**NOTES TO FINANCIAL STATEMENTS**

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of The Lafayette Life Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (the Department).

The Department recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Department has the right to permit other specific practices that deviate from prescribed practices. There are no differences between the Company's net income and capital and surplus using NAIC SAP or practices prescribed and permitted by the state of Ohio.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

	State of Domicile	2013	2012
<b><u>NET INCOME</u></b>			
(1) State basis (Page 4, Line 35, Column 1 & 2)	Ohio	\$ (7,835,708)	\$ 16,320,793

(3) State Permitted Practices that increase/(decrease) NAIC SAP:		0	0
(4) NAIC SAP (1-2-3=4)	Ohio	<u>\$ (7,835,708)</u>	<u>\$ 16,320,793</u>
<b><u>SURPLUS</u></b>			
(5) State basis (Page 3, Line 38, Columns 1 & 2)	Ohio	\$ 193,727,339	\$ 160,730,181
(6) State Prescribed Practices that increase/(decrease) NAIC SAP:		0	0
(7) State Permitted Practices that increase/(decrease) NAIC SAP:		0	0
(8) NAIC SAP (5-6-7=8)	Ohio	<u>\$ 193,727,339</u>	<u>\$ 160,730,181</u>

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting practices prescribed or permitted by the state of Ohio requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Amounts received on deposit-type contracts are entered directly as a liability when received. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity and expense experience for the year and judgment as to the appropriate level of statutory surplus to be retained by the Company.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at either amortized cost using the interest method or the lower of amortized cost or fair market value.
- (3) Unaffiliated common stocks are stated at fair market value, except for Federal Home Loan Bank (FHLB) stock, which is carried at cost, adjusted for stock dividends, and is restricted. Common stocks of non-life subsidiaries and non-life affiliates in which the Company has an interest of 10% or more are carried on the GAAP equity basis.
- (4) The Company does not hold any preferred stocks.
- (5) Mortgage loans on real estate are stated at the aggregate unpaid principal balance plus unamortized premium less unaccrued discount.
- (6) Loan-backed and structured securities are stated at amortized cost, except those with an initial NAIC designation of 6, which are stated at the lower of amortized cost or fair value. Loan backed and structured securities with an initial NAIC designation of 6 could have a final designation of 1 through 5 as determined by the SVO financial modeling process or the SVO modified filing exempt process. The retrospective adjustment method is used to determine amortized cost for all loan-backed and structured securities, except for those which an other-than-temporary impairment has been recognized, which use the prospective adjustment method to determine amortized cost.
- (7) The Company owns 100% of the capital stock of its non-life insurance subsidiaries, which are stated at GAAP equity.
- (8) The Company has an investment in a limited liability company. The Company carries this interest based on the underlying GAAP equity of the investee. Undistributed earnings allocated to the Company are reported in the change in net unrealized capital gains or losses. Distributions from earnings of the entity are reported as net investment income when received. Because of the indirect nature of this investment, there is an inherent reduction in transparency and liquidity and increased complexity in valuing the underlying investment. As a result, this investment is actively managed by Company management via detailed evaluation of the investment performance relative to risk.
- (9) The Company utilizes customized call options to hedge the S&P 500 index exposure embedded in equity indexed annuities and universal life policies. The Company purchases and writes call options to correlate with changes in the annuity and universal life features due to movements in the S&P 500. At the beginning of these contracts, a premium is either paid or received for transferring the related risk. The Company retains basis risk and risk associated with actual versus expected assumptions for mortality and lapse rates. The call options are not designated as a hedge for accounting purposes and are carried at fair value on the balance sheet with changes in fair value recorded in surplus. The related gains and losses from terminations or expirations are recorded in realized capital gains and losses.
- (10) Anticipated investment income is not a factor in calculating deficiency reserves.
- (11) Loss liabilities for accident and health contracts are based on statutory standard tables for long-term disability coverages and historical company experience for other accident and health.
- (12) The Company has not changed its capitalization policy from the prior year.
- (13) The Company has no pharmaceutical rebate receivables on its books during the statement periods.

**ANNUAL STATEMENT FOR THE YEAR 2013 OF THE Lafayette Life Insurance Company**  
**NOTES TO FINANCIAL STATEMENTS**

(14) The Company monitors investments to determine if there has been an other-than-temporary decline in fair value. Factors management considers for each identified security include the following:

- the length of time and the extent to which the fair value is below the book/adjusted carry value;
- the financial condition and near term prospects of the issuer, including specific events that may affect its operations;
- for equity securities and debt securities with credit related declines in fair value, the Company's intent and ability to hold the security long enough for it to recover its value to book/adjusted carry value;
- for debt securities with interest related declines in fair value, the Company's intent to sell the security before recovery of its book/adjusted carry value;
- for loan-backed securities, the Company's intent and ability to hold the security long enough for it to recover its value to book/adjusted carry value;
- for loan-backed securities, the Company's intent to sell the security before recovery of its book/adjusted carry value.

If the decline is judged to be other-than-temporary, an impairment charge is recorded as a net realized capital loss in the period the determination is made.

**2. Accounting Changes and Corrections of Errors**

The Company did not make any accounting changes in 2013.

The Company made the following accounting changes in 2012:

Effective January 1, 2012, the Company adopted Statement of Statutory Accounting Principle No. 101, *Income Taxes, a Replacement of SSAP No. 10R and SSAP No. 10* (SSAP 101). SSAP 101 amends the deferred tax asset admittance test set forth in SSAP 10R, *Income Taxes – A Temporary Replacement of SSAP 10* (SSAP 10R), by limiting the admissibility thresholds based on current period risk-based capital levels and modifying disclosure requirements. In addition, SSAP 101 no longer requires admitted deferred tax assets above certain thresholds to be classified as aggregate write-ins for other than special surplus funds.

The adoption of SSAP 101 resulted in an increase to statutory surplus of \$0.8 million at January 1, 2012, which is reflected on the cumulative effect of changes in accounting principles line (line 49) on the Summary of Operations page. In addition, the Company reclassified \$10.4 million on the Liabilities, Surplus and Other Funds page from aggregate write-ins for other than special surplus funds (line 34) to unassigned funds (line 35).

The Company changed the statutory reserve valuation for certain fixed rate, fixed term funding agreements from account value to CARVM. SSAP No. 51 – *Life Contracts* requires such a change in valuation basis to be recorded directly to surplus rather than as a part of the reserve change recognized in the summary of operations. The Company has recorded \$5.2 million directly as an increase to surplus as a result of the change in valuation basis through the Change in Reserve on Account of Valuation Bases on the Summary of Operations.

The Company has changed to the 2001 CSO mortality table from the 1980 CSO mortality table for determining statutory reserves for certain traditional life policies. SSAP No. 51 – Life Contracts requires such a change in valuation basis to be recorded directly to surplus rather than as a part of the reserve change recognized in the Summary of Operations. The Company has recorded \$3.3 million directly as an increase to surplus as a result of the change in valuation basis through the Change in Reserve on Account of Valuation Bases line on the Summary of Operations.

**NOTES TO FINANCIAL STATEMENTS**

(4) The following is an aggregate total of all impaired loan-backed securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss, including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains as of December 31, 2013:

a. The aggregate amount of unrealized losses:

1. Less than 12 months	\$9,379,232
2. 12 months or longer	\$571,232

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months	\$187,744,721
2. 12 months or longer	\$4,010,420

(5) See Note 1C (14) for the factors management considers when evaluating for an other-than-temporary decline in fair value.

**E. Repurchase Agreements and/or Securities Lending Transactions.**

At December 31, 2013, the Company has loaned \$82.1 million (fair value) of various debt securities, preferred stocks and common stocks as part of a securities lending program administered by Deutsche Bank. At December 31, 2012, the Company did not participate in the securities lending program. The Company maintains effective control over all loaned securities and, therefore, continues to report such securities as invested assets in the balance sheets.

(1) The Company requires at the initial transaction that the fair value of the cash collateral received must be equal to 102% of the fair value of the loaned securities. The Company monitors the ratio of the fair value of the collateral to loaned securities to ensure it does not fall below 100%. If the fair value of the collateral falls below 100% of the fair value of the securities loaned, the Company non-admits that portion of the loaned security. At December 31, 2013, the Company did not non-admit any portion of the loaned securities.

(2) Not applicable.

(3) a. At December 31, 2013, the collateral for all securities on loan could be requested to be returned on demand by the borrower. At December 31, 2013, the fair value of the total collateral is \$83.9 million, which is all managed by an unaffiliated agent.

b. The aggregate fair value of the reinvested collateral is \$83.9 million.

c. The Company receives cash collateral in an amount in excess of the fair value of the securities lent. The Company reinvests the cash collateral primarily in investment-grade debt securities and cash equivalents.

(4) The Company reports all collateral on the balance sheet with an offsetting liability recognized for the obligation to return the collateral. Collateral for the securities lending program is either managed by an affiliated agent of the Company or is managed by Deutsche Bank, an unaffiliated agent. Collateral managed by an affiliated agent is invested primarily in investment-grade debt securities and cash equivalents and is included in the applicable amount on the balance sheets because the funds are available for the general use of the Company. Collateral managed by an unaffiliated agent is invested in cash equivalents and is included in securities lending reinvested collateral assets on the balance sheet at December 31, 2013.

(5) a. The aggregate collateral broken out by maturity date is as follows:

Open	Amortized Cost		Fair Value	
	\$	-	\$	-
30 Days or less	83,854,736	-	83,854,736	-
31 to 60 Days	-	-	-	-

Total Collateral	\$ 83,854,736	\$ 83,854,736	\$ 83,854,736	\$ 83,854,736

b. At December 31, 2013, all of the collateral held for the securities lending program was invested in tradable securities that could be sold and used to pay for the \$83.9 million in collateral calls that could come due under a worst-case scenario.

(6) The Company does not accept collateral that is not permitted by contract or custom to sell or repledge.

(7) The Company does not have any transactions that extend beyond one year from the reporting date.

E. All Other Contingencies

The Company is currently being audited on behalf of multiple state treasurers and controllers concerning the identification, reporting and escheatment of unclaimed insurance policy benefits and other allegedly abandoned funds. The audits focus on identifying unreported death claims, matured annuities and retained asset accounts, and the use of the Social Security Death Master File to identify deceased insurance policy, annuity contract, and retained asset account holders. The Company has reached an agreement with numerous states regarding this audit activity that will result in outreach and payments to beneficiaries, escheatment of funds deemed abandoned under state laws, and accelerated escheatment of funds deemed abandoned pursuant to agreements with regulators. The amount of loss that the Company will ultimately recognize as a result of these audits cannot be reasonably estimated.

The West Virginia Treasurer (who has not settled with the Company) has brought suit seeking to require the Company to annually check the Social Security Death Master File for deceased insureds, and alleging that the Company's previous failure to do so has rendered its unclaimed property reports incomplete and fraudulent. The Treasurer seeks attorney fees, interest and penalties for allegedly willful misconduct and fraudulent reporting, and other, varied relief (including identification and payment of death claims). In late December 2013, the trial court dismissed the actions against the Company. The Treasurer has since filed a notice of appeal to the Supreme Court of Appeals of West Virginia. The amount of loss, if any, that the Company may ultimately recognize as a result of this litigation cannot be reasonably estimated.

The Company is also currently the subject of multistate insurance department regulatory inquiries and examinations with a similar focus as the state treasurer and controller audits regarding processes and procedures for identifying deceased insurance policy, annuity contract, and retained asset account holders. The examination activity may result in (but is not necessarily limited to) required outreach and payments to beneficiaries, changes to procedures, and administrative contributions. The amount of loss, if any, that the Company may ultimately recognize as a result of these examinations cannot be reasonably estimated.

(3) The Company's policy is to recognize transfers in and transfers out of levels at the beginning of the quarterly reporting period.

(4) The derivatives in Level 3 consist of options on the S&P 500 Index and are valued using a valuation model and inputs from outside sources. The models include the Black-Scholes-Merton model for point to point options, spreads and average (SPAV) algorithm model for monthly average options and a Monte Carlo model monthly cap (cliquet) options. The SPAV model is provided by Financial Engineering Associates of Berkley, California.

The assumptions used are derived from outside sources. Bloomberg Investment Services supplies the S&P Index level, the dividend yield and the London Interbank Offering (interest) Rates (LIBOR). Investment banks supply estimates of the implied volatility surface. Other than interpolation of the interest rates and implied volatility rates all inputs are provided by the outside sources.

