The application of SSAP No. 101 requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. We believe it is more likely than not that our deferred tax assets will be realized and have therefore recorded no valuation allowance as of March 31, 2015. Significant factors we considered in determining the probability of realizing the deferred tax benefits include our historical operating results, the amount of our loss carry back potentials, and the expectations of future earnings.

The Company adopted the footnote disclosures of SSAP No. 101 effective January 1, 2012, and the tables below are presented based upon these requirements.

A. The components of the net deferred tax asset (DTA) and deferred tax liability (DTL) at March 31, 2015 and December 31, 2014 are as follows:

20. Fair Value Measurements

A. Assets Measured at Fair Value on Recurring Basis

With regard to the Company's financial assets that are disclosed at a fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, the Company uses various valuation approaches, including quoted market prices and discounted cash flows. The ASC and SSAP No. 100 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are obtained from independent sources and can be validated by a third party, whereas, unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 - Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Reclassification of certain financial instruments may occur when observability of inputs change. There were no transfers between assets carried at fair value classified within Level 1 and Level 2 of the fair value hierarchy during the periods ended March 31, 2015 and December 31, 2014.

There were no purchases, sales, transfers into, or transfers out of assets carried at fair value and classified within Level 3 of the fair value hierarchy during the periods ended March 31, 2015 and December 31, 2014.

The Company does not have any material financial assets or liabilities carried at fair value.

There were no assets or liabilities measured and reported at fair value on a non-recurring basis in 2015 or 2014.

Fair Value of Financial Instruments:

The following methods and assumptions were used to estimate the fair value of financial instruments.

Level 1 - Financial assets include cash and cash equivalents and actively traded exchange-listed equity securities. Unadjusted quoted prices for these securities are provided by an independent pricing service.

Level 2 - Financial assets include corporate bonds. Prices are provided using third-party pricing services, such as model-based pricing methods that utilize observable market data as inputs. Broker-dealer bids or quotes of securities with similar characteristics may also be used.

The fair values of financial instruments as of December 31, 2014 and 2013, are summarized as follows:					
March 31, 2015					
	Admitted Value	Fair Value	Level 1	Level 2	Level 3
Bonds	\$ 43,999,984	\$ 43,995,480	\$ -	\$ 43,995,480	\$ -
Cash and cash equivalents	6,270,505	6,270,505	6,270,505	-	-
December 31, 2014					
	Admitted Value	Fair Value	Level 1	Level 2	Level 3

NOTES TO FINANCIAL STATEMENTS

22. Events Subsequent

There have been no events subsequent to March 31, 2015, through the date of this filing (May 15, 2015), which could have a material effect on the Company's financial condition.

23. Reinsurance – Does not apply.

24. Retrospectively Rated Contracts & Contract Subject to Redetermination – Does not apply.

25. Change in Incurred Losses and Loss Adjustment Expenses

The Company writes only one line of business, "Other" (excess share insurance) and sets loss reserves on a prudent basis for potential claims events. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company's independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range. Further, since the Company has no specific loss events identified, for which a loss reserve would normally be established, all of the Company's loss reserves are unallocated IBNR loss reserves. As a result, for purposes of Schedule P, in any given year the cumulative loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other insurance companies with infrequent claims events. Since claims events are rare (infrequent but potentially severe), the typical year shows favorable development. A summary of the favorable loss development for the Company's single line of business ("Other") follows (dollars in thousands):

Year of Development	Col. 1 Prior Year (2014) Loss Reserve Allocated	Col. 2 Current Year (2015) Loss Reserves Allocated	Col. 3 Current Calendar Year (2015) Losses and LAE Incurred (Col 2 – Col 1)	Col. 4 Schedule P Part 2 Unfavorable (Favorable) Development (Col 2 – Col 1)	Col. 5 Gross Losses Incurred for Unallocated IBNR Loss Reserves (Col 3 – Col 4)
2012	\$ 215	N/A		\$ (215)	
2013	644	216		(428)	
2014	1,287	646		(641)	
2015	<u>N/A</u>	<u>1,292</u>		<u>N/A</u>	
Total Loss Reserves	<u>\$ 2,146</u>	<u>\$2,154</u>			
Increase (Decrease) in Loss Reserves			<u>\$ 8</u>	<u>\$ (1,284)</u>	<u>\$ 1,292</u>

No additional premiums have been accrued as a result of the impact of the changes in the provision for incurred loss and LAE expenses attributable to insured events of prior years.

26. Intercompany Pooling Arrangements – Does not apply.

27. Structured Settlements – Does not apply.

28. Health Care Receivables – Does not apply.

29. Participating Accident and Health Policies – Does not apply.

30. Premium Deficiency Reserves

The Company provides deposit insurance to participating credit unions for up to \$250,000 in excess of the insurance limit imposed by the credit union's primary insurer. Credit unions insured under the Company's excess insurance contract are required to maintain a premium deposit with the Company equal to 1% of the aggregate limits of liability. The premium deposits are recorded as a liability by the Company and are non-interest bearing. The investment earnings therefrom in addition to a monthly risk-based premium charge are used to fund the Company's deposit insurance program. The premium deposits are at-risk to the insured credit unions and ultimately can act as a reserve that is available to pay claims if needed. The aggregate of premium deposits that are available to pay claims are \$27,640,000 at March 31, 2015. Therefore the Company has determined there is not a need for a premium deficiency reserve and none has been recorded at March 31, 2015. This evaluation was completed on May 4, 2015. The Company
