# Notes to Financial Statements

## 1. SIGNIFICANT ACCOUNTING POLICIES

A. American Family Insurance Company (the Company) prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the Office of the Commissioner of Insurance of the State of Ohio (OCI). Prescribed statutory accounting practices include the National Association of Insurance Commissioners' (NAIC) "Accounting Practices and Procedures Manual", version effective March 1, 2014, as well as state laws, regulations, and general administrative rules applicable to all insurance enterprises domiciled in a particular state. In addition, the OCI has a right to permit other specific practices that may deviate from prescribed practices. No permitted differences in statutory accounting practices between the OCI and the NAIC are used in the preparation of these statutory financial statements.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

(8) NAIC SAP (5-6-7=8)	OH	\$ 17,205,409	\$ 16,383,356

B. The preparation of financial statements in conformity with the Annual Statement Instructions and Accounting Practices and Procedures manual requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Premiums, reserves and expenses are accounted for in accordance with the NAIC Accounting Practices and Procedures manual, subject to deviations prescribed or permitted by the State of Ohio as described above.

In addition, the Company uses the following accounting policies:

- (1) Investments in short-term bonds rated "1" (highest quality), or "2" (high quality) by the Securities Valuation Office ("SVO") of the NAIC are reported in the financial statements at amortized cost. Bonds rated "3" (medium quality), "4" (low quality), "5" (lower quality), or "6" (lowest quality) by the SVO are reported at the lower of amortized cost or fair value. The interest method is used to amortize any purchase premium or discount, including estimates of future prepayments obtained from independent sources. Money market mutual funds are recorded at amortized cost, which approximates fair market value.
- (2) Investments in bonds rated "1" (highest quality), or "2" (high quality) by the Securities Valuation Office ("SVO") of the NAIC are reported in the financial statements at amortized cost. Bonds rated "3" (medium quality), "4" (low quality), "5" (lower quality), or "6" (lowest quality) by the SVO are reported at the lower of amortized cost or fair value.

- (9) The Company holds no derivatives.
- (10) The Company does anticipate investment income as a factor in premium deficiency calculations.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates are continually reviewed and any adjustments are reflected in the period determined.

## 12. RETIREMENT PLANS, DEFERRED COMPENSATION, POSTEMPLOYMENT BENEFITS AND COMPENSATED ABSENCES AND OTHER POSTRETIREMENT PLANS

A., B., C., & D. Defined Benefit Plans - Refer to Note 12.G.

E. Defined Contribution Plans - Refer to Note 12.G.

F. Multiemployer Plans – Not applicable

G. Consolidated/Holding Company Plans

The Company participates with AFMIC and its subsidiaries (herein referred to as the "Companies") in non-contributory pension plans (herein referred to as the "Plans") covering substantially all employees. All employees providing services to the Company are employees of AFMIC. The Company is not directly liable for obligations under the Plans. For employees hired before January 1, 2009, and Agency Sales Managers hired before January 1, 2010, the benefits are based on years of credited service and highest average compensation (as defined in the Plans). For employees hired on or after January 1, 2009, and Agency Sales Managers hired on or after January 1, 2010, benefits are determined under a cash balance formula (as defined in the Plans). The asset valuation method used in 2014 for funding calculations is the Two-Year Smoothed Value method. The new benefit restrictions, required under the Pension Protection Act of 2006, do not apply in 2014 given the funded status of the plans. Pension expense of approximately \$1,162,419 and \$3,438,752 was allocated to the Company for the years ended December 31, 2014 and 2013, respectively, based on the Company's overall salary percentage.

The Companies also participate in a qualified contributory 401(k) plan (herein referred to as the "Plan"). Substantially all employees are eligible to enter into the Plan. Employee participation in the Plan is optional; participants contribute at least 1%, but no more than 30% of base compensation, subject to Internal Revenue Service limitations. The Companies are required to make contributions each payroll period, as defined, to a trust fund. Company contributions are based on a formula with a dollar-for-dollar match on the first 3% of eligible contributions plus 50 cents per dollar on the next 2% of eligible contributions. The maximum annual company contribution is 4% of eligible contributions. Beginning on Jan. 1, 2011, Agency Sales Managers began receiving an employer fixed match each pay period. The fixed match is the same as the employee match, as discussed above. The Plan expense allocated to the Company during 2014 and 2013 amounted to \$865,897 and \$789,488, respectively, based on the Company's overall salary percentage.

The Companies provide certain health care benefits to certain grandfathered agents and substantially all employees. In addition, the Companies provide most employees with a life insurance benefit. Upon retirement, agents and employees are eligible to continue certain of these benefits. For the life insurance program, the Companies absorb substantially all the cost. The Companies also contribute toward eligible employees' postretirement health care using a fixed amount for each year of eligible service. The Companies' portions of the costs of these programs are unfunded. The Companies sponsor no other significant postretirement benefit plans. The remaining cost to the Company was not significant in 2014 or 2013.

