on net income, surplus, total assets, or total liabilities as a result of adoption.

NOTES TO FINANCIAL STATEMENTS

2. In March 2012, the NAIC issued SSAP No. 103 – Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities ("SSAP No. 103"). SSAP No. 103 focuses on the issues of accounting for transfers and servicing of financial assets and extinguishments of liabilities. SSAP No. 103 clarifies that a transferor must determine whether it has surrendered control over transferred financial assets. That determination must consider the transferor's continuing involvements in the transferred financial asset, including all arrangements or agreements made contemporaneously with, or in contemplation of, the transfer, even if they were not entered into at the time of the transfer. SSAP No. 103 defines the term "participating interest" to establish specific conditions for reporting a transfer of a portion of a financial asset as a sale. If the transfer does not meet those conditions, a transferor should account for the transfer as a sale only if it transfers an entire financial asset or a group of entire financial assets and surrenders control over the entire transferred asset(s). If the transfer of a participating interest does not meet the conditions of a sale, it should be treated as a secured borrowing with a pledge of collateral. The transferor would continue to report the transferred financial asset in its statement of financial position with no change in the basis of accounting. The Company adopted SSAP No. 103 as of January 1, 2013 prospectively. There was no impact on net income, surplus, total assets, or total liabilities as a result of adoption.
3. In August 2012, the NAIC issued SSAP No. 104 – Share Based Payments ("SSAP No. 104"). This SSAP replaces SSAP No. 13 Stock Options and Stock Purchase Plan. SSAP No. 104 provides recognition guidance for share-based payment arrangements with employees. Under such arrangements, a reporting entity is to recognize in the financial statements the employee services received in exchange for the equity instruments issued or liabilities incurred and the related cost to the entity as those services are consumed. This SSAP establishes fair value as the measurement objective in accounting for share-based payment arrangements and requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees except for equity instruments held by employee stock ownership plans. The fair value of liabilities incurred in share-based payment transactions with employees shall be remeasured at the end of each reporting period through settlement. Changes in the fair value of a liability incurred under a share-based payment arrangement that occur during the requisite service period shall be recognized as compensation cost over that period. The accounting for an award of share-based payment shall reflect the substantive terms of the award and any related arrangement. The Company adopted SSAP No. 104 as of January 1, 2013 prospectively. There was no impact on net income, surplus, total assets, or total liabilities as a result of adoption.
4. In August 2011, the NAIC issued SSAP No.101 – Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10 ("SSAP No. 101"). SSAP No. 101 provides two significant changes. First, tax loss contingencies will continue to be estimated subject to the conditions provided in SSAP No. 5R – Liabilities Contingencies and Impairments of Assets. However, a more-likely-than-not (a likelihood of more than 50%) criterion is used for federal and foreign tax loss contingencies. Formerly, a probable criterion was used. If the estimated tax loss contingency is greater than 50% of the tax benefit originally recognized, the tax loss contingency shall be equal to 100% of the tax benefit recognized. Second, adjusted gross deferred tax assets (DTAs) will be admitted based on the sum of a three component calculation. Component One: This component consists of taxes paid in prior years and tax loss contingencies that can be recovered through loss carrybacks not to exceed three years. Component Two: After the application of Component One, an entity must apply certain admissibility limits. An entity should admit the amount of adjusted gross DTAs expected to be realized within the applicable period, limited by the applicable percentage of adjusted statutory capital and surplus. Component Three: This component consists of the amount of gross DTAs to be admitted to the extent that they are offset by deferred tax liabilities of the same tax character. The Company adopted SSAP No. 101 as of January 1, 2012. Adoption resulted in the increase of admitted DTAs by \$113,098. Total assets and surplus were increased by this same amount.

3. **Business Combinations and Goodwill**

The Company did not acquire any new business entities during the year ended December 31, 2013. The Company does not carry goodwill on any of its investments.

4. **Discontinued Operations**

None.

5. **Investments**

- A. Mortgage loans, including mezzanine real estate loans: Not applicable.
- B. Debt restructuring: Not applicable.
- C. Reverse mortgages: Not applicable.
- D. Loan-backed securities-
1. Prepayment assumptions for loan-backed securities are obtained from the Bloomberg system.
2. During the period, the Company has not recognized any loan-backed securities as other-than-temporarily impaired based on the Company's intent to sell the security or inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis of the security.
3. The Company does not hold any loan-backed securities with a recognized other-than-temporary impairment based on the present value of cash flows expected to be collected being less than the amortized cost basis of the security.
4. Aggregate amount of fair values of loan-backed securities and aggregate amount of unrealized losses for impaired securities for which an other-than temporary impairment has not been recognized in earnings, segregated by those in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 months or longer:
- a. The aggregate amount of unrealized losses:
- | | | |
|------------------------|----|---------|
| 1. Less than 12 Months | \$ | 138,501 |
| 2. 12 Months or Longer | \$ | - |
- b. The aggregate related fair value of securities with unrealized losses:
- | | | |
|------------------------|----|-----------|
| 1. Less than 12 Months | \$ | 4,389,121 |
| 2. 12 Months or Longer | \$ | - |
5. The Company has a quantitative and qualitative process for identifying loan backed securities that are in an unrealized loss position and evaluating whether impairments are other than temporary. This begins with evaluating the amount and extent of time that a security is in an unrealized loss position to identify securities where all contractual cash flows may not be collected. From this point, the Company will further analyze certain securities considering information such as ratings and the underlying collateral (e.g., delinquency rates, collateral coverage, loan characteristics). The Company also performs cash flow analysis which can result in certain securities in an unrealized loss position not being impaired because the Company believes future cash flows can still support the current carrying values.
- E. Repurchase agreements:
- The Company did not participate in any repurchase agreements in 2013.

20. Fair Value Measurement

- A. Inputs used for Assets and Liabilities Reported at Fair Value

- 1. Fair Value Measurements as of December 31, 2013:

Description for each class of asset or liability	(Level 1)		(Level 2)		(Level 3)		Total
a. Assets at fair value							
Other - Mutual Fund	\$	-	\$	3,812	\$	-	\$ 3,812
Total assets at fair value	\$	-	\$	3,812	\$	-	\$ 3,812
b. Liabilities at fair value	\$	-	\$	-	\$	-	\$ -

The Company reviews its fair value hierarchy classifications quarterly. This review could reveal that previously observable inputs for specific assets or liabilities are no longer available or reliable. For example, if the market for a Level 1 asset becomes inactive, the Company may need to adopt a valuation technique that relies on unobservable components causing the asset to be transferred to Level 2 or Level 3. Alternatively, if the market for a Level 3 asset or liability becomes active, the Company will report a transfer out of Level 3. Transfers in or out of Level 3 are reported as of the beginning of the period in which the change occurs. During 2013, there were no transfers of assets or liabilities from one level of the fair value hierarchy to another.

- 2. Roll forward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the level 3 category of the fair value hierarchy.

- 3. Policy on Transfers Into and Out of Level 3

See discussion above for a description of the company's policy for determining when transfers between levels are recognized.

NOTES TO FINANCIAL STATEMENTS

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company has analyzed the valuation techniques and related inputs, evaluated its assets and liabilities reported at fair value, and determined a fair value hierarchy level based upon trading activity and the observability of market inputs consistent with SSAP 100, Fair Value Measurement. Based on the results of this evaluation and investment class analysis, each valuation was classified into Level 1, 2, or 3. An asset's or a liability's classification is based on the lowest level input that is significant to its measurement.

Bonds included in the level 2 categorization above include NAIC 3 through 6 rated bonds valued at the lower of cost or NAIC fair value. The fair values of these bonds are based on NAIC Securities Valuation Office prices, then quoted market prices in active markets when available. Based on the market data, the securities are categorized into asset class, and based on the asset class of the security, appropriate pricing applications, models, and related methodology and standard inputs are utilized to determine what a buyer in the market place would pay for the security in a current sale. When quoted prices are not readily available or in an inactive market, standard inputs used in the valuation models, listed in approximate order of priority, include, but are not limited to, benchmark yields, reported trades, municipal securities rulemaking board (MSRB) reported trades, nationally recognized municipal securities information repository (NRMSIR) material event notices, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. In certain cases, including private placement securities as well as certain difficult-to-price securities, internal pricing models may be used that are based on market proxies.

