NOTES TO FINANCIAL STATEMENTS

For the purposes of the quarterly interim financial information, it is presumed that the users of the interim financial information have read or have access to the Annual Statement as of December 31, 2014. This presentation addresses only significant events occurring since the last Annual Statement.

1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of Community Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners' ("NAIC") *Annual Statement Instructions* and in accordance with accounting practices prescribed by NAIC *Accounting Practices and Procedures Manual* ("NAIC SAP"), subject to any deviations prescribed or permitted by the Ohio Insurance Department (the "Department").

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Department is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

No significant change.

C. Accounting Policies

(1) – (5) No significant change.

(6) Loan-backed securities are stated at amortized cost. Pre-payment assumptions for loan-backed securities and structured securities were obtained from broker-dealer survey values or internal estimates. These assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to value all loan-backed securities. Non-investment grade loan-backed securities are stated at the lower of amortized cost or fair value.

(7) – (16) No significant change.

(3) The Company's policy is to recognize transfers between Levels, if any, as of the beginning of the reporting period.

(4) Fair values of fixed maturity securities are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. United States government securities represent Level 1 securities, while Level 2 securities primarily include corporate securities, securities from states, municipalities and political subdivisions and residential mortgage-backed securities. For securities not actively traded, the third party pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

Fair values of equity securities are generally designated as Level 1 and are based on quoted market prices. For certain equity securities, quoted market prices for the identical security are not always available and the fair value is estimated by reference to similar securities for which quoted prices are available. These securities are designated Level 2. The Company has certain equity securities, including private equity securities, for which the fair value is estimated based on each security's current condition and future cash flow projections. Such securities are designated Level 3. The fair values of these private equity securities are generally based on either broker quotes or discounted cash flow projections using assumptions for inputs such as the weighted-average cost of capital, long-term revenue growth rates and earnings before interest, taxes, depreciation and amortization, or revenue multiples that are not observable in the markets.

There have been no significant changes in the valuation techniques during the current period.

Explanations of Adjustments

- A Adjustments are based upon experience to date, marketplace and annual information which includes patient encounter and diagnosis code data.
B Not applicable.
C Adjustments are based upon experience to date, coinsurance rate, attachment point and reinsurance cap.
D Adjustments are based upon experience to date, coinsurance rate, attachment point and reinsurance cap.
E Adjustments are based upon actual membership.
F Not applicable.
G Not applicable.
H Not applicable.
I Adjustments are based upon experience to date, the impact, if any, of other risk-sharing programs and the provisions of the Risk Corridor program.
J Adjustments are based upon experience to date, the impact, if any, of other risk-sharing programs and the provisions of the Risk Corridor program.

25. Change in Incurred Claims and Claim Adjustment Expenses

The estimated cost of claims and claims adjustment expenses attributable to insured events of prior years decreased by \$43,800,978 during 2015. This is approximately 8.1% of unpaid claims and claim adjustment expenses of \$542,448,820 as of December 31, 2014. The redundancy reflects the decreases in estimated claims and claims adjustment expenses as a result of claims payment during the year, and as additional information is received regarding claims incurred prior to 2015. Recent claim development trends are also taken into account in evaluating the overall adequacy of unpaid claims and claims adjustment expenses.
