Note 20 – Fair Value Measurement

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Level 1, 2 and 3

The Company must determine the appropriate level in the fair value hierarchy for each applicable measurement. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's management is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

Level 3 inputs are unobservable inputs for the asset or liability.

The Company did not hold any investments measured at fair value at March 31, 2014.

The following table provides information as of December 31, 2013 about the Company's investments measured at fair value.

Assets at fair value	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Fair Value</u>
Perpetual Preferred Stock				
Industrial and Misc	\$ -	\$ -	\$ -	\$ -
Parent, Subsidiaries and Affiliates	-	-	-	-

Total Bonds	\$ -	\$ 497,500	\$ -	\$ 497,500
Total assets at fair value	\$ -	\$ 497,500	\$ -	\$ 497,500

The Company uses the end of the reporting period as its policy for determining transfers into and out of each level. During the three months ended March 31, 2014 and 2013 there were no transfers between Level 1 and Level 2.

2. Rollforward of Level 3 Items

The Company did not hold any Level 3 securities at March 31, 2014 or at December 31, 2013.

3. Policy on Determining when Transfers between Levels are Recognized

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between levels. The Company's policy is to recognize transfers in and transfers out as of the end of the reporting period.

NOTES TO FINANCIAL STATEMENTS

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company did not hold any Level 3 securities at March 31, 2014 or at December 31, 2013.

The Company uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company's internal and affiliated investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, the Company's internal investment professionals, who report to the Chief Investment Officer, compare the valuation received to independent third party pricing sources and consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. If the Company believes that significant discrepancies exist, the Company will perform additional procedures, which may include specific inquiry of the pricing source, to resolve the discrepancies.

Level 1 consists of publicly traded equity securities and highly liquid, direct obligations of the U.S. Government whose fair value is based on quoted prices that are readily and regularly available in an active market. Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and perpetual preferred stocks that are not actively traded. The Company primarily uses the market approach valuation technique for all investments.

5. Derivative Fair Values

Reserves as of December 31, 2013 were \$9,582,963. As of March 31, 2014, \$1,099,084 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$8,519,163 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$35,284 unfavorable prior year development since December 31, 2013 to March 31, 2014. The unfavorable development in 2014 resulted from the combination of settling cases and adjusting current estimates of open cases and incurred but not reported losses (IBNR) for amounts more than the case and IBNR estimates carried at the end of the prior year. Management of the Company evaluates case and IBNR estimates based on data from a variety of sources including the Company's historical experience, knowledge of various factors, and industry data extrapolated from other insurers writing similar lines of business.