 - 1. The Company analyzes its investment portfolio for exposure to direct and indirect sub-prime investments. The Company identifies potential sub-prime mortgage-related risk exposure on a security-by-security basis. Sub-prime exposure is identified on each individual security primarily on the basis of the underlying collateral credit (FICO) scores. Other factors such as loan-to-value ratios, documentation, loan type, loan rates, credit support, and delinquency and default percentages are also considered. An ongoing assessment is performed at least quarterly on all securities with sub-prime exposure. Due to the high quality of the Company's mortgage investments and the lack of sub-prime loans thereof, the Company believes it does not have a material exposure to sub-prime mortgages.
- 2.-4. The Company has no subprime mortgage related risk exposure.

33. Asbestos/Environmental Reserves

A. Asbestos

Q: Does the Company have on the books or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses?

Yes.

Q: If yes, describe the lines of business written for which there is potential exposure, the nature of the exposure or exposures and the Company's methodology for reserving for both reported and IBNR losses.

The exposure for asbestos claims arises from the sale of Commercial Multi-Peril, Products Liability and Other Liability policies.

The exposure to asbestos claims arises from the mining and manufacturing of asbestos, from the use of asbestos products by insulators, ship workers and others, and from exposure to asbestos in place, as there were thousands of common uses for asbestos and asbestos products.

The Company establishes full case reserves for all reported asbestos claims. Reserves for IBNR include a provision for development of reserves on reported losses. The Company's IBNR reserves are established after examining a variety of techniques including ground-up exposure based modeling and average cost models.

In 2012, the Pooling Agreement was amended such that the Company receives 0% of the pooled results. Last year, this change in pooling percentage was reflected in this Note for 2012 only. In 2013, this Note has been revised according to new NAIC guidance (for alignment with Schedule P) such that all Direct, Assumed and Net history has been restated based upon the pooling percentage as of 2012. As a result, the Company has no Direct, Assumed, or Net activity and reserves to report.

B. Amount of ending reserves for Bulk + IBNR included in A (Loss & LAE):

None.

C. Amount of ending reserves for loss adjustment expenses included in A (Case, Bulk + IBNR):

None.

D. Environmental

Q: Does the Company have on the books or has it ever written an insured for which you have identified a potential for the existence of a liability due to environmental losses?

Yes.

Q: If yes, describe the lines of business written for which there is potential exposure, the nature of the exposure or exposures and the Company's methodology for reserving for both reported and IBNR losses.

The exposure for environmental claims arises from the sale of Commercial Multi-Peril, Products Liability and Other Liability policies.

Starting in 2000, the Company changed the definition of environmental claims to include both pollution claims and other mass tort claims. Pollution claims arise from facilities where a hazardous substance has been deposited, stored, treated, handled, disposed of, placed, or otherwise come to be located. Pollution liability can arise from owners and operators of such facilities, and from generators and transporters of hazardous substances. Other mass tort claims arise from products such as silicone breast implants, Agent Orange, tobacco and lead.

The company establishes full case reserves for all reported environmental claims. Reserves for IBNR losses include a provision for development of reserves on reported losses. The company's IBNR reserves are established after examining a variety of techniques including average cost models, individual account analysis and loss development techniques.

In 2012, the Pooling Agreement was amended such that the Company receives 0% of the pooled results. Last year, this change in pooling percentage was reflected in this Note for 2012 only. In 2013, this Note has been revised according to new NAIC guidance (for alignment with Schedule P) such that all Direct, Assumed and Net history has been restated based upon the pooling percentage as of 2012. As a result, the Company has no Direct, Assumed, or Net activity and reserves to report.

E. Amount of ending reserves for Bulk + IBNR included in D (Loss & LAE):

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?

The Company typically writes Workers' Compensation as part of a package policy that includes modeled Property exposure, rather than Monoline Workers' Compensation. The insight achieved from the Property underwriting process includes the Construction, Occupancy, Protection and Exposure aspects for each account, enhancing risk selection. We also model such risks for Natural Catastrophe and Terrorism risk as part of risk selection (see 6.2 below).

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:

The Company is protected under catastrophe reinsurance coverage purchased by its parent. The parent uses both deterministic and probabilistic models to identify catastrophe exposure and uses the RMS software program Risklink 11.0 (for both Natural Catastrophe and Terrorism) in the evaluation.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?

The Company is protected under catastrophe reinsurance coverage purchased by its parent. The Company's parent purchases catastrophe reinsurance that covers catastrophic perils in all exposed regions.

6.4

Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?

Yes [☒ X]

No [☐]

6.5

If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to uninsured catastrophic loss:
