Items Measured at Fair Value by Levels 1, 2 and 3.

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

Level 1 – Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes exchange-traded common stocks, mutual funds and most U.S. Government and agency securities. The estimated fair value of the securities within this category are based on quoted prices in active markets and are therefore classified as Level 1.

Level 2 – Significant Other Observable Inputs: This category, for items measured at fair value on a recurring basis, includes bonds which are not exchange traded and common stock of a subsidiary which is valued using an adjusted market method. The primary inputs to the estimated fair value of the securities within this category include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Level 3 – Significant Unobservable Inputs: This category is for items whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability. The Company has no Level 3 assets.
