(8) Statutory Surplus, NAIC SAP	\$ 976,403	\$ 986,831

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the period. Actual results could differ from those estimates.

#### C. Accounting Policy

Premiums billed to individual and group subscribers are recognized as revenue in the month in which subscribers are entitled to receive dental care. Uncollected premiums over 90 days past due are nonadmitted and excluded from surplus. The Company contracts with dentists (providers) for dental services to be provided to its subscribers. Provider capitation consists of monthly fees paid to providers and is expensed in the month in which the provider is obligated to render dental services. Emergency services to members while temporarily out of their provider's area, as well as specialty services not covered by capitation fees, are recorded as incurred.

**A. Assets Measured at Fair Value**

(1) The Company has no financial instruments measured and reported at fair value.

**C. Aggregate Fair Value Disclosures and Level Within the Fair Value Hierarchy**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company has categorized its financial instruments into a three-level fair value hierarchy based on the priority of the inputs to the valuation technique.

The levels of the fair value hierarchy are described below:

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical financial instruments that the Company can access.

Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for the financial instrument, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 inputs include quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in markets that are not active and inputs other than quoted prices that are observable in the marketplace for the financial instrument. The observable inputs are used in valuation models to calculate the fair value for the financial instrument.

Level 3 inputs are unobservable but are significant to the fair value measurement for the financial instrument, and include situations where there is little, if any, market activity for the financial instrument. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the financial instrument.

The narrative and table below provide information regarding the fair value of financial instruments.

**Bonds**

Fair values for bonds are based on quoted prices in active markets.

**Cash and short-term investments**

The reported carrying value approximates fair value because of the short maturity of the instruments.

## NOTES TO FINANCIAL STATEMENTS

The following table summarizes the aggregate fair value of financial instruments and the level within the fair value hierarchy as of March 31, 2015:
