NOTES TO FINANCIAL STATEMENTS

1.) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Accounting Practices

The financial statements of Great American Spirit Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Company has no prescribed or permitted practices that would result in differences between NAIC Statutory Accounting Principles (SAP) and the state of Ohio basis, as shown below:

	State of Domicile	2014	2013
Net income state basis	Ohio	\$ 496,697	\$ 499,747
Effect of state prescribed practices	Ohio	-	-
Effect of state permitted practices	Ohio	-	-
Net income, NAIC SAP		<u>\$ 496,697</u>	<u>\$ 499,747</u>
Statutory surplus state basis	Ohio	\$ 20,083,221	\$ 21,709,655
Effect of state prescribed practices	Ohio	-	-
Effect of state permitted practices	Ohio	-	-
Statutory surplus, NAIC SAP		<u>\$ 20,083,221</u>	<u>\$ 21,709,655</u>

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Investments – Invested asset values are generally stated as follows:

Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. For residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and loan-backed and structured securities (LBASS), the NAIC has retained third-party investment management firms to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based not only on the probability of loss, but also the severity of loss. Those RMBS, CMBS and LBASS securities that are not modeled but receive a current year Acceptable Rating Organizations (ARO) rating are subject to the Modified FE process which determines the appropriate NAIC designations and Book Adjusted Carrying Values.

Redeemable preferred stocks rated RP1 and RP2 are stated at amortized cost; perpetual preferred stocks rated P1 and P2 are stated at fair value; all others are stated at the lower of cost, amortized cost, or fair value.

Short-term investments are stated at cost.

Unpaid Losses and Loss Adjustment Expenses – The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses (including possible development on known claims) based on past experience; (d) estimates based on experience of expenses for investigating and adjusting claims; and (e) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental, and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency and other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the Statement of Earnings in the period in which determined. Despite the variability inherent in such estimates, management believes the liabilities for unpaid losses and loss adjustment expenses are adequate.

Premium Deficiency Reserve – The Company does not use anticipated investment income as a factor in premium deficiency calculations.

Premium Recognition – Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Generally, for direct business, such reserves are computed by pro rata methods. For certain collateral protection products, earned premium and unearned premium reserves are computed consistent with the proportion of the total exposure provided throughout the term of the contract. For assumed business, unearned premium reserves are based on reports received from ceding companies for reinsurance.

Underwriting Expense Recognition – Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

2.) ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

The Company did not have any material changes in accounting principles and/or corrections of errors.

3.) BUSINESS COMBINATIONS AND GOODWILL

- A. Statutory Purchases Method – Not applicable.

- B. Debt Restructuring – No debt has been restructured.
- C. Reverse Mortgages – The Company does not invest in reverse mortgages.
- D. Loan-Backed Securities

1. The Company uses dealer-modeled prepayment assumptions for mortgage-backed and asset-backed securities at the date of purchase to determine effective yields; significant changes in estimated cash flows from the original purchase assumptions are accounted for on a prospective basis.

2. The Company had no loan-backed securities with a recognized other-than-temporary impairment due to either the intent to sell or lack of intent to hold to recovery during 2014.

3. The Company had no loan-backed securities with a credit-related other-than-temporary impairment recognized during 2014.

4. The following table shows all loan-backed securities with an unrealized loss:

a. The aggregate amount of unrealized losses:

1. Less than 12 months\$ (13,055)

2. 12 months or longer(15,684)

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months\$1,496,448

2. 12 months or longer1,897,362

5. Based on cash flow projections received from independent sources (which reflect loan to collateral values, subordination, vintage and geographic concentration), implied cash flows inherent in security ratings and analysis of historical payment data, management believes that the Company will recover its cost basis in all securities with unrealized losses at December 31, 2014. The Company has the intent to hold such securities until they recover in value or mature.

20.) FAIR VALUE MEASUREMENTS

A. Inputs Used for Assets and Liabilities Measured at Fair Value

- 1. The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments include corporate and municipal fixed maturity securities and MBS priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, American Money Management Corporation ("AMMC") (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

The Company has categorized its assets and liabilities measured at fair value into the three-level fair value hierarchy as reflected in the following table.

Description	Level 1	Level 2	Level 3	Total

Bonds:				
U.S. Government and governmental agencies	\$ -	\$ -	\$ -	\$ -

The Company recognizes and records the transfer of securities into and out of Level 3 due to changes in availability of market observable inputs. All transfers are reflected in the table above at fair value as of the end of the reporting period.

- 4. Inputs and Techniques Used in Estimating Fair Value - See narrative in Note 20A.

B. The Company has no additional fair value disclosures.
