NOTES TO FINANCIAL STATEMENTS

(1) Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of American Modern Life Insurance Company (the Company) have been prepared in accordance with accounting practices prescribed or permitted by the Ohio Department of Insurance (ODOI). The ODOI recognizes statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Ohio Insurance Law. Prescribed statutory accounting practices are those practices that are incorporated directly or by reference in state laws, regulations and general administrative rules applicable to all insurance enterprises domiciled in a particular state. Permitted statutory accounting practices include practices not prescribed by the domiciliary state, but allowed by the domiciliary state regulatory authority. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The state has adopted the prescribed accounting practices as stated in NAIC SAP, without modification. The Company has no material statutory accounting practices that differ from those of the state of Ohio or the NAIC accounting practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below:

	<u>12/31/2014</u>	<u>12/31/2013</u>
1. Net Income, Ohio State basis:	\$ 2,059,947	\$ 3,878,825
2. State Prescribed Practices (Income): None	\$ -	\$ -
3. State Permitted Practices (Income): None	\$ -	\$ -
4. Net Income, NAIC SAP:	<u>\$ 2,059,947</u>	<u>\$ 3,878,825</u>
5. Statutory Surplus, Ohio State basis:	\$ 27,926,152	\$ 26,447,511
6. State Prescribed Practices (Surplus): None	\$ -	\$ -
7. State Permitted Practices (Surplus): None	\$ -	\$ -
8. Statutory Surplus, NAIC SAP	<u>\$ 27,926,152</u>	<u>\$ 26,447,511</u>

B. Use of Estimates

The preparation of financial statements in conformity with statutory accounting practices requires management to make certain estimates and assumptions that affect reported assets and liabilities, including reporting or disclosure of contingent assets and liabilities as of the dates of the statements of assets and liabilities, surplus and other funds and the reported amounts of revenues and expenses during the reporting period. Future events, including but not limited to, changes in mortality, morbidity, interest rates and asset valuations, could cause actual results to differ from the estimates used in the financial statements and such changes in estimates are generally recorded on the summary of operations in the period in which they are made.

The most significant estimates include those used in determining policy reserves, valuation of and impairment losses on investments and federal income taxes. Although some variability is inherent in these estimates, the recorded amounts reflect management's best estimates based on facts and circumstances as of the statements of assets and liabilities, surplus and other funds date. Management believes the amounts provided are appropriate.

C. Accounting Policy

Premiums are credited to revenue over the premium paying period of the policies, with the exception of single and flexible premium contracts which are credited to revenue when received from the policyholder. Benefits and expenses, including acquisition costs related to acquiring new and renewal business, are charged to operations as incurred. Acquisition expenses incurred are reduced for ceding allowances received or receivable.

Insurance liabilities are reported after the effects of ceded reinsurance. Reinsurance recoverables represent amounts due from reinsurers for paid and unpaid benefits, expense reimbursements, prepaid premiums and future policy benefits. Reinsurance premiums ceded and recoveries on benefits and claims incurred are deducted from the respective income and expense accounts.

NOTES TO FINANCIAL STATEMENTS

(1) Summary of Significant Accounting Policies (Continued)

C. Accounting Policy (Continued)

1. The Company considers all money-market funds, commercial paper and bonds purchased in the current year with original maturity dates of less than twelve months to be short-term investments. Short-term investments are stated at fair value or amortized cost. Cash and cash equivalents are carried at cost, which approximates fair value. The Company places its cash and cash equivalents with high quality financial institutions and, at times, these balances may be in excess of the Federal Deposit Insurance Corporation (FDIC) insurance limit. The Company considers short-term investments that are readily convertible to known amounts of cash and have an original maturity date of three months or less to be cash equivalents.
2. Bonds are valued as prescribed by the NAIC. Bonds not backed by other loans are generally carried at cost, adjusted for the amortization of premiums, accretion of discounts and any other than temporary impairment (OTTI). Premiums and discounts are amortized and accreted over the estimated or contractual lives of the related bonds based on the interest yield method. Prepayment penalties are recorded to net investment income when collected. Bonds that have been assigned the NAIC category 6 designation are carried at the lower of cost or NAIC fair value.
3. Not applicable
4. Not applicable
5. Not applicable
6. Loan-backed securities are stated at either amortized cost or the lower of amortized cost or discounted cash flows. The Company's loan-backed securities are reviewed quarterly, and as a result, the carrying value of a loan-backed security may be reduced to reflect changes in valuation resulting from discounted cash flow information. Loan-backed securities that have been assigned the NAIC category 6 designation are written down to the appropriate NAIC fair value. The Company uses a third-party pricing service in assisting the Company's determination of the fair value of most loan-backed securities. An internally developed matrix pricing model, discounted cash flow or other model is used to price a small number of holdings. The retrospective adjustment method is used to record investment income on all non-impaired securities except for interest-only securities or other non-investment grade securities where the yield had become negative. Investment income is recorded using the prospective method on these securities. Loan-backed securities that have been impaired are amortized to a new undiscounted cash flow if the security has recovered.

For loan-backed securities, the Company recognizes income using a constant effective yield method based on prepayment assumptions obtained from an outside service provider or upon analyst review of the underlying collateral and the estimated economic life of the securities. When estimated prepayments differ from the anticipated prepayments, the effective yield is recalculated to reflect actual prepayments to date and anticipated future payments. Any resulting adjustment is included in net investment income. For loan-backed securities that have a recognized OTTI, the adjusted cost basis is prospectively amortized over the remaining life of the security based on the amount and timing of future estimated cash flows. All other investment income is recorded using the interest method without anticipating the impact of prepayments.

7. Investment in subsidiary companies is accounted for using the equity method and is carried as an investment in common stocks in the statement of assets. The Company records changes in equity in its subsidiaries as credits or charges to capital and surplus. Insurance subsidiaries are recorded using statutory accounting principles.
8. Not applicable
9. Not applicable
10. Not applicable
11. The liability for unpaid losses and loss adjustment expenses includes an amount for losses incurred but unreported, based on past experience, as well as an amount for reported but unpaid losses, which is calculated on a case-by-case basis. Such liabilities are necessarily based on assumptions and estimates. While management believes that the amount is adequate, the ultimate liability may be in excess of or less than the amount estimated. The methods, including key assumptions, of making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period such change in estimate is made. The liability for unpaid accident and health claims and claim adjustment expenses, net of reinsurance, is included in accident and health policy reserves and policy claims in process of settlement on the statements of assets and liabilities, surplus and other funds.
12. The Company has not modified its capitalization policy from the prior period.
13. Not applicable

NOTES TO FINANCIAL STATEMENTS

(2) Accounting Changes and Corrections of Errors

Subsequent to the filing of the 2013 Annual Statement and prior to the completion of the 2013 Statutory Audit, certain adjustments were identified and recorded to properly reflect the transition of premium, claim, and commission processing from an unrelated third party administrator to the Company in 2012. These adjustments decreased capital and surplus by \$195,349.

Similar adjustments were identified and recorded by the Company’s wholly owned subsidiary, Southern Pioneer Life Insurance Company (SPLIC), to properly reflect the transition from an unrelated third party administrator to SPLIC in 2012. These adjustments decreased SPLIC’s capital and surplus, and the Company’s investment in common stock of SPLIC by \$179,526.

The total of these adjustments, \$374,875, is reflected on line 53 of the Summary of Operations. A reconciliation between the 2013 Statutory Audit and the 2013 Annual Statement was disclosed in footnote 12 in the 2013 Statutory Audit.

D. Loan-Backed Securities

- 1) Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from Bloomberg when available. Other payment speed assumptions for a small number of holdings were reviewed with the appropriate affiliated company analyst by evaluating the underlying collateral.
- 2) There were no OTTI recorded in 2014 due to management’s intent to sell or inability to hold a security until recovery.
- 3) As of December 31, 2014, the Company did not hold any securities for which an OTTI has previously been recognized.
- 4) All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains) as of December 31, 2014:

	Aggregate	Less than 12 months	12 Months or longer
A. Gross Unrealized Losses	\$ (1,925)	\$ -	\$ (1,925)
B. Fair Value of Securities			
with Unrealized Losses	\$ 872,540	\$ -	\$ 872,540

- 5) In determining whether a decline in value is other than temporary, the Company considers several factors including, but not limited to the following: the extent and duration of the decline in value; the Company’s ability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis; and the performance of the security’s underlying collateral and projected future cash flows. In projecting future cash flows, the Company incorporates inputs from third-party sources and applies reasonable judgment in developing assumptions used to estimate the probability and timing of collecting all contractual cash flows.

