B. Use of Estimates in the Preparation of the Financial Statements

No significant changes.

C. Accounting Policy

No significant changes.

2. Accounting Changes and Corrections of Errors

Accounting changes adopted to conform to the provisions of the NAIC Accounting Practices and Procedures Manual are reported as changes in accounting principles. The cumulative effect of the changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all periods.

Effective January 1, 2013 the Company adopted the provisions of SSAP No. 102, *Accounting for Pensions, A Replacement of SSAP No. 89*. As a result, the Company recorded an adjustment to unassigned funds (surplus) net of deferred tax (\$45,121) of \$87,587.

Effective July 1, 2013, the Company changed its method of depreciation from Modified Accelerated Cost Recovery System (MACRS) to straight—line as the Company believes the straight—line method would more appropriately allocate the cost over the useful life. The cumulative effect of this change in accounting principle was recorded as an adjustment to unassigned funds (surplus) in accordance with SSAP No. 3 *Accounting Changes and Errors*. The adjustment decreased surplus by \$34,061. The Company also recorded an adjustment to surplus to correct the book values of assets that should have been fully depreciated. The impact to surplus was a decrease of \$189,471.

In accordance with SSAP No. 3 *Accounting Changes and Errors*, the Company recorded a prior period adjustment in December 2013 to true—up the cost bases of mutual funds for prior year distributions originally reported as return of capital that the fund later reclassified as dividends. The net impact to surplus was an increase of \$55,766.

20. Fair Value Measurements

- A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by FASB ASC 820 (SFAS No. 157), *Fair Value Measurements*. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1:

Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2:

Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3:

Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

25. Changes in Incurred Losses and Loss Adjustment Expense

Reserves as of December 31, 2013 were \$38.6 million. In calendar year 2014, \$12.8 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$24.1 million. Therefore, there has been a \$1.8 million favorable prior-year development from December 31, 2013 to June 30, 2014. The favorable development is generally the result of ongoing analysis of recent loss development trends, and from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: commercial auto liability, auto physical damage, homeowners/farmowners, commercial multi-peril, other liability and special property. These decreases were offset, in part, by increases in workers compensation and private passenger auto liability. Original estimates are increased or decreased as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the Company does not write this type of policy.
