**B. Use of Estimates**

The preparation of financial statements in accordance with the NAIC *Accounting Practices and Procedures Manual* requires management to make estimates and assumptions that affect amounts reported in these financial statements and notes. Actual results could differ from the estimates and assumptions used.

**C. Accounting Policies**

Premiums that are written, assumed and ceded under the Company's insurance policies and reinsurance contracts are earned over the terms of the related policies and contracts on a pro rata basis. Unearned reserves are liabilities established, as the portion of premiums written that have not yet been earned.

Unlike the recognition of premiums revenue, expenses incurred while producing new insurance business such as commissions and premium taxes are charged to operations as incurred and ceding allowances received or receivable are credited to operations through reductions in expenses incurred.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at cost.
2. Investment grade bonds are stated at amortized cost using the interest method. Non-investment grade bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value.
3. Not applicable as the Company does not have any investments in common stocks.
4. Redeemable preferred stocks with an NAIC designation of 1 or 2 are carried at amortized cost. Perpetual preferred stocks with an NAIC designation of 1 or 2 are carried at market. All other preferred stocks are carried at the lower of cost, amortized cost, or fair value.
5. Not applicable as the Company investment portfolio does not include any mortgage loans.
6. Investment grade loan-backed securities are stated at amortized value. The prospective adjustment method is used for all loan-backed securities. Non-investment grade loan-backed securities are stated at the lower of amortized value or fair value.
7. Not applicable as the Company does not have any investments in subsidiaries, controlled or affiliated companies.
8. Not applicable as the Company does not have any investments in joint ventures, partnerships or limited liability companies.
9. Not applicable as the Company does not invest in derivative instruments.
10. The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.

**NOTES TO FINANCIAL STATEMENTS**

11. Unpaid losses and loss adjustment expense reserves represent the estimated ultimate net cost of all reported and unreported losses incurred. The Company does not discount loss and loss adjustment expense reserves. The reserves for unpaid losses and loss adjustment expenses include an amount determined using individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Those estimates are subject to the effects of trends in loss severity and frequency. Although considerable variability is inherent in such estimates and the ultimate liability may be in excess of or less than the amounts provided, management believes that the reserves for losses and loss adjustment expenses are adequate. The estimates are continually reviewed and adjusted as necessary as experience develops or new information becomes known; such adjustments are reflected in the period determined.
12. The Company has a capitalization policy for prepaid expenses and purchases of items such as office equipment, software/hardware, furniture, vehicles, and other equipment and leasehold improvements. The predefined capitalization thresholds under this policy have not changed from those of the prior year.
13. Not applicable as the Company is a property and casualty insurance company only and does not write major medical and/or prescription drug coverage.

2. The Company does not have any loan-backed securities with an other-than-temporary impairment for which it has the intent to sell or the inability or lack of intent to retain the investment in the security.

The Company is subject to guaranty fund and other assessments by the states in which it writes business. Guaranty fund assessments should be accrued at the time of the insolvencies. Other assessments should be accrued either at the time the assessments are levied or in the case of premium-based assessments, at the time the premiums are written, or, in the case of loss-based assessments, at the time the losses are incurred.

The Company has accrued a liability for guaranty fund and other assessments of \$128,231 and \$109,545, for the current and prior year, respectively. The liability is included in the taxes, licenses and fees liability. There were no charges to income due to other-than-temporary impairments in the Company's bond portfolio in 2013 or 2012. Considerations the Company used in the impairment evaluation process included, but were not limited to, whether the issuer is experiencing significant financial difficulties, the economic stability of an entire industry sector or subsection, and the extent to which the unrealized loss is credit-driven or a result of changes in market interest rates.

At the end of the current and prior year, the Company had admitted assets of \$1,223,010 and \$1,116,733, respectively, in premiums due from policyholders and agents. The Company routinely assesses the collectability of these receivables. Based upon the Company's experience, any uncollectable premiums receivable as of the end of the current year are not expected to exceed the nonadmitted amounts. In 2013, there were no nonadmitted assets; therefore no additional provision for uncollectible amounts has been recorded. The potential for any additional loss is not believed to be material to the Company's financial position.

**Note 20 – Fair Value Measurements****A. Inputs Used for Assets and Liabilities Measured at Fair Value****1. Fair Value Measurements by Level 1, 2 and 3**

Under fair value accounting, the Company must determine the appropriate level in the fair value hierarchy for each applicable measurement. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's management is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

Level 3 inputs are unobservable inputs for the asset or liability.

The Company uses the end of the reporting period as its policy for determining transfers into and out of each level. There were no transfers between Level 1 and Level 2 during the year ended December 31, 2013 and the year ended December 31, 2012.

**2. Rollforward of Level 3 Items**

The Company did not hold any Level 3 securities at December 31, 2013 or at December 31, 2012.

**3. Policy on Determining when Transfers between Levels are Recognized**

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between levels. The Company's policy is to recognize transfers in and transfers out as of the end of the reporting period.

**4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values**

The Company did not hold any Level 3 securities at December 31, 2013 or at December 31, 2012.

The Company uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities *that* do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including, delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure that the fair value determination is representative of an exit price, as defined by fair value accounting. To validate the appropriateness of the prices obtained, the Company's internal investment professionals, who report to the Chief Investment Officer, compared the valuation received to an independent third party pricing source and considered widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of specific issuers. If the Company believes that significant discrepancies exist, the Company will perform additional procedures, which may include specific inquiry of the pricing service, to resolve the discrepancies.

Level 1 consists of publicly traded equity securities and highly liquid, direct obligations of the U.S. Government whose fair value is based on quoted prices that are readily and regularly available in an active market. Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and perpetual preferred stocks that are not actively traded. The Company primarily uses the market approach valuation technique for all investments.

Management of the Company evaluates case and IBNR estimates based on data from a variety of sources including the Company's historical experience, knowledge of various factors, and industry data extrapolated from other insurers writing similar lines of business.

**Note 26 – Intercompany Pooling Arrangements**

Effective January 1, 2011, the Company entered into an amended pooling agreement with its parent, NIIC and NIIC's two insurance subsidiaries, NI-HI and VIC. The following summarizes the participation percentages:

| Name of Insurer                                       | NAIC Code | % Participation |
|---|-----------|-----------------|
| Triumphhe Casualty Company                            | 41106     | 2%              |

| Vanliner Insurance Company                            | 21172     | 26%             |
| National Interstate Insurance Company (Lead)          | 32620     | 70%             |

Prior to the pooling of business, each participating company makes cessions, primarily excess of loss arrangements, to various other affiliated and non-affiliated reinsurers under terms of other reinsurance agreements. Each participant records its own Provision for Reinsurance based on its pre-pooling reinsurance activity. These liabilities are not shared with the other pooled participants. In the event that a reinsurance balance becomes uncollectible, the uncollectible balance will be shared by the pooled members in accordance to the pooling participation schedule.