## Notes to Financial Statements

- H. Postemployment Benefits and Compensated Absences - Refer to Note 12.G.
- I. Impact of Medicare Modernization Act on Postretirement Benefits (INT 04-17)

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act includes the following two new features to Medicare Part D that could affect the measurement of the accumulated postretirement benefit obligation (APBO) and net periodic postretirement cost for the Plan:

A federal subsidy (based on 28% of an individual beneficiary's annual prescription drug costs between \$250 and \$5,000), which is not taxable, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D; and

The opportunity for a retiree to obtain a prescription drug benefit under Medicare.

The Company is unable to conclude whether the benefits provided by the Plan are actuarially equivalent to Medicare Part D under the Act. As a result, the effects of the Act on Accumulated postretirement benefit obligation are not reflected in the financial statement or the accompanying notes.

### 20. FAIR VALUE MEASUREMENTS

#### A. Valuation, Techniques, and Inputs

1. The following summarizes the Company's financial assets carried at fair value as of December 31, 2014.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Total
a. Assets at fair value				
Short-term investments	204,585	-	-	204,585
Total assets at fair value	204,585	-	-	204,585

There were no material transfers between Levels 1 and 2 during 2014.

2. The Company held no Level 3 assets as of December 31, 2014.
3. There were no material transfers into or out of Level 3 during 2014.
4. The Financial assets and financial liabilities recorded on the Balance Sheet at fair value are categorized based on the reliability of inputs to the valuation techniques as follows:

*Level 1* Financial assets and financial liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

*Level 2* Financial assets and financial liabilities whose values are based on the following:  
 Quoted prices for similar assets or liabilities in active markets;  
 Quoted prices for identical or similar assets or liabilities in non-active markets; or  
 Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

*Level 3* Financial assets and financial liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs may reflect the Company's estimates of the assumptions that market participants would use in valuing the financial assets and financial liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. In many instances, inputs used to measure fair value fall into different levels of the fair value hierarchy. In those instances, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is categorized is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The fair value guidance establishes a hierarchy for inputs used in determining fair value that maximize the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

## Notes to Financial Statements

Fair value is a market-based measure considered from the perspective of a market participant who owns an asset or owes a liability. Accordingly, when market observable data is not readily available, the Company's own assumptions are set to reflect those that market participants would be presumed to use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or from Level 2 to Level 3.

When available, the Company uses the market approach to estimate the fair value of its financial instruments, which is based on quoted prices in active markets that are readily and regularly available. Generally, these are the most liquid of the Company's holdings and valuation of these securities does not involve management judgment. Matrix pricing and other similar techniques are other examples of the market approach.

When quoted prices in active markets are not available, the Company uses the income approach, or a combination of the market and income approaches, to estimate the fair value of its financial instruments. The income approach involves using discounted cash flow and other standard valuation methodologies. The inputs in applying these market standard valuation methodologies include, but are not limited to interest rates, benchmark yields, bid/ask spreads, dealer quotes, liquidity, term to maturity, estimated future cash flows, credit risk and default projections, collateral performance, deal and tranche attributes, and general market data.

The following valuation techniques and inputs were used to estimate the fair value of each class of significant financial instruments:

### **Level 1 Measurements**

**Short-term Investments:** Comprised of actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.

The Company held no Level 2 or Level 3 securities carried at fair value as of December 31, 2014.

- B. Not Required
- C. Valuation, Methods, and Assumptions

- 1. The following summarizes the fair value of the Company's financial assets as of December 31, 2014:

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Not Practicable (Carrying Value)
Bonds	24,961,691	23,004,230	5,411,722	19,549,969	-	-
Short-term investments	204,585	204,585	204,585	-	-	-

- 2. The following valuation methods and assumptions were used to measure the fair values of each type of financial asset and financial liability:

**Bonds:** The fair value of Level 1 bonds, consisting of U.S. Treasury Notes, is determined using unadjusted quoted prices in an active market. The majority of the Company's Level 2 bonds are valued using the market and income approaches by the SVO or by leading, nationally recognized providers of market data and analytics if no SVO price is available. When available, recent trades of identical or similar assets are used to price these securities. However, because many fixed income securities do not actively trade on a daily basis, pricing models are often used to determine security prices. The pricing models discount future cash flows at estimated market interest rates. These rates are derived by calculating the appropriate spreads over comparable U.S. Treasury securities based on credit quality, industry, and structure of the asset. Observable inputs used by the models include benchmark yields, bid/ask spreads, dealer quotes, liquidity, term to maturity, credit risk and default projections, collateral performance, deal and tranche attributes, and general market data. Inputs may vary depending on type of security.
