The financial statements of Great American Insurance Company (“the Company”) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Company has no prescribed or permitted practices that would result in differences between NAIC SAP and the state of Ohio basis, as shown below:

2. The Company had no loan-backed securities with a recognized other-than-temporary impairment due to either the intent to sell or lack of intent to hold to recovery during 2014.
3. The Company had no loan-backed securities with a credit-related other-than-temporary impairment recognized during 2014.

4. The following table shows all loan-backed securities with an unrealized loss:

1. Less than 12 months	\$	(1,133,754)
2. 12 months or longer	\$	(3,472,308)

The fair value of open foreign currency forward contracts is reported as either a derivative asset or a derivative liability as appropriate for each contract. Any change in fair value of these open contracts is reported in change in net unrealized capital gains/losses until settled. Any realized capital gains/losses at settlement are reported in net realized capital gains/(losses). On June 11, 2014, the affiliated bond matured and was paid in full.

In 2014, the Company also entered into commodity futures contracts to hedge the commodity price risk associated with the price component of certain multi-peril crop insurance products. These futures contracts require the company to place funds in a margin account as collateral. The balance of this margin account at June 30, 2014 was \$694,952. These futures contracts do not qualify for hedge accounting. The fair value of open futures contracts is reported as either a derivative asset or a derivative liability as appropriate. Any change in fair value of these open contracts is reported in change in net unrealized capital gains/(losses) until settled. Any realized capital gains/losses at settlement are reported in net realized capital gains/(losses).

These foreign currency forward contracts do qualify for hedge accounting. The fair value of open foreign currency forward contracts is reported as either a derivative asset or a derivative liability as appropriate for each contract. Any change in fair value of these open contracts is reported in change in net unrealized capital gains/losses until settled. Any realized capital gains/losses at settlement are reported in net realized capital gains/(losses).

20.) FAIR VALUE

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments include corporate and municipal fixed maturity securities and MBS priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, American Money Management Corporation ("AMMC") (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

The Company has categorized its assets and liabilities measured at fair value into the three-level fair value hierarchy as reflected in the following table.