E. As of December 31, 2014, the Company had no net operating loss carryforwards nor tax credit carryforwards.

Total income taxes incurred in the current and prior years of \$3,553,250 are available for recovery in the event of future net losses.

The aggregate amount of deposits reported as admitted assets under Section 6603 of the Internal Revenue Service (IRS) Code was \$0 as of December 31, 2014.

The Company believes it is reasonably possible that the liability related to any federal or foreign tax loss contingencies may significantly increase within the next 12 months. However, an estimate of the reasonably possible increase cannot be made at this time.

F. The Company's Federal Income Tax Return is not consolidated with any other entity.

(14) Liabilities, Contingencies and Assessments

- A. Not applicable
- B. The Company is contingently liable under state regulatory requirements for possible assessments pertaining to future insolvencies and impairments of unaffiliated insurance companies. The Company records a liability for future guaranty fund assessments based upon known insolvencies, according to data received from the National Organization of Life and Health Insurance Guaranty Association. At December 31, 2014 and 2013, the amount was immaterial to the statutory financial statements. An asset is recorded for the amount of guaranty fund assessments paid, which can be recovered through future premium tax credits. This asset was also immaterial to the December 31, 2014 and 2013 statutory financial statements. These assets are being amortized over a five-year period.
- C. Not applicable
- D. The Company is involved in various pending or threatened legal proceedings arising out of the normal course of business. In the opinion of management, the ultimate resolution of such litigation will likely not have a material adverse effect on operations or the financial position of the Company.
- E. In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding reinsurance to other insurance companies (reinsurers). To the extent that a reinsurer is unable to meet its obligations under the reinsurance agreement, the Company remains liable. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk to minimize its exposure to significant losses from reinsurer insolvencies. Allowances are established for amounts deemed uncollectible.

(16) Information About Financial Instruments With Off-Balance Sheet Risk And Financial Instruments With Concentrations of Credit Risk

Certain financial instruments, consisting primarily of cash and short-term investments, potentially subject the Company to concentration of credit risk. The Company places its cash, cash equivalents and short-term investments in investment grade securities and limits the amount of credit exposure with any one institution.

Management attempts to limit the concentration of credit risk with respect to bonds by diversifying the geographic base and industries of the underlying issuers. This diversity is an integral component of the portfolio management process.

(20) Fair Value Measurements

- A. The fair value of the Company's financial assets and financial liabilities has been determined using available market information as of December 31, 2014. Although the Company is not aware of any factors that would significantly affect the fair value of financial assets and financial liabilities, such amounts have not been comprehensively revalued since those dates. Therefore, estimates of fair value subsequent to the valuation dates may differ significantly from the amounts presented herein. Considerable judgment is required to interpret market data to develop the estimates of fair value. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which utilizes a process and other relevant information generated by market transactions involving identical or comparable assets or liabilities. To a lesser extent, the Company also uses the income approach which uses discounted cash flows to determine fair value. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs reflect the assumptions market participants would use in valuing a financial instrument based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's estimates about the assumptions market participants would use in valuing financial assets and financial liabilities based on the best information in the circumstances.

The Company is required to categorize its financial assets and financial liabilities carried at fair value on the statements of assets and liabilities, surplus and other funds according to a three-level hierarchy. A level is assigned to each financial asset and financial liability based on the lowest level input that is significant to the fair value measurement in its entirety. The levels of fair value hierarchy are as follows:

Level 1 – Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. The types of assets and liabilities utilizing Level 1 valuations generally include money-market funds and actively-traded U.S. and international common stocks.

Level 2 – Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable in active markets for identical or similar assets and liabilities.

Level 3 – Fair value is based on at least one or more significant unobservable inputs. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the assets or liabilities. The types of assets and liabilities utilizing Level 3 valuations generally include certain non-exchange traded common stocks.

The Company uses prices and inputs that are current as of the measurement date. In periods of market disruption, the ability to observe prices and inputs may be reduced, which could cause an asset or liability to be reclassified to a lower level.