Investments in Level 2 include NAIC rated 6 industrial & miscellaneous bonds. These securities are currently rated below investment grade. The Company determined fair value as of the balance sheet date through the use of third-party pricing services utilizing market observable inputs.

The fair value of common stock has been determined utilizing publicly quoted prices from third-party pricing services.

**ANNUAL STATEMENT FOR THE YEAR 2013 OF THE Lafayette Life Insurance Company**  
**NOTES TO FINANCIAL STATEMENTS**

The following table provides a summary of the significant unobservable inputs used in the fair value measurements developed by the Company or reasonably available to the Company of Level 3 assets and liabilities at December 31, 2013:

Security Type	Fair Value	Valuation Technique	Unobservable Output	Range
Derivative Assets	\$ 71,975,754	Black-Scholes-Merton Model Spreads and Average Algorithm Model Monte Carlo Model	S&P 500 Implied Volatility	11.3% - 35.1%
Derivative Liabilities	\$ (54,473,119)	Black-Scholes-Merton Model Spreads and Average Algorithm Model	S&P 500 Implied Volatility	12.7% - 35.1%

In isolation, significant increases (decreases) in the S&P 500 implied volatility would typically result in a significantly higher (lower) fair value measurement for Level 3 derivative assets and Level 3 derivative liabilities.

\*\* Includes FHLB common stock which is held at cost.

The following discussion describes the valuation methodologies utilized by the Company for assets and liabilities measured or disclosed at fair value. Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including discount rates, estimates of timing, amount of expected future cash flows and the credit standing of the issuer. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. For Level 3 investments, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. As described below, certain fair values are determined through the use of third-party pricing services. Management does not adjust prices received from third-parties; however, we do analyze the third party pricing services' valuation methodologies and related inputs and perform additional evaluation to determine the appropriate level within the fair value hierarchy. Care should be exercised in deriving conclusions about the Company's business, its value or financial position based on the fair value information of financial instruments presented below.

*Debt Securities and Surplus Notes*

The fair values of actively traded debt securities, asset/mortgage-backed securities, and surplus notes have been determined through the use of third-party pricing services utilizing market observable inputs. Less liquid private placement securities and auction rate securities trading in less liquid or illiquid markets with limited or no pricing information are valued using either broker quotes or by discounting the expected cash flows using current market-consistent rates applicable to the yield, credit quality and maturity of each security.

*Equity Securities*

The fair values of actively traded equity securities have been determined utilizing publicly quoted prices obtained from third-party pricing services. The fair values of certain equity securities for which no publicly quoted prices are available have been determined through the use of third-party pricing services utilizing market observable inputs. Actively traded mutual funds are valued using the net asset values of the funds.

*Mortgage Loans*

The fair values for mortgage loans, consisting principally of commercial real estate loans, are estimated using discounted cash flow analyses, using interest rates currently being offered for similar loans collateralized by properties with similar investment risk. The fair values for mortgage loans in default are established at the lower of the fair value of the underlying collateral less costs to sell or the carrying amount of the loan.

*Cash, Cash Equivalents and Short-Term Investments*

The fair values of cash, cash equivalents and short-term investments are based on quoted market prices.

**ANNUAL STATEMENT FOR THE YEAR 2013 OF THE Lafayette Life Insurance Company**  
**NOTES TO FINANCIAL STATEMENTS**

*Securities Lending Reinvested Collateral Assets*

The fair value of securities lending reinvested collateral assets are from third-party sources utilizing publicly quoted prices.

*Derivative Instruments*

The fair values of free-standing derivative instruments, primarily call options, are determined using valuation models incorporating significant unobservable inputs, including projected discounted cash flows, applicable swap curves and implied volatilities.

*Life and Annuity Reserves for Investment-type Contracts and Deposit Fund Liabilities*

The fair value of liabilities for investment-type contracts is based on the present value of estimated liability cash flows. Present values reflect the Company's margin for uncertainty of the timing of liability cash flows. Key assumptions to the cash flow model include the timing of policyholder withdrawals and the level of interest credited to contract balances.

Fair values for insurance reserves are not required to be disclosed. However, the estimated fair values of all insurance reserves and investment contracts are taken into consideration in the Company's overall management of interest rate risk.

*Securities Lending Liability*

The liability represents the Company's obligation to return collateral related to securities lending transactions. The liability is short-term in nature and therefore, the fair value of the obligation approximates the carrying amount.

- A. Extraordinary Items. None.
- B. Troubled Debt Restructuring. None.
- C. Other Disclosures and Unusual Items. None.
- D. Business Interruption Insurance Recoveries. None.
- E. State Transferable Tax Credits. None.
- F. Subprime Mortgage Related Risk Exposure

The Company does not have any direct investments in subprime mortgage loans. The Company does not have any equity investments in subsidiary, controlled or affiliated entities with significant subprime mortgage related risk exposure. This disclosure does not include an evaluation of mortgage-backed debt securities commonly referred to as Alt A because these debt securities do not generally share all characteristics of subprime mortgage related risk.

The Company invests directly in certain debt securities which are considered to have subprime mortgage related risk. The Company considers the following general characteristics typical of its debt securities with subprime mortgage exposure:

- Underlying borrowers with low credit ratings (FICO score generally lower than 670);
- Underlying loans with interest rates above rates available to prime borrowers;
- Underlying loans with generally higher initial loan-to-value ratios;
- Underlying loans with generally higher concentration of second liens;
- Underlying loans with generally higher concentration of manufactured housing;
- Securities with generally higher spread between collateral interest received and interest payments to investors;
- Securities with generally higher level of overcollateralization.

Investments in debt securities with subprime mortgage exposure, similar to other types of investments, can subject an investor to unrealized losses due to changing interest rates or general credit spread widening. Similarly, an investor is exposed to realized losses if actual cash flow of the underlying mortgages is worse than expected due to higher defaults which can result in principal loss for the investor.

In order to manage subprime mortgage related risk the Company uses proprietary risk models to project probability of default and recoveries of underlying collateral, proprietary surveillance systems to monitor credit performance, exposure analysis by risk category and maintenance of a watchlist for higher risk investments.

The following table shows our investments in debt securities with subprime mortgage exposure based on the definition above:

	Actual Cost	Book/Adjusted Carrying Value (excluding interest)		Fair Value	Other-Than-Temporary Impairment Losses Recognized	
a. Residential mortgage-backed securities	\$ 958,939	\$ 956,311	\$ 972,897	\$ -		-

g. Total	<b>\$ 958,939</b>	<b>\$ 956,311</b>	<b>\$ 972,897</b>	<b>\$ -</b>		

The percentage of book value of these debt securities that have underlying loans with primarily variable interest rates is 0.00%.

G. Retained Assets

- (1) The Company offered, during 2013, retained asset accounts as an optional form of settlement. Under the claim form, as drafted prior to August 2010, the retained asset option was, with certain exceptions, the default option for amounts equal to or greater than \$25,000 payable to a beneficiary who was an adult natural person. However, in certain states, namely Arkansas, Colorado, Florida, Kansas, Nevada, New York, North Carolina and North Dakota, the retained asset option had to be affirmatively elected in accordance with the requirements of applicable state law. The retained asset account option was not available to residents of Alaska. Even though the retained asset option was the stated default option for amounts equal to or greater than \$25,000 (payable to an adult natural person beneficiary), the Company would not enforce the option if objected to by the beneficiary should the beneficiary desire a lump sum payment instead. In August 2010, the Company changed its claim form for retained assets. The option is no longer the default option but must be affirmatively elected and approved. In addition, the option is not available to residents of the states of Alaska, New Jersey, New York or any other state which does not permit the retained asset option.

The Company's retained asset program is serviced by an unaffiliated bank. The funds in the retained asset option are held in the general funds of the Company until a draft is written through the bank against the account. Thus, the assets and liabilities related to retained assets accounts

**ANNUAL STATEMENT FOR THE YEAR 2013 OF THE Lafayette Life Insurance Company**  
**NOTES TO FINANCIAL STATEMENTS**

remain on the Company's financial statements. The retained asset accounts are included in liability-type deposit contracts. The interest rate paid to retained asset accountholders during 2013 was 0.50%. That rate did not change in 2013. The accountholder is not charged for routine administrative fees associated with the retained asset account. The accountholder is responsible for fees associated with insufficient funds drafts on the account and stop payments on drafts on the account.

(2) The number and balance of retained asset accounts in force as of December 31, 2013 and December 31, 2012 are as follows:
