NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual, version effective January 1, 2001 and updates through current year have been adopted as a component of prescribed or permitted practices by the state of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. These reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance. Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at amortized cost using the effective yield method.
- (3) Common stocks are stated at market.
- (4) Preferred stocks are stated at book value. Also, Per SSAP 32, lower quality preferred stocks (P3 to P6) are being stated at the lower of book or fair value.
- (5) Mortgage Loans on Real Estate - Not applicable
- (6) Loan-backed Securities - Not applicable
- (7) Investments in stocks of uncombined subsidiaries and affiliates – Not applicable
- (8) Joint Ventures - Not applicable
- (9) Derivatives – Not applicable
- (10) In the event that a first-order approximation (excluding anticipated investment income) of estimated future costs related to unearned premium as of a particular evaluation date exceeds the unearned premium as of that date, we would incorporate consideration of the related investment income we would expect to earn. However, to date we have not had to proceed to this step in order to demonstrate that no premium deficiency exists.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments are reflected in the period determined.

Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of, a liability due to environmental losses? Yes (X) No ()

The Company's exposure arose from the sale of commercial liability products. The Company tries to estimate the full impact of the environmental exposures by establishing full case basis reserves on all known losses and computing IBNR based on generally accepted actuarial methodologies. The increase in environmental reserves is the result of changes in the identification of environmental losses and is not related to new or additional exposures.

Prior year data included in Schedule P is calculated as follows:

Part 1-Payments made in the current year and current reserves for AY's 2004 & prior.

Parts 2&3-The prior line on last year's statement is combined with the year 2004 total. Paid amounts prior to 2005 are then subtracted from this sum to arrive at the prior figure.

Part 4-The sum of the prior year line and the 2004 line from the prior year's Schedule P compose the prior figures for this section.

Part 5 Section 1&3-The prior line is combined with year 2003 from the prior schedule P. Counts for accident year 2004 in the preceding year are then subtracted from this sum to arrive at the prior figure, removing the cumulative effect.

Part 5 Section 2 - The prior line is combined with the 2004 AY of the prior year's Schedule P to arrive at the new prior number.