Inputs used to measure fair value of an asset or liability may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value.

30.1 Bonds	33,394,515	35,171,425	1,776,910
30.2 Preferred stocks			
30.3 Totals	33,394,515	35,171,425	1,776,910

- 30.4 Describe the sources or methods utilized in determining the fair values:
- When quoted market prices are not available for fixed maturity securities such as private placement securities, securities that do not trade regularly, and embedded derivatives included in such securities, a pricing model using a commercial software application is most often used. The matrix pricing model is developed by obtaining spreads versus the U.S. Treasury yield for corporate securities with varying weighted average lives and bond ratings. The weighted average life and bond rating of a particular fixed maturity security to be priced are important inputs into the model and are used to determine a corresponding spread that is added to the U.S. Treasury yield to create an estimated market yield for that security. The estimated market yield, liquidity premium, any adjustments for known credit risk, and other relevant factors are then used to estimate the fair value of the particular fixed maturity security.

- 31.1 Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D?
- Yes [] No [X]
- 31.2 If the answer to 31.1 is yes, does the reporting entity have a copy of the broker's or custodian's pricing policy (hard copy or electronic copy) for all brokers or custodians used as a pricing source?

Explanation of basis of allocation by states, etc., of premiums and annuity considerations

Individual life, A&H, and annuity considerations are allocated according to the address to which the premium notice is sent. Group life and A&H are allocated either (a) for policies covering less than 500 lives, the premium goes to the state of the policyholder; or (b) if over 500 lives, the premium goes to the state of residence of each certificate holder. Group annuity and other fund deposits are allocated by address of the contract holder.

