The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and loss adjustment expense (“LAE”) reserves. The Company also has potential exposure relating to lawsuits due to its participation in a management agreement for which it is allocated litigation expenses.

NOTES TO FINANCIAL STATEMENTS

The Company’s exposure to the following case arose from business written by the Company while participating in a 100% pooling reinsurance agreement with seven of its property-casualty affiliates (the “Direct Pool”). Effective November 5, 2005, the Company elected to terminate its participation in the Direct Pool and therefore has no net exposure with regard to this case.

As of June 30, 2014, there was a certified class action lawsuit seeking interest on personal injury protection payments that allegedly were late. The Company does consider a loss from this case to be probable but is unable to estimate a range of loss at this time.

20. Fair Value Measurements
- A. Inputs Used for Assets and Liabilities Measured at Fair Value in the Company’s Financial Statements

1. Fair Value Measurements by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., active exchange-traded equity securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company’s subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

The Company’s management evaluated whether the market was distressed or inactive in determining the fair value of the Company’s securities and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, management concluded that there was sufficient activity in determining the fair market value of the Company’s securities.

As of June 30, 2014, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

The favorable development is primarily due to private passenger auto liability originally anticipated severity decreasing for accident years 2012 and 2011 and prior by 1.3% and 0.2%, respectively, while accident year 2013 increased by 1.0%.
