On January 1, 2013, OFIC adopted SSAP No. 92, *Accounting for Postretirement Benefits Other Than Pensions - A Replacement of SSAP No. 14 and SSAP No. 102, Accounting for Pensions - A Replacement of SSAP No. 89*. The standards require insurers to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability and include non-vested employees in determining the plan obligations. In addition, a sponsor's fiscal year end will be used as the measurement date for estimating the fair value of postretirement benefit assets and liabilities. The guidance contains a transition provision that gives insurers the option to recognize the initial impact to surplus over a period not to exceed 10 years. OFIC has elected the transition option. The Company expects the remaining transition liability of \$3.2 million to be recognized in 2014.

OFIC contributed \$11.4 million to its pension plan in March 2014. OFIC does not expect to make any additional contributions during the remainder of fiscal year 2014.

The Other Postretirement Benefits expense reflects the receipt of the government subsidy during the period that OFIC's plan benefits are expected to be considered actuarially equivalent to those provided by Medicare Part D.

20. Fair Value Measurements-

A. For assets that are measured and reported at fair value in the statement of financial position after initial recognition, the valuation techniques and the inputs used to develop those measurements are as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The Company has no liabilities that are measured at fair value in the statement of financial position.

(2) At September 30, 2014, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 3.

(3) The Company's policy for determining when transfers between levels is required is based upon change in the inputs used to determine fair value measurement. If an input changes, the Company evaluates the new input (s) and makes the determination whether or not a transfer between levels is appropriate. If an asset or liability is transferred between levels, it is the Company's policy to record the transfer as of the beginning of the quarter in which the transfer occurs. The Company held no assets or liabilities categorized as Level 1, 2 or 3 during the reporting period that were transferred into or out of the level categorization held at January 1, 2014.

(4) As of September 30, 2014, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 2 or Level 3. Historically, fair values in the Level 2 category are provided by independent pricing services. Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that amounts provided represent current fair values. Estimated fair values of investments categorized as Level 3 generally include inputs for which no readily observable inputs are available and require management judgment.

(5) As of September 30, 2014, the Company had no holdings classified as either a derivative asset or liability.

B. Combining Fair Value Information- Not required

C. The method (s) and significant assumptions used to estimate the fair value of financial instruments are as follows:

Investment Securities - Fair values for bonds are based on the values prescribed by an independent pricing service or from brokers. For bonds that are not actively traded, estimated fair values are based on values of bonds of comparable yield and credit quality. The fair values for common stocks are based on quoted market prices, where available, which are provided to the Company by an independent pricing service.

Short-term investments, Receivables for securities, Uncollected premiums and agents' balances in the course of collection, and Deferred premiums, agents' balances and installments booked but deferred and not yet due - The carrying amounts reported as admitted assets or liabilities for these financial instruments approximate their fair values due to the short-term nature of these financial instruments.

Other Invested Assets - The estimated fair value of publicly traded limited partnerships is based on the values prescribed by an independent pricing service.

23. Reinsurance- No significant change
24. Retrospectively Rated Contracts and Contracts Subject to Redetermination- Not applicable
25. Changes in Incurred Losses and Loss Adjustment Expenses-
Reserves as of December 31, 2013 were \$74.6 million. In calendar year 2014, \$19.0 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$52.8 million. Therefore, there has been a \$2.8 million favorable prior-year development from December 31, 2013 to September 30, 2014. The favorable development is principally from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: other liability, workers compensation, and personal auto liability & no-fault. This change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the Company does not write this type of policy.

33. Asbestos/Environmental Reserves-
The Company's exposure to asbestos and environmental claims arises from general liability and commercial multiple peril lines of business. The Company tries to estimate the full impact of the asbestos and environmental exposure by establishing full case basis reserves on all known claims and computing incurred but not reported losses based on market share tempered by previous experience. In addition, reserves are held for future allocated loss adjustment expenses including coverage dispute costs.

In 2014, the Company elected to move \$300,000 from asbestos IBNR reserves to environmental IBNR reserves. The Company still believes that the total reserves held for asbestos and environmental claims make a reasonable provision for unpaid claims.