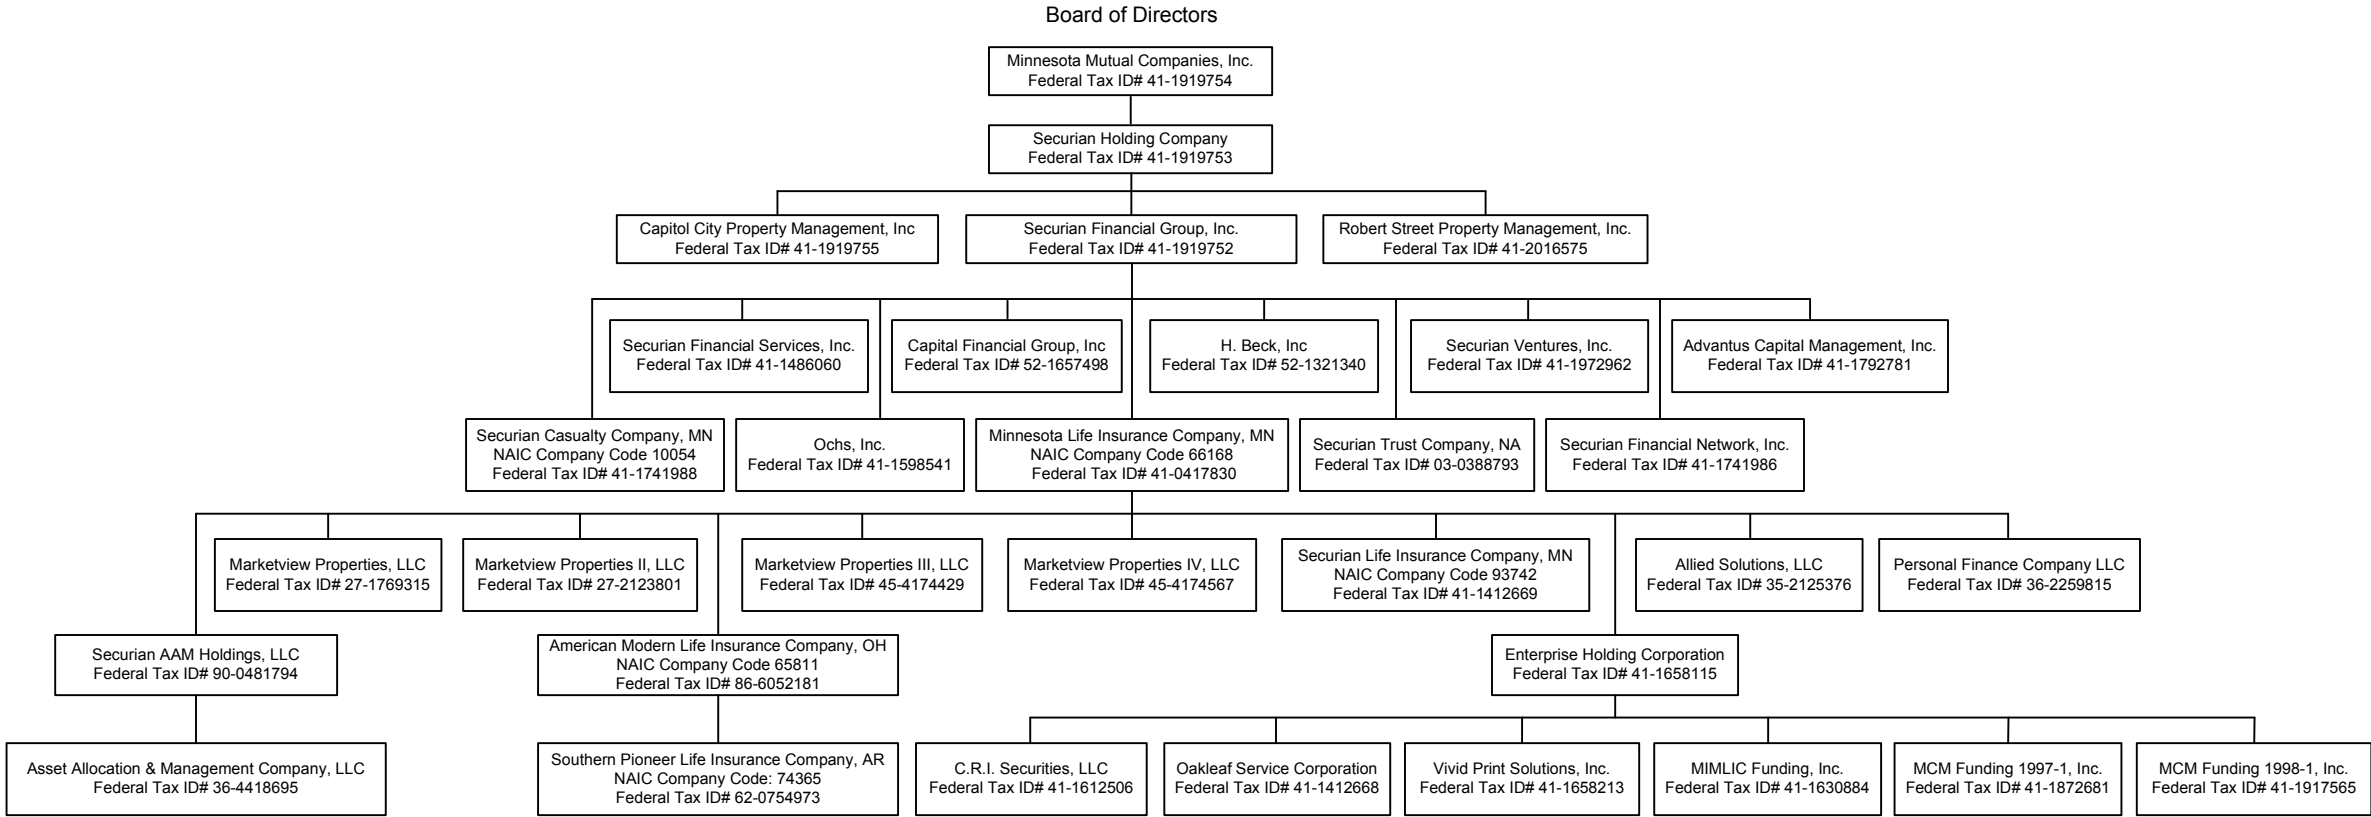

(a) Insert the number of L responses except for Canada and Other Alien.

(b) Column 4 should balance with Exhibit 1, Lines 6.4, 10.4, and 16.4, Cols. 8, 9, 10, or with Schedule H, Part 1, Line 1, indicate which: Exhibit 1, Lines 6.4, 10.4, and 16.4, Cols. 8, 9, 10.
