Notes to Financial Statement

5. All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether other-than-temporary impairments should be recognized. The Company considers various factors when determining other-than-temporary impairment, including: Intent or requirement to sell the security, length of time the security has been in a continuous unrealized loss position, depth of amortized value compared to fair value, and expected redemption percentage. The Company asserts that it has the intent and ability to hold these securities long enough to all the cost basis of the securities to be recovered. It is possible that the Company could recognize other-than-temporary impairments in the future on some of the securities if future events, information and the passage of time causes it to conclude that declines in value are other-than-temporary.

20. Fair Value Measurement

A. Inputs used and Assets and Liabilities Measured and Reported at Fair Value

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

Level 1 – Quoted prices in active markets for identical assets and liabilities: This category for items measured at fair value on a recurring basis includes exchange-traded stocks. The fair value of these stocks is based on quoted prices in active markets.

Level 2 – Significant observable inputs: The estimated fair values for some of these items are determined by independent pricing services using observable inputs. Others are based on quotes from markets which are not considered actively traded. The Company had no assets or liabilities measured at fair value on a recurring basis in this category.

Level 3 – Significant unobservable inputs: The Company had no assets or liabilities measured at fair value on a recurring basis included in this category.

1. Items Measured and Reported at Fair Value by Level 1, 2, and 3

None

At the end of each reporting period, the Company evaluates whether any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. During the current year, no transfers into or out of Level 1 or 2 were required.

2. Assets Measured at Fair Value Using Significant Unobservable Inputs (Level 3)

None

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

4. Inputs and Techniques Used for Level 2 and 3 Fair Values

Bonds carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted markets prices for similar instruments in an active market were utilized. This was accomplished by the use of matrix pricing. Matrix pricing takes quoted prices of bonds with similar features and applies analytic methods to determine the fair value of bonds held. Features that are inputs into the analysis include duration, credit quality, tax status and call and sinking fund features.

5. Derivative Fair Values

Not applicable

B. Other Fair Value Disclosures

Not applicable

C. Fair Values for All Financial Instruments by Levels, 1, 2 and 3.

The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A. The Company has no financial instrument liabilities valued at fair value.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	Level 1	Level 2	Level 3	Not practicable (Carrying Value)
Financial instruments – assets

The HFC was not inforced when the Company agreed with a request by the Ohio Department of Insurance to increase the amount of capital in the Company by \$20 million which approximates the net loss recorded in 2012.
